

EDUCATION**Master of Science in Computer Science**

University of North Carolina at Charlotte

August 2021- May 2023

GPA – 4.0/4.0**Bachelor of Engineering in Computer Science**

PSG Institute of Technology and Applied Research, India

August 2014 – May 2018

GPA – 3.7/4.0**TECHNICAL SKILLS**

Languages	: Python, Java, C++, Unix, HTML, JavaScript, CSS, T-SQL
OS	: Windows, Linux
DBMS	: MySQL, Oracle, MongoDB.
Frameworks	: Spring boot, NodeJS, Angular, Mockito.
Tools /Services	: SQL Server, Power BI, Pentaho, AWS, Gi, Tableau, Netezza, MSOffice Package, JIRA, SSIS, SSRS.
Certifications	: AWS Certified Cloud Practitioner, AWS Data Analytics.
Relevant Courses	: Algorithms Data Structures, Cloud Computing, Computer Vision, Big Data, Database Systems

PROFESSIONAL EXPERIENCE**Software Development Engineer – AWS Amazon**, Seattle, Washington.

July 2023 – Nov 2023

Engineered and optimized ML models as a key member of the Amazon Textract team, accelerating document processing time by 40% for improved efficiency and scalability.

- Implementation for multi-region infrastructure, deployment automation for AI services in new regions.
- Developed a python script to provide top TPS limit for each region which made 5% of work reduction.
- Supporting model hosting service to host science model and handling ad-hoc issues by root cause analysis and mitigation.
- Streamlined fleet instance utilization by analyzing data and implementing targeted CAPEX strategies, leading to a 25% reduction in infrastructure costs and achieving cost-saving goals ahead of schedule.

Software Development Engineer Intern - Amazon.com, Detroit, Michigan.

June 2022 – August 2022

Interned in the XAP team at Amazon.com, where I developed APIs to streamline the management of global permissions between users.

- Simplified cumbersome manual process of managing user permissions by creating APIs.
- Optimized business logic by implementing tailored APIs with Java Spring Boot and Angular; achieved a 30% increase in system performance and enhanced user experience by enabling real-time data synchronization.
- Utilized JUnit Mockito during the testing phase of development to ensure quality and reliability of the code.

Data Engineer - Tata Consultancy Services, Chennai, Tamil Nadu

September 2018 – February 2021

Started as an Associate Engineer in the Banking, Financial Services, and Insurance Sector for Client - Bank of Montreal.

Promoted to Data Engineer and led the offshore team in creating data pipelines, scheduling, and deploying packages using SSIS, developing complex PL/SQL, views functions, stored procedures and recursive CTE queries and retrieving the data from Hadoop Distributed File Systems.

- Experienced in data migration (Netezza to Hive) using Pentaho ETL.
- Developed and maintained ETL (Extract, Transform, Load) mapping using SSIS to extract data from multiple source SQL Server 7.2, flat files to staging area and then to Data Marts - over 10 Terabytes of data.
- Automated tasks of loading data in target tables using workflow developed in Pentaho that reduced 30% of workload.
- Performed Testing based on Slowly changing Dimension (Type1 and Type2) and Change Data Capture (CDC) method and deployed in production with a success rate of 99.5%.
- Achieved a new milestone by providing solution for complex business requirements and automated the task which reduced 400-man hour across the operations by loaded the data from data file in SSIS workflow.

ACADEMIC PROJECTS**Job Board Web Application: [Angular- Front End, Spring Boot, Kotlin – Backend]**

May 2023

- Developed a job board application using angular as front end and Spring Boot, Kotlin, MySQL, TypeScript for Backend.
- Implemented features including job search, Bookmarking, filtering jobs by different companies, positions, and years of experience.
- Admin can perform CRUD operation on the jobs, the candidate can apply, view, and bookmark the jobs.

Predict Arrests in Chicago Crime dataset [Python , Logistic Regression, Random Forest, XG Boost]

May 2023

- Analyzed 7M rows across the past 20-year crime data to determine the crimes happening in which districts, wards, location, and community are more susceptible in getting arrested rather than others.
- Performed modeling using Logistic Regression, Random Forest and XGBoost. Used GridSearch CV to optimize the XG Regressor by fine tuning the estimators. Achieved a test accuracy of about 87% using AWS S3, Lambda and EC2.

Campus Eats [SQL Server Management Systems, MySQL]

Dec 2023

- Created a database for food delivery service on campus using EERD modelling. Applied T-SQL, Stored Procedure and Views to retrieve required information from the database. Provided UI for inserting, updating, retrieving data from the database.

Interactive Resume Dashboard: [Tableau, Google Sheets] [View Here](#)

January 2022

- Generated an advanced interactive dashboard in Tableau with quick, context, global filters, and calculated fields to visualize cleaned data from Google Sheets in charts and timelines.
