EDUCATION

University of Illinois Chicago - Bachelors of Science (Dean's List from 2024 - 2026)

Chicago, IL, USA

Double Major: Information & Decision Sciences AND Finance, **Minor** - Marketing (GPA: 3.72/4.0)

- Co-Director of Public Relations for Business Analytics Organization @ UIC

WORK EXPERIENCE

Education Technology Lab @ UIC

Chicago, USA

Computer Specialist

2023 - Present

- **Resolved** ~150 software and hardware incidents per month across **200+ endpoints**, reducing system downtime by **40%** maintaining device security and performance
- **Optimized** IT helpdesk workflows and documentation, decreasing average ticket resolution time by **30%**

College of Business Administration @ UIC

Chicago, USA

Teaching Assistant

2023 - Present

- **Instructed** 200+ undergraduates across Business Statistics, MIS, and Supply Chain courses, raising average exam performance by **15%** through targeted assistance
- **Structured** assignment rubrics and evaluation criteria with faculty, improving project outcome consistency by **25%** across distinct sections, covering weekly lab sessions related to analysis coursework

Manilal and Sons

Gujarat, India

Data Analytics Engineer

2020 - 2022

- **Validated and reconciled** financial transaction data across daily ledgers, ensuring **100% data accuracy** and uncovering procurement inefficiencies that **reduced costs by 10%** across **5** product categories
- Developed a demand forecasting model using **5 years of historical sales data**, improving inventory **turnover by 15%** and materially reducing stockout frequency
- Designed analytical dashboards in Power BI to track pricing dynamics and competitive trends, supporting pricing decisions that increased margins by **12% on top-performing products**
- Evaluated **logistics and delivery performance data**, identifying routing and scheduling constraints that **reduced average delivery times by 18%** and streamlined on-time fulfillment rates

PROJECTS

Machine Learning Telecom Customer Churn Prediction

- Modeled **~5,000 customer records** with Feature Engineering across tenure, usage, and billing attributes
- Achieved **~90% AUC** using Logistic Regression, Random Forest, and KNN, identifying high-risk churn segments

Retail Performance Analytics Dashboard (SQL + Tableau + BigQuery)

- Modeled **100K+ e-commerce orders** into a BigQuery star schema and surfaced **10+ KPIs** via Tableau
- Identified a **~55% revenue decline** driven by a **~60% drop in order volume** through time-series analysis

Fitbit Wellness Data Analysis

- Analyzed **100K+ time-series records** from **30+ users** using R and SQL, performing ETL, data validation, and feature aggregation across activity, sleep, and calorie metrics
- Identified **statistically meaningful relationships** between daily steps, sleep duration, and calorie burn (higher activity days correlated with improved sleep consistency and optimized caloric expenditure) and delivered reproducible **RMarkdown** reports and **visualizations**

Demand Forecasting Time Series (M5 Walmart Data)

- Built a production-ready **time-series forecasting pipeline** in Python using **leakage-free rolling backtests**, benchmarking **ARIMA**, **XGBoost**, and **baselines** across **30 store-category segments**
- Implemented **end-to-end ETL**, **time-series feature engineering** (lags, rolling stats, calendar effects), and **standardized evaluation** (MAPE, RMSE, MAE) for scalable batch forecasting
- Achieved **13.51% MAPE**, outperforming retail benchmarks (15–25%), and quantified **\$2.7M+ estimated annual ROI** from improved inventory planning

SKILLS & INTERESTS

Programming & Databases: Python, PySpark, Java, SQL, NoSQL, Shell Scripting

Data Analysis & ML: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, TensorFlow, PyTorch; Statistical Modeling and Predictive Analytics, Feature Engineering, Model Evaluation

Data Engineering & Platforms: BigQuery, ETL Pipelines, Data Modeling, AWS, Azure, Google Cloud

Business Intelligence: Power BI, Tableau, Looker; Excel (Advanced), Data Visualization & Dashboard Design, SAS, SAP

Tools & Platforms: Git, Jira, Asana, Figma, Linux, MacOS
