Summary:

- I have over 3.5 years of experience in backend web development, including design and implementation of Client/Server applications.
- Experienced in tools such as: Java, Spring Boot, MySQL, and MongoDB.
- Experienced in System Design.
- Developed dynamic and responsive web pages using HTML5, CSS3, and Bootstrap.
- Strong database design and programming skills in SQL Server, SQL Stored Procedures, functions, and importing/exporting data from varied data sources.
- Developed RESTful APIs using Java, Spring Boot, and jdbcTemplate.
- I am a critical thinker and proficient at problem solving.
- Good understanding of Agile development methodology.
- Experienced as a Java programmer with experience in MVC architectures.
- GIT to manage source control.
- Deep understanding of technical and financial service relationships.
- Worked on various microservice architectures.
- I am a US citizen.

Technical Skills:

Programming languages: Java and SQL.

Scripting languages: HTML5, CSS3, Bootstrap, PHP.

Server-Side Languages: Spring Boot, JPA, JDBC, Web-Services (RESTful), Tomcats, JSON

Database: SQL-Server, MySQL, MongoDB, RDBMS, NoSQL.

Tools: IntelliJ, Visual Studio Code, Git, Jira, BitBucket, Maven, and Python.

Professional Experience:

Citi Bank

August 2021- December 2023

Software Engineer

Description:

I worked on a Java based application called Safety Compass, which was used throughout the firm. We consumed Excel reports from different sectors within the organization, extracted relevant information, formatted them, and presented them in a graphical manner in the UI.

Responsibilities:

- Involved in system design of supporting project.
- Implemented various J2EE design patterns such as Model-View-Controller, Data Access Object and Composite View
- Reviewed and provided constructive feedback on code written by team members.
- Involved in configuring Spring and developing the configuration files.
- Designed a lightweight model for the product using Inversion of Control principle and implemented it successfully using Spring IOC Container.
- Provided connections using JDBCTemplate to the database and developed complex SQL queries with multiple table joins to manipulate the data.
- Wrote SQL queries with aggregate functions.
- Developed DAO using spring JDBCTemplate to run performance intensive queries.
- Wrote stored procedures and used Java RESTful APIs to call these procedures.
- Used data structures and searching/sorting algorithms to make the code more efficient.
- Developed various test cases, such as unit tests, mock tests, and integration tests, using JUNIT.
- Wrote stored procedures and functions.
- Used log4j to perform logging in the applications.
- Utilized Jenkins for continuous integration and deployment (CI/CD) processes.
- Used Kafka for real-time data processing and event-driven architecture.

Environment: J2EE, Spring Boot, DAO, XML, JPA, JUNIT, JDBC, Log4J, Oracle, SQL, Apache Tomcat, Business Logic, IntelliJ, DB2, MongoDB, Jenkins, and Kafka.

Senoark
Software Engineer

September 2020- May 2021

Description:

Created and maintained applications used by the previous development team, including but not limited to bug fixing, feature enhancement, and performance tuning in corporate security.

Responsibilities:

- Maintained constant communication with business analysts and business users to identify information needs as per business requirements.
- All logic exposed via interfaces and practices of Test-Driven Development followed consistently.
- Implemented the Model View Controller (MVC) framework.
- Designed and developed the UI using HTML, CSS, and jQuery.
- Used Spring Core for dependency injection/Inversion of control (IOC).
- Utilized JdbcTemplate for Object/Relational Mapping (ORM) purposes for persistence onto the database.
- Extensively used Spring IOC architectural model to inject objects based on the selection of components like setter injection and Interface injection to manage the object references.
- Maven was used as a build framework
- Involved in creating the SQL scripts for the database. Used stored procedures in the application.
- Worked with the production support team on debugging and fixing various production issues.

Environment: Java, Web Services (REST), HTML, CSS, and MySQL.

Education:

Montclair State University, New Jersey, USA — MSCS

September 2022 - April 2024

Master of Science: Computer Science

North South University, Dhaka, Bangladesh — BSCSE

September 2016 - September 2020

Bachelor of Science: Computer Science and Engineering
