

KODANDARAM MADAMANCHI

Email:manchi9182@gmail.com

Software Engineer

PH: 551-330-1544

PROFESSIONAL SUMMARY

Recent graduate with 4+ years of experience, excellent research, technical and problem-solving skills. Detail-oriented and able to learn new concepts quickly. Committed job seeker with consistent and organized practices. I enjoy designing, Implementing and Supporting applications I'm a highly motivated, productive team player looking to lead by example. Skilled in working under pressure and adapting to new situations and challenges to best enhance the organizational brand. Ambitious, career-focused job seeker, anxious to obtain an entry-level python developer and middleware admin position to help launch career while achieving company goals.

INDUSTRIAL EXPERIENCE

- * Having 5+ years of experience in Information Technology industry in various roles with excellent experience in Software Integration, Configuration, Build & Release management and Development for Several market driven international organizations.
- * Hands on experience of Build & Deployment phase and usage of Continuous Integration (CI/CD) tools, build Configuration, Change history for releases, Maintenance of build system, automation & smoke test process, managing, configuring and maintaining source control management systems.
- * Experience in using version control tools like Apache Subversion (SVN), GIT.
- * Experience in software development, including languages, and frameworks such as python, Bash, JavaScript, SQL and Ansible.
- * Experience in setting up Baselines, Branching, Merging and Automation processes using Shell, Perl, Python and Bash Scripts.
- * Experience with web frameworks like Django, Flask or FastAPI to build robust, scalable and secure web applications.
- * Working with databases (SQL AND NOSQL) such as PostgreSQL, MySQL, MongoDB, and Redis. Experience in designing schemas, writing efficient queries and handling database migrations.
- * Designing and implementing RESTful APIs or GraphQL APIs for backend services. Implementing user authentication to ensure security in applications.
- * Collaborating with frontend developers using frameworks like React, Vue.js or Angular, through APIs or GraphQL for seamless communication.
- * Experience in cleaning, transforming, and normalizing raw data using with tools like kafka.
- * Working with libraries like Tensorflow, PyTorch, Scikit-learn and Keras for building ML models.
- * Writing Python scripts for automation repetitive tasks like data scraping, file manipulation, system monitoring or batch processing.
- * Using AWS Lambda, google Cloud Functions or Azure Functions to build serverless applications with python.

Technical Skills

- * **Build tools/web/App Servers:** GIT, Pip, Apache, Django Dev Server, Flask and Gunicorn
- * **Cloud/Container Tech:** AWS, Google Cloud Platform(GCP), Docker and Kubernetes
- * **Programming Languages:** Python, Java Script, HTML

PROFESSIONAL EXPERIENCE:

Software Engineer
Cloudamerica llc Concord NC
Responsibilities:

April 2023 To March 2024

- * Developed automated scripts to streamline data processing tasks using Python.
- * Refactored existing codebase for improved readability and performance optimization.
- * Assisted in debugging and troubleshooting of software components written in Python.
- * Conducted unit tests on all developed code to ensure quality standards were met.
- * Collaborated with other developers to design solutions for complex problems encountered during development process.
- * Performed detailed analysis of user requirements and translated them into efficient Python code that meets the needs of the customer or project specifications.
- * Maintained version control system to track changes made to source code over time.
- * Provided technical support to end users experiencing difficulties with applications written in Python language.
- * Participated in daily standup meetings with team members to discuss progress and roadblocks encountered during development process.
- * Shadowed team engineers to learn new skills.
- * Designed and developed RESTful APIs with Flask microframework.
- * Employed Git version control system for tracking changes in source code repositories over time.
- * Utilized Pandas library for data analysis, manipulation, and visualization purposes.
- * Designed data models and implemented efficient data storage solutions with SQL and NoSQL databases.
- * Employed integrated development environments (IDEs).
- * Developed software for embedded systems, coding solutions for both new installations and in-situ hardware.
- * Implemented object-oriented programming in Python to build custom classes and functions.
- * Troubleshoot, debugged, and fixed issues related to existing Python codebase.
- * Utilized version control systems, such as GIT for source code management in python projects.

Environment: Git,Aws,Docker,Ansible,Kubernetes,RDS Python, Windows Servers, VM CARE, HTML,Django,Pandas,CSS and Linux.

System Admin
Software Technology, Inc. Princeton NJ
Responsibilities:

September 2022 To March 2023

- * Installed and configured software packages on Linux systems according to customer requirements.
- * Provided technical support for end-users experiencing problems with their Linux systems or applications running on them.
- * Deployed security patches to ensure that all Linux systems were up-to-date with the latest security updates.
- * Automated system setup and configuration using Tools such as Ansible , Puppet, Chef.

- * Deployed and managed machine learning models and AI applications on Linux servers, ensuring optimal performance and reliability.
- * Designed and implemented data pipelines for ML workflows using tools such as Apache Kafka, Apache NiFi, or Apache Airflow on Linux systems.
- * Monitored performance of applications running on Linux systems and tuned them as needed.
- * Managed and monitored server performance using tools like Nagios, Zabbix, Prometheus.
- * Collaborated with other teams across departments in order to design solutions that meet customer needs.
- * Maintained log files of system events and monitored these logs for suspicious activity or errors.
- * Automated routine administrative tasks using scripting languages like PowerShell and Bash, increasing operational efficiency.
- * Supported, configured, maintained and upgraded customer networks and in-house servers.
- * Installed, configured, and updated software and hardware components, ensuring system integrity and compatibility.
- * Developed scripts to automate tasks related to system maintenance and operations.

Staff Middleware Admin
Staff solutions Hyderabad TS
Responsibilities:

JAN 2020 To APR 2022

- * Managed application logs, monitored system resources utilization levels and took corrective measures when required.
- * Installed, configured and administered middleware applications such as Apache Tomcat, WebSphere and Oracle WebLogic.
- * Deployed new versions of code into production environment using version control tools such as GIT or SVN.
- * Created necessary documentation for all the configurations done on Middleware platforms for future reference purpose.
- * Resolved various database connectivity issues between different databases like Oracle, MS SQL Server through Middleware platform.
- * Performed periodic maintenance activities such as backups, archiving data for smooth functioning of middleware applications.
- * Conducted training sessions for other team members on topics related to installation and configuration of various Middlewares like JBoss, Weblogic.
- * Implemented patches and upgrades on middleware components in order to keep them up-to-date with Last releases.
- * Implemented security and configuration of SiteMinder single sign-on.
- * Extensively involved in monitoring the applications hosted on the client servers.
- * Troubleshooting WebLogic server connection and connection manager with Oracle 10g.
- * Log-file analysis(troubleshooting) to resolve issues using scripts.

Environment: Web Logic 8.1, Tomcat 5.5/6.0 on windows 2003 and Linux servers, Apache web server, JProbe, Red Hat LINUX, Windows 2003, Puppet, subversion, XML, MS Office

PROJECTS

1)E-commerce Android applications:(Android app development,python)

- * Developed an e-commerce Android application using Android Studio, Java, and Firebase Database.
- * The application developed has 3 dashboards for Retailer, Wholesaler, and Customer respectively. Disease Analysis
- * To find the disease using Random forest,Naive Bayes and Descision Tree.
- * The process of identifying a disease, condition, or injury from its signs and symptoms. A health history, physical exam, and tests, such as blood tests, imaging tests, and biopsies, may be used to help make a diagnosis.

2)Database Design(Databases, SQL, Python)

- * Developed a database engine with terminal access to do CRUD operations on database in Java using Hex Files
- * The database supports CREATE, SELECT, DROP, UPDATE, and SHOW Tables commands.

3)Command Line Interpreter(CLI Development)

- * Developed a command line interpreter that executes user-entered commands like ls, cd, echo, etc.,
- * Developed the program in C Language using the concepts of child process, execv, and understanding of various functionalities of CLI.

CERTIFICATIONS

- * Ful Stack Web Development and AI with Python(UC-f4ceb467-a33e05-b1cb-11f3374d637e)
- * Linux Adminstration(UC-22c1adf8-46f6-44af-8173-b693b47d25ee)

EDUCATION: MASTER'S in Information Technology(MS)
