Boston, MA • +1 (603) 438-6344 • Kratijadaun@gmail.com • <http://www.linkedin.com/in/kratijadaun>

Education

Master of Sciences, Analytics (Data Analytics, Statistical modeling) Northeastern University, Boston, MA	<i>July 2023 – March 2025</i>
Course work: Communicate and Visualize Data Analysis, Data Warehousing and SQL, Decision Support & Business Intelligence, Python & Analytics Technology, Supervised Machine Learning, Algorithms, Pattern Recognition & Computer Vision, Data Management and Processing	
Diploma In Tally Prime with GST S.K Solution Computer Institute, Kasganj, India	<i>Jan 2023 – June 2023</i>
Advanced Diploma in Information Technology & System Management S.K Solution Computer Institute, Kasganj, India	<i>July 2021 – December 2022</i>
Bachelor of Tourism and Administrative Management Indira Gandhi National University, New Delhi, India	<i>July 2018 – October 2021</i>

Skills

Technical Proficiency: SQL, Python (Pandas, NumPy), Microsoft Excel (VLOOKUP), and relational databases

Business Analysis Tools: JIRA, Balsamiq, MS Visio

CRM Systems: Salesforce configuration, troubleshooting, and support

Documentation: Solution knowledge base maintenance, step-by-step user instructions

Project Management: Agile methodologies, cross-functional collaboration, requirement analysis

Communication & Documentation: Active listening, technical documentation, and stakeholder management

Professional Experience

Artificial Intelligence Engineering Intern, Radical AI, New York, NY	<i>July 2024 – November 2024</i>
• Teamed up with 5 AI developers to enhance the AI Dev Manager using GPT-4, boosting system efficiency • Conducted over 10 research experiments, boosting user satisfaction by 20% and enhancing AI performance • Engineered 15 AI models, cleaned data, and fine-tuned 7 algorithms to increase accuracy • Deployed tools like OpenAI, TensorFlow, Botpress, and Inworld.ai to create scalable AI solutions • Executed agile methods to speed up project timelines, reducing model deployment time by 30% • Optimized data pipelines to reduce processing time by 25% and enhanced AI model accuracy by 15%	
Hospitality Management Intern, Grand Excelsior, Dubai	<i>August 2019 – February 2020</i>
• Assessed over 1,000 customer feedback responses, resulting in a 15% improvement in guest satisfaction ratings • Managed with 5 teams to streamline service delivery, achieving a 20% reduction in complaint resolution time • Produced and presented 6 monthly performance reports using Excel and Tableau for strategic decision-making • Capitalized on Tableau for data visualization, identifying 3 key sales opportunities that increased revenue by 10%	

Projects

Predictive Analytics for Flight Delay	<i>July 2023 – August 2023</i>
• Predicted average delay time based on 20 factors contributing to flight delays with 92% accuracy • Forecasted flight delays with MAE of 7.5 minutes and RMSE of 9.3 minutes using an 80/20 train-test split	
Approval System: Web Application Development	<i>September 2023 – December 2023</i>
• Architected a loan approval system for banks, analyzing 150,000 applications with 95% accuracy. • Developed a web application to process loan approvals for 10,000+ customers	
Healthcare Data Analysis	<i>January 2024 – March 2024</i>
• Built an interactive Tableau dashboard highlighting a 20% rise in patient readmissions due to insufficient follow-ups • Managed 10 million records using Python and SQL on Databricks, delivering insights	

Achievements

- Recognized with multiple awards including Star of the Month and Best Team at Grand Excelsior for spearheading projects that boosted team efficiency by 20% and enhanced client satisfaction ratings by 30%

Certifications

- **Tableau for Data Scientists** - Created interactive dashboards and conducted data visualization and analysis using Tableau
- **Project Management Foundations** - Applied project management principles and agile methods for team efficiency
