

Rohith Kumar Reddy Kareddy

Email:- kareddykr.01@gmail.com | Ph: +1 203-832-4486

LinkedIn: www.linkedin.com/in/kareddy-rohith-dataanalyst

Professional Summary:

- Over 2 years of experience in Database Design, Development, Integration Implementation and Maintenance of Business Intelligence and the related Database Platform.
- As a Data Analyst responsible for Data Modeling, Enterprise Data Management, Data Presentation, Visualization, Optimization, Risk assessment, predictive analysis, advance Data Analysis, Business Research and Quantitative Analysis
- Experience in **MySQL 8.0** with an emphasis on design, development, automation, tuning, optimization, Performance and Security.
- Experience in analyzing business user requirements, analyzed data and designed software solutions in Power BI Desktop based on the requirements.
- Experience in converting Legacy Reports to **Power BI** dashboards connecting to **MYSQL** server.
- Built and published interactive reports and dashboards using **Power BI** Desktop and **Power BI** Server.
- Explore data in a variety of ways and across multiple visualizations using **Power BI**.
- Experience in publishing **Power BI** Desktop reports created in Report view to the **Power BI** service.
- Experience in creating **Power BI** Dashboards (Power View, Power Query, Power Pivot, Power Maps).
- Experience working on Power BI (Desktop, Server, Reader), creating various Reports and Dashboards using different functionalities.
- Experience in Power BI Desktop, **Power BI** for data visualization, Reporting and Analysis; Cross tab, Scatter Plots, Geographic Map, Pie Charts and Bar Charts, Page Trails, and Density Chart.
- Proficient in Design of **ETL** DTS Package for integrating data from heterogeneous sources (Excel, CSV, Oracle, flat file, TextFormat Data).
- Handled various types of encryption and decryptions in **MySQL** as per client requirements to secure data.
- Developed **Python script** to for processing large data sets and also to extract data from different files.
- Built **Python** Modules to deliver specific formats of data.
- A polished communicator, with good analytical and inter-personnel skills and versatile team player.

Technical skills

Technical Proficiency: Excel, SQL, Python, Power BI, Tableau, MySQL

Core Skills: Data Cleaning, Statistical Analysis, Data Visualization, Predictive Analytics, Ad Hoc Analysis

Soft Skills: Problem Solving, Attention to Detail, Communication, Team Collaboration

Education

- **Master of Science (M.S.) – Computer and Information Sciences**
Sacred Heart University, Fairfield, CT | Jan 2023 – Mar 2024
- **Bachelor of Technology (B.Tech) – Electrical and Electronics Engineering**
Scient Institute of Technology, Hyderabad, India | 2018 – 2021
- **Diploma – Electrical and Electronics Engineering**
Teegala Krishna Reddy Engineering College, Hyderabad, India | Jun 2015 – May 2018

Professional Experience

Client: Star Health Insurance, India

Role: Data Analyst

September 2021 – October 2022

At **Star Health Insurance Company**, I have developed dynamic dashboards using the Customer Communication Management tool, implementing age and category filters, and applying display rules for individual paragraphs.

Tools and Technologies used: **MYSQL** Server 2012, Office 365, **Power BI** Desktop, **DAX**, Jira, SharePoint, Excel, Word

Responsibilities:

- Designed and implemented for seamless data import/export between Excel, Flat files, and **MYSQL** Server, ensuring efficient data processing.
- Applied a robust understanding of data modeling in data warehouse environments, utilizing star schema.
- Proficiently conducted data analysis, querying databases, and utilizing **MYSQL** query tools to extract valuable insights.
- Created stored procedures, functions, indexes, and views for data processing and cleansing, ensuring data accuracy.
- Engaged in creating **DAX** and tabular models and incorporating diverse visualizations in **Power BI** based on project requirements.
- Leveraged **Power BI** for collaborative work with users and stakeholders on live data sources, enhancing real-time decision-making.
- Owned and supported operational and business performance dashboards, interpreting results, identifying improvement opportunities, and making recommendations.
- Generated reports in **Power BI** Desktop, published them to respective workspaces, apps, and automated the process for showcasing the latest data.
- Implemented various **DAX** functions for efficient data visualization in **Power BI**, optimizing fact calculations.
- Conducted training sessions with business users on **Power BI** reports and dashboards, ensuring widespread understanding and usage.
- Performed user acceptance testing to ensure system integrity before the release to production.
- Leveraged **SQL** queries to extract and manipulate health insurance claims data from relational databases for analysis and reporting purposes.
- Applied Statistical analysis is **Python** using libraries such as **Pandas**, **Numpy** and **Matplotlib** to identify trends, patterns and anomalies in health insurance data & eliminate duplicate entries from the database of businesses 90% accuracy.
- Fetch the data's from Datawarehouse using **Snowflake** and connect into **Power BI** for generating reports.
- Used **Power BI** drill through and slicer features to enable stakeholders to analyze health insurance data at different levels of granularity.
- In **DAX** function, analyzed the last period of growth of the company using by Time Intelligence Function, Date Functions and Coming up with solutions to business problems using data-driven approaches.
- Implemented end-to-end data processing pipelines, reducing processing time by 30% and enhancing data accuracy.
- Published **Power BI** Desktop models to **Power BI** Service, creating informative dashboards and collaborating through workspaces and apps.

Client: Zomato, India

Role: Data Analyst

November 2020- August 2021

At **Zomato**, I led **Power BI** initiatives, collaborating on project scopes, implementing data processing enhancements, and designing advanced dashboards. Utilized **DAX** and Power Query for accurate insights, ensuring effective decision-making and streamlined reporting.

Tools and Technologies: Microsoft MYSQL Server, Jupyter Notebook, Excel, Jira, Power BI.

Responsibilities:

- Collaborated with Stakeholders and Business Analysts to define project scope and discuss **Power BI** solutions for effective decision-making.
- Handled more than 1000 restaurants data across India.
- Analyzed this data using **MySQL** database and performed **ETL** to remove outliers, clean up bad records, normalize revenue number to standard format using **Python** (Pandas) in **Jupyter notebook** along with other statistical techniques.
- For more analyzing, used **Excel**, pivot tables, figured out best restaurants in India cuisine based on reviews.
- Used **Power BI** to build various BI dashboards and reports to show the growth in different restaurants based on the sales, profits and how customers preferences have changed over a period of 5 years.
- Gathered and imported daily and historical data related to sales files using **MySQL**, ensuring accurate data processing.
- Communicated the migration plan, timelines, and expectations to stakeholders and users, keeping them informed throughout the process.
- Offered ongoing support and assistance to users as they adapt to the new BI platform and workflows.
- Developed paginated reports with Report Builder
- Analyzed claim requests, financial statements, and rate changes, generating summary reports, and creating financial models for forecasting.
- implemented complex **DAX** calculations to derive insightful metrics, enhancing the depth and accuracy of data analysis in **Power BI**.
- Designed and deployed advanced **Power BI** dashboards with interactive features, providing stakeholders with real-time access to critical business metrics.
- Optimized queries and data retrieval processes to improve report performance.
- Developed visually compelling reports using **Power BI**, incorporating diverse visualizations such as stacked bar charts, scatter plots, and trend lines.
- Applied **DAX** functions to create calculated measures, enabling dynamic and flexible data manipulation within **Power BI** reports.
- Designed **Power BI** dashboards and scoreboards for the claim processing department, providing visual insights into key performance indicators (KPIs).

Certifications

- Data Analyst Simulation – Accenture North America
- Power BI Job Simulation – PwC Switzerland
- Career Essentials in Data Analysis – Microsoft
- Excel skills for Business Job Simulation – Goldman Sachs
