CAREER SUMMARY

Cloud Engineer with 2 years of experience optimizing cloud resources and reducing system latency for applications supporting thousands of users. Well-developed ability to create full-stack web applications with React and backend solutions using AWS services. Adept at developing API endpoints connecting front-end applications with back-end services. Career history of managing cloud infrastructure with Terraform, ensuring consistent deployment across environments.

TECHNICAL SKILLS

Python | HTML | Java | JavaScript | CSS | NoSQL | SQL | PowerShell | Bash | C++ | RESTful APIs | AWS
Infrastructure | AWS API Gateway | AWS Lambda | AWS S3 | AWS Cognito | AWS IAM | AWS SES | AWS CloudWatch
React | Boto3 | Terraform | Docker | MUI | Flask | Express | Spring Boot | JUnit | Postman | Git | Supabase | Figma |
Jira | Confluence | GitHub

PROFESSIONAL EXPERIENCE

CARDIGEN

Freelance Full Stack Developer

July 2022 – Present

- Developed a full-stack web application for Cardigen with 100+ users engaging with dynamic dashboards and visualizations for flashcard studying using React and MUI
- Built a scalable backend with Supabase, handling authentication, file storage, and thousands of CRUD operations, supporting six data upload methods for seamless flashcard management

NEXTILES

Backend Cloud Engineer

July 2022 – July 2024

- Implemented infrastructure as code using Terraform to provision and manage S3, Lambda, Cognito, SES, Kinesis, Timestream, DynamoDB, API Gateway, IAM resources, improving deployment speed and consistency across environments
- Built cloud-based backend solutions using AWS Python SDK, enhancing system performance for business applications while expanding expertise in cloud infrastructure design
- Managed AWS cloud infrastructure supporting 300 users, ensuring smooth system performance and user access across all platforms
- Developed 30 API endpoints connecting front-end applications with back-end services, ensuring reliable data transfer between systems
- Optimized API performance achieving 0.4 second average response time, enhancing user experience and application functionality for clients
- Collaborated with development teams to build cloud-based microservices architecture supporting thousands across multiple applications, reducing system latency by optimizing cloud resources

EDUCATION & TRAINING

HUNTER COLLEGE

Bachelor's Degree - Computer Science

June 2021

NPOWER

Network and Systems Administration

Aug 2025 – Present

LICENSES & CERTIFICATIONS

CompTIA Network+

est. completion Dec. 2025

CompTIA Linux+

est. completion Dec. 2025

CompTIA Azure+

est. completion Dec. 2025

PROJECTS

PoE Guidebook (JavaScript, React, Express) | An Informative MERN Web Application

- Designed an informative frontend consisting of multiple infographics that showcase different systems found in Path of Exile using React libraries such as MUI and Redux
- Features a marketplace where users can view and create listings using MongoDB to store user data and transactions hosted on Node JS and Express

Cinematicians (JavaScript, Java, Spring Boot) | A Social Cinematics Web Application

- Built a media directory web app that allows users to connect and socialize in a forum consisting of movies and TV Shows utilizing Elasticsearch for fast and efficient querying
- Features the ability to view, create, update and delete reviews and discussion posts for cinematics stored on MySQL, utilizing external APIs for poster images and trailer videos
