EDUCATION

The University of North Carolina at Chapel Hill | Chapel Hill, NC

B.S. in Statistics and Analytics, Minor in Data Science

December 2025

Relevant Coursework: Advanced Methods of Data Analysis, Optimization for Machine Learning, Communications to Data Scientists, Probability, Sports Analytics

EXPERIENCE

Draft Kings | Raleigh, NC

October 2025 - Present

Data Coordinator Associate, NBA

- Monitored and verified real-time NBA field goal and free throw market data during live games.
- Detected and resolved statistical discrepancies, cross-checking multiple data feeds to maintain reliability and market integrity in high-pressure, in-game environments.
- Collaborated with an internal trading team to streamline workflows and apply strong NBA knowledge to ensure accuracy tied to schedules, rosters, and gameplay rules.

Campus Recreation | Chapel Hill, NC

June 2022 - December 2025

Facility Operations Ambassador

- Ensured gym equipment, courts, and studios were clean, safe, and functional; performed minor repairs and reported facility issues across multiple locations.
- Supported members by answering questions, resolving disputes, and enforcing facility policies regarding court reservations, equipment usage, and safety.
- Collaborated with other ambassadors and supervisors to maintain high service standards; responded to incidents and emergency situations with CPR/AED certification.

TECHNICAL PROJECTS

NBA Team Performance Prediction

Spring 2025

- Built predictive models to forecast NBA playoff game outcomes using historical and real-time stats via the **nbastatR** R package.
- Engineered rolling and lagged metrics from team performance data to enhance model accuracy.
- Applied multiple modeling techniques including stepwise linear regression, random forest, and XGBoost; tuned hyperparameters and evaluated performance using MAE and RMSE.

Pickleball Rally Outcome Analysis

Spring 2025

- Collected and analyzed 300 rally-level observations from recreational doubles pickleball matches to identify key factors affecting rally outcomes.
- Conducted statistical testing to evaluate strategic advantages for serving teams and volley effectiveness.
- Visualized insights using custom R plots to support hypotheses on net dominance and aggressive shot selection.

FIFA Player Rating Prediction

Summer 2023

- Built multiple linear regression models to predict FIFA player ratings using attributes like pace, shooting, and passing.
- Evaluated and compared model fits using adjusted R^2 and residual diagnostics to assess accuracy and variable significance.
- Used R for data preprocessing, visualization, and modeling to draw insights about player performance predictors.

SKILLS & CERTIFICATIONS

Programming Languages: R, Python

Tools and Technologies: Rstudio, VScode, Jupyter Notebook, Excel

Machine Learning: Supervised and Unsupervised Learning, Model Evaluation
