

Lakshmi Maddala

SAP EWM Consultant | 623-213-0486 | suryatejam26@gmail.com

PROFESSIONAL SUMMARY

SAP EWM Consultant with 6+ years of specialized expertise delivering end-to-end EWM solutions across S/4HANA and ECC environments, spanning greenfield configuration, brownfield enhancements, and ECC-to-S/4HANA migrations. Deep functional command of inbound/outbound processing, Handling Unit Management (HUM), Warehouse Task & Order management, Wave Management, PPF, WOCR, labor management, serialization, and kit-to-order/stock workflows. Proven track record integrating EWM with MM, SD, PP, and TM modules and aligning warehouse technology with S/4HANA best practices at high-velocity automotive manufacturing environments including Lucid Motors. Skilled at translating complex business requirements into scalable EWM architecture, leading solution design workshops, and driving go-live readiness. Adept at advising clients on configuration-vs-development trade-offs, standardizing incident triage workflows, and building knowledge bases that sustain long-term operational excellence.

CORE COMPETENCIES

Full-Lifecycle EWM Implementations, EWM Solution Architecture & Design, Inbound/Outbound Processing, Handling Unit Management (HUM), Wave Management & WOCR, PPF (Post Processing Framework), Labor Management, Serialization & Batch Management, Kit-to-Order / Kit-to-Stock, Physical Inventory & Replenishment, RF Device Operations, EWM-MM/SD/PP/TM Integration, EWM Interfaces & IDoc Troubleshooting, SMQ1/SMQ2 Queue Management, SLG1 Application Logs, SU53/SU01 Authorization Analysis, ABAP Debugging, Cutover & Go-Live Support, Hypercare & Post-Go-Live Stabilization, Client Stakeholder Workshops, ServiceNow, Jira

PROFESSIONAL EXPERIENCE

SAP EWM Consultant | Lucid Motors

Nov 2025 – Present

- Serve as primary EWM subject matter expert and solution advisor for full EWM-S/4HANA integration across inbound/outbound processing, HUM, wave management, warehouse task execution, and RF device operations sustaining 99%+ system availability across 100+ daily warehouse transactions.
- Applied S/4HANA EWM best practices to architect standardized warehouse processes, advising stakeholders on configuration-vs-development trade-offs and aligning warehouse workflows with SAP-recommended design patterns.
- Led EWM configuration for warehouse task and order management, PPF framework, HUM procedures, replenishment, and serialization workflows delivering scalable solutions aligned with S/4HANA standards.
- Eliminated an entire category of recurring EWM transaction failures within 30 days through deep-dive root cause analysis across HUM, delivery processing, and warehouse order execution improving operational efficiency by 80%.
- Maintained 100% stable EWM-to-S/4HANA integration by proactively resolving SMQ1/SMQ2 queue blockages, failed IDocs, and SLG1 application log errors before impacting warehouse floor operations.
- Resolved complex authorization failures via SU53/SU01 analysis and cross-functional security team collaboration, ensuring role compliance across 100+ daily transactions.
- Built and maintained a comprehensive EWM troubleshooting knowledge base covering serialization, HUM, replenishment, PPF, and RF workflows enabling self-service resolution and reducing mean time to resolve for common incidents.

SAP EWM Consultant | Nova Web Technologies

Jan 2023 – Oct 2025

- Delivered end-to-end SAP EWM consulting across MM, PP, and IM modules, resolving 25+ tickets per week and reducing system downtime by 15% to sustain uninterrupted warehouse and production floor operations.
- Configured and supported EWM inbound/outbound processes, replenishment, WOCR, and line-side supply workflows in an S/4HANA environment, reducing manufacturing line stoppages by 10% and ensuring continuous supply continuity.

- Conducted ERP assessments and system improvement initiatives, translating operational pain points into targeted EWM configuration changes aligned with S/4HANA warehouse management best practices.
- Resolved 20+ critical EWM production issues monthly including warehouse task failures, HUM discrepancies, and IDoc processing errors achieving 90%+ system uptime through rapid corrective action and cross-functional coordination.
- Collaborated with security teams to maintain SAP access compliance and audit readiness, including EWM role assignments and authorization object reviews in support of Neptune audit standards.
- Authored detailed root cause analysis reports with error code documentation and corrective actions, enabling trend analysis and driving continuous improvement across the EWM landscape.

SAP EWM Analyst | Loyalty Methods

Apr 2019 – Jul 2022

- Resolved RF device scanning failures, warehouse task execution errors, and system disruptions in live EWM production environments improving overall operational efficiency by 90% and significantly reducing warehouse downtime.
- Partnered with logistics, distribution, and manufacturing teams to identify operational pain points and translate business requirements into targeted EWM system enhancements and configuration updates.
- Coordinated with Enterprise Systems teams to evaluate, prioritize, and implement EWM change requests, ensuring alignment with supply chain business models and warehouse/distribution process standards.
- Designed and delivered comprehensive SAP EWM training for 50+ warehouse users on inbound/outbound workflows, HUM procedures, and RF device operations improving system adoption, accuracy, and floor-level efficiency.
- Maintained shift-based EWM support coverage with documented procedures for recurring incident resolution and long-term preventive solutions, ensuring consistent system availability throughout all production hours.

TECHNICAL SKILLS

EWM Functional: Inbound/Outbound Processing, HUM, Wave Management, PPF, WOCR, Warehouse Tasks & Orders, Labor Management, Serialization & Batch, Kit-to-Order/Stock, Physical Inventory, Replenishment, RF Devices

EWM Architecture: Greenfield Implementation, Brownfield Enhancement, ECC→S/4HANA Migration, Solution Design, Configuration vs. Development Advisory, Go-Live & Cutover Planning, Hypercare Support

SAP Integration: MM, SD, PP, TM Integration; EWM Interfaces; IDoc Troubleshooting; SMQ1/SMQ2 Queue Management; SLG1 Application Logs; SU53/SU01 Authorization Analysis

Platforms: SAP EWM (S/4HANA & ECC), SAP WM, SAP S/4HANA, SAP ECC, SAP ERP

Development & Diagnostics: ABAP Debugging, SQL, Java, ETL Pipelines

Data & Analytics: Tableau, Snowflake, Amazon Redshift

Operations & Tooling: Incident Management, Root Cause Analysis, ERP Assessments, Change Management, User Training, ServiceNow, Jira

EDUCATION

Master of Science, Information Technology | Kennesaw State University

Aug 2022 - Dec 2023

Bachelor of Technology, Information Technology | Aditya Engineering College

Jun 2015 - Apr 2019
