

LAKSHMI PRIYANKA PENCHIKALA	
Maryland lakshmipriyankapenchikala@gmail.com +1(443) 858 -7123 LinkedIn GitHub	
Profile	
Accomplished Full Stack Java Developer with 2.5 years of experience in developing and maintaining high-performance web applications using Java, Spring Boot, and React. Proven expertise in fraud detection, data analysis, and cloud technologies (AWS, Hadoop). Strong skills in API development, machine learning, and data visualization. Demonstrated ability to enhance system efficiency, boost user engagement, and drive strategic growth. Proficient in various development tools and methodologies.	
Technical Skills	
Programming Languages: C, C++, Java, Python, R, Node JS Data Bases: SQL, NoSQL, MongoDB Web Components: HTML, CSS, JavaScript, Bootstrap, Thymeleaf, React JS Cloud Technologies: ServiceNow, AWS S3, AWS GLUE, AWS RedShift, Data Bricks, Hadoop, Kafka, Hive Development Tools: Eclipse (IDE), GIT (Version Control), VS Code, PyCharm, Android Studio Operating Systems: Windows, Mac, Ubuntu, and Linux Environment. Design & Development Methodologies: Object-Oriented Design/Development, Design Patterns, UML Syntax, UI/ UX design. Other Skills: Data Structure and Algorithms, Predictive Models, Forecasting, Key Performance Indicators, Statistics, Spring MVC, Spring Boot, Hibernate, Power BI, Postman, REST API, Big Data, Applied Machine Learning, Building Data Pipelines, Tableau, Tensor Flow	
Work Experience	
Morgan Stanley, Remote, USA Full Stack Developer	Oct 2023 – Feb 2024
- Designed an enterprise-level microservices architecture, reducing deployment time and enhancing system scalability. - Integrated the Spring Boot framework into a legacy system, decreasing system downtime and increasing client satisfaction. - Automated unit and integration tests using JUnit and Mockito, achieving high code coverage and lowering bug rates. - Collaborated with front-end developers to optimize APIs, resulting in improved application performance and increased user retention. - Contributed to migrate a monolithic application to a microservices architecture, improving deployment efficiency. - Implemented new features according to client specifications, leading to a 10% increase in customer satisfaction scores. - Utilized Git for version control to enhance project management and collaboration, boosting team efficiency by 15%. - Developed responsive and user-friendly front-end interfaces using modern JavaScript frameworks like React and Angular, ensuring cross-browser compatibility and optimal performance. - Implemented continuous integration and deployment (CI/CD) pipelines using tools such as Jenkins or GitLab CI/CD, automating build, test, and deployment processes to streamline development workflows. - Optimized database queries and data access layers using ORM frameworks like Hibernate or Sequelize, improving database performance and data retrieval efficiency.	
Cognizant Technology Services, India Full Stack Java developer	Jun 2020 – Jul 2022
- Developed and maintained cutting-edge web applications using Java, Spring Boot, React, and Node.js, contributing to a 20% increase in monthly active users and a 15% boost in revenue for a major credit card company. - Engineered a real-time system to automatically detect and alert on suspicious activities like fraudulent transactions and multiple simultaneous logins, enhancing fraud detection efficiency and security response capabilities. - Spearheaded API testing initiatives using Postman to identify and mitigate critical vulnerabilities, resulting in a 25% improvement in API response time and overall system performance for financial software solutions. - Implemented user authentication and authorization mechanisms using OAuth and JWT tokens, ensuring secure access control and data protection for sensitive information. - Integrated third-party services and APIs, such as payment gateways and analytics platforms, to enhance application functionality and provide additional features to users. - Performed performance tuning and monitoring using tools like JProfiler and New Relic, identifying and resolving bottlenecks to optimize application performance and scalability. - Contributed to the design and implementation of microservices architecture, breaking down monolithic applications into smaller, independent services for improved flexibility and maintainability. - Generated responsive and mobile-friendly front-end interfaces using Bootstrap, CSS3, and JavaScript frameworks, ensuring a consistent user experience across different devices and screen sizes.	
Cognizant Technology Solutions, India Program Analyst Trainee	Jan 2020 – May 2020
- Attained formal certification in ServiceNow Application Development and System Administration, specializing in developing and optimizing applications using these technologies. - Applied ServiceNow scripting and Java expertise to spearhead the development of the Local Bus Tracking application, revolutionizing real-time bus monitoring capabilities and enhancing operational efficiency for a metropolitan transit authority. - Implemented pivotal features including dynamic input fields for bus driver ID and tracking ID, facilitating live driver identification through integrated photo, video streaming, and GPS-based bus tracking functionalities. Collaborated with stakeholders to gather requirements and translate them into actionable project plans and technical specifications. - Conducted user acceptance testing (UAT) and gathered feedback to iterate and enhance application functionalities and user experience. - Assisted in the maintenance and support of existing applications, troubleshooting issues, and implementing timely resolutions to ensure uninterrupted service. - Prepared documentation including user guides and technical manuals to facilitate seamless application adoption and knowledge transfer.	
Academic Projects	
Anonymous Grading System Android Studio, Java, XML - Implemented user authentication, class roster management, and barcode generation and scanning features. - Integrated AWS Amplify: Added secure user registration and login with Cognito, and used GraphQL APIs with Datastore for backend data management. - Designed intuitive UI/UX: Created login, class management, exam creation, and barcode scanning screens, enhancing user experience and operational efficiency.	
Library Management System Spring Boot, Spring Data JPA, H2 Database, Thymeleaf, Bootstrap4. - Engineered a comprehensive library management application using Spring Boot, Spring Data JPA, and H2 Database, focusing on scalability and efficiency. - Assessed the installation of unique login gateways for administrators and users on the platform; administrators enabled to effectively manage books, authors, and publishers, leading to streamlined operations and increased productivity levels. - Conceptualized Thymeleaf and Bootstrap4 to design a user-friendly interface, allowing users to easily navigate, search, and purchase books, significantly improving user engagement and satisfaction.	
Aid Data Analysis Python, Tableau, jQuery, HTML, CSS, bootstrap, Java Script. - Led the analysis of global financial aid transactions from 1991 to 2010, using Python and Tableau to uncover and visualize key trends and correlations in donations by country and purpose. - Developed a web-based platform to present financial aid data, using technologies such as HTML, CSS, Bootstrap, JavaScript, and jQuery, enhancing accessibility and user engagement. - Revised the implementation of a comprehensive data validation system to ensure accuracy in financial aid analysis, leading to reliable insights that informed critical decisions in international aid distribution.	
Publications	
Published a paper on Automatic Recognition of Medicinal Plants in the Virtual National Conference on Computational Intelligence and Data science (NCCIDS 2020) https://link.springer.com/chapter/10.1007/978-981-15-7511-2_69	
Education	
University Of Maryland, Baltimore County, Maryland, US	May 2024
M.S in Computer Science GPA- 3.27	
Relevant Courses: Design and Analysis of Algorithms, Data Visualizations, Machine Learning, Computer Security, Advanced Computer Architecture.	
Sathyabama Institute of Science and Technology, Tamil Nadu, India	Apr 2020
Graduated with a Bachelor of Technology in Computer Science and Engineering GPA- 3.55	
Relevant Courses: Probability and Statistics, Object Oriented Programing, Data Mining and Warehousing, Cloud Computing & IOT, Big Data Analytics, Compiler Design, Computer Networks.
