EDUCATION

MS, Artificial Intelligence & Business Analytics | GPA 3.8 | University of South Florida
B. Tech, Electronics & Communication | GPA 3.8 | GITAM University

Aug 2023 - May 2025

Jun 2017 - Aug 2021

PROFESSIONAL EXPERIENCE

Data Analyst GA | University of South Florida | Tampa, FL

Aug 2024 - May 2025

- Crafted an interactive **Tableau** dashboard to track key performance indicators (**KPIs**) for departmental operations, improving decision-making efficiency by 15% through real-time, data-driven insights.
- Demonstrated expertise in **Python, R, and SQL** to manage large datasets (100,000 records).
- Applied Excel functions (**VLOOKUP, PivotTables, INDEX-MATCH**) and data analysis techniques to consolidate large datasets and generate actionable reports, enhancing operational efficiency.

Data Engineer | Thomson Reuters | India

Jun 2021 - Jul 2023

- Automated **Python** coverage reporting for unit, integration, and XSLT tests on **GitHub**, reducing bug reporting time by 20%.
- Configured **DAGs** in **Apache Airflow** to streamline data retrieval, monitor workflows, and ensure reliable scheduling and execution of **ETL** tasks across **Hadoop and Spark** environments.
- Led the integration of data engineering, heading a team to enhance application functionalities, optimize complex **SQL queries**, and develop a cohesive system that boosted team productivity and resulted in a 5% performance increase.
- Deployed serverless APIs using **AWS Lambda, Step Functions**, and **API Gateway**, reducing infrastructure costs by 10%.
- Developed scalable ETL pipelines and transformation processes using **AWS Glue, AWS S3**, and **AWS CloudFormation**, enhancing data processing speed by 40% and lowering operational costs by 15%.
- Spearheaded workflow optimizations using **AWS CloudWatch** for monitoring and **Amazon SNS** for alerting, resulting in a 15% reduction in operational expenses and a 40% improvement in data pipeline reliability.
- Built and maintained modular, reusable data transformation models using **DBT (Data Build Tool)**, streamlining ETL workflows and improving data pipeline maintainability and testing coverage by 25%.

Data Analyst | SKYTEK | India

May 2020 - May 2021

- Engineered reproducible and automated data analysis pipelines using **Python, SQL, and Power BI**, reducing stakeholder reporting time and improving data accuracy by 15%.
- Created 10+ interactive **dashboards** in **Power BI** to support HR functions like compensation and benefits, improving decision-making speed by 25% across 3 departments.
- Conducted **statistical analyses**, including descriptive, predictive, and causal modeling, to identify trends and provide actionable insights for HR functions.
- Constructed Python-based web scraping pipelines using Selenium and BeautifulSoup to extract 10,000+ COVID-19 data records, followed by **data analysis** to identify and visualize states most impacted by the pandemic.

ACADEMIC PROJECT

Banking Data Analytics

- Imported and structured 50,000+ banking records from Excel into MySQL, resolved 98% of missing data, and performed EDA in Python to uncover customer risk factors and identify a 15% higher default rate among specific demographics.
- Designed an interactive Power BI dashboard tracking 10+ key risk indicators (KPIs), improving stakeholder visibility into risk trends and enabling timely, data-driven mitigation actions.

End-to-End YouTube Trending Video Analysis and Visualization Pipeline

- Engineered an end-to-end AWS data pipeline to ingest, clean, and transform YouTube trending video data using AWS Glue (Apache Spark) and Amazon Athena, handling JSON and CSV formats.
- Built interactive Tableau Public dashboards to visualize video popularity and categorization trends, enabling data-driven decisions for targeted advertising campaigns.

Global Child Labor Trends (Data Visualization)

- Analyzed child labor data from 100+ countries, uncovering that lower GDP per capita correlated with up to 45% higher child labor rates; designed interactive Tableau dashboards with slicers and calculated fields for insights.
- Created KPI-driven visualizations (heatmaps, trend graphs, correlation plots) that reduced manual data analysis by 30% and supported NGOs in prioritizing targeted intervention strategies.

SKILLS

Programming Languages:	Python, R, SQL, C, MATLAB, C#
Database:	Oracle DB, MySQL, PostgreSQL, pgAdmin
IDE:	Visual Studio, PyCharm, Idea IntelliJ
Cloud technologies & tools:	AWS Lambda, Auto Scaling, EC2, CloudWatch, etc.
Data Visualization Tools:	Tableau, Power BI, Tableau Public, Matplotlib, Seaborn
ETL tools:	Apache Airflow, Apache Spark, AWS Glue, DBT (Data Build Tool)
CERTIFICATION:	AWS Associate Solution Architect
