PROFESSIONAL SUMMARY

Software engineer with 5 years of experience in development and testing of applications in **Python** utilizing software build and deployment tools. Proficient working with **multiple database services**. Experience working on **AWS Cloud** services. Experience with **API development** using industry standard frameworks. Experience working in **Agile** development process in SDLC phases. Excellent problem-solving skills, verbal and written communication skills, and proven display of leadership and collaboration skills.

EXPERIENCE

PYTHON DEVELOPER AT ROBO RETAIL (CLIENT – WINNEBAGO) (Oct 2022 – Present)

- Designed, developed and tested frontend APIs and backend services for the WinnConnect application for RVs at Winnebago.
- Developed Python modules on a Raspberry Pi to control hardware components for various subsystems in the RV like temperature, lighting, energy, water systems, etc.
- Leveraged FastAPI framework to develop front-end APIs to enable seamless interaction with a user-friendly UI for the driver.
- Hosted a SQLite3 database to ensure efficient and secure storage and retrieval of user and component data.
- Developed front end components for the infotainment screen in the RV using ReactJS.
- Utilized Postman to test and validate API responses ensuring the reliability and functionality of the application.
- Created and implemented pytest and unittest scripts for unit, integration, and end-to-end testing to enhance resiliency.
- Managed Git repositories within Azure DevOps for version control to ensure streamlined collaboration and maintenance.
- Created and managed user stories and tasks in Azure DevOps, facilitating sprint planning, adhering to Agile methodology.
- Interacted with clients and end-users to gather requirements and translate them into actionable project plans, while providing valuable insights from a developer's perspective to ensure feasibility and alignment with business objectives.

SOFTWARE DEVELOPER AT POWER ENGINEERS INC (Jan 2020 – Mar 2022)

- Deployed a serverless system in AWS to support a web application designed for monitoring a power distribution network.
- Developed Python modules in AWS Lambda to which business requests are routed via an API Gateway using HTTP/REST APIs.
- Utilized Peewee ORM to write efficient PostgreSQL queries to fetch data from Amazon Aurora DB preventing SQL injection.
- Utilized Chalice framework to develop Python code for efficient and rapid API development and deployment.
- Set up asynchronized processing of functions using AWS SQS and Step Functions to perform read/write operations to S3.
- Leveraged AWS CodeCommit, CodeBuild and CodeDeploy for automatic build and deployment using Terraform.

JUNIOR SOFTWARE ENGINEER AT LEIDOS (Jan 2018 – Jan 2020)

- Developed, implemented, and tested components of employee performance management portal, that served as a centralized hub for dynamic insight into utilization goals, performance metrics, and key performance indicators.
- Created custom API endpoints using Django Rest Framework and developed Python back-end modules utilizing Pandas and NumPy libraries to derive key statistical insights and snapshots for business and employees based on functional requirements.
- Developed automated scripts to connect to various data stores and fetch relevant data for downstream analytics.
- Performed data modeling and mapping and created ER diagrams that enhanced database performance and latency.

TECHNICAL SKILLS

- Programming : Python, Java, C, HTML, CSS, ReactJS, REST APIs, FastAPI
- Database Technologies : SQL, PostgreSQL, SQLite3, MySQL, Snowflake
- Cloud Experience : AWS (Lambda, S3, Aurora, API Gateway, Cloudwatch), MS Azure (Repos, Pipelines, Boards)
- Platforms/Tools : VSCode, Pycharm, Eclipse, Swagger, Postman, DBEaver, Git , Jira
- Operating Systems : Windows XP/7/8/10, Linux

EDUCATION

- | | | |
|---|-----------|----------------------|
| University of North Carolina at Charlotte | 3.667/4.0 | Aug 2016 - Dec 2017 |
| Major: Master's in Electrical and Computer Engineering | | |
| National Institute of Technology, Warangal | 3.0/4.0 | July 2012 - May 2016 |
| Major: Bachelor of Technology in Electrical and Electronics Engineering | | |
