Professional summary

Java Developer with 2 years of experience in developing and optimizing Java applications, skilled in Java Fullstack, Spring Framework, and HTML. Demonstrates a visionary approach by integrating emerging technologies and spearheading microservices transformations to align with business objectives. Passionate about enhancing system performance through innovative solutions and mentoring junior developers.

Employment history

Java Developer

tekgence.inc, Hyderabad,INDIA — May 2021 - Jan 2022

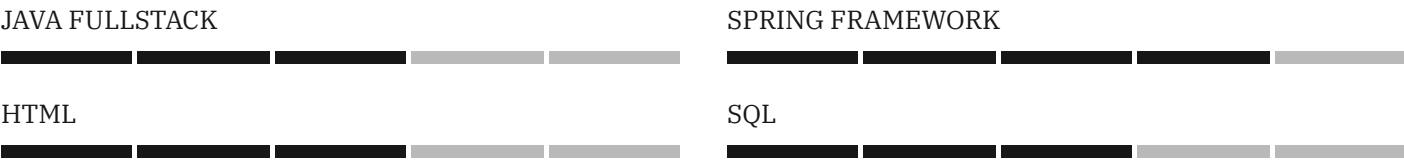

- Developed and optimized Java applications, implemented microservices architecture, and enhanced system performance through efficient code refactoring
- Led cross-functional development teams, delivered robust Java solutions, and streamlined deployment processes to reduce system downtime
- Engineered scalable Java solutions, integrated emerging technologies, and implemented automated testing frameworks to improve code quality
- Maintained code standards, conducted thorough code reviews, and documented technical specifications for enhanced team collaboration
- Partnered with stakeholders to gather requirements, resolve technical challenges, and deliver Java solutions aligned with business objectives
- Spearheaded Java microservices transformation, orchestrating system upgrades and performance optimizations while mentoring junior developers
- Developed strong analytical skills while implementing data-driven solutions, demonstrating commitment to continuous learning and process improvement
- Led cross-functional initiatives with proven track record of meeting deadlines, adapting to challenges, and delivering measurable outcomes
- Built effective partnerships across departments, fostering open communication and contributing to team success through active knowledge sharing
- Identified process bottlenecks and implemented creative solutions, showing strong problem-solving abilities and initiative in resource optimization
- Maintained high accuracy standards while managing multiple priorities, demonstrating exceptional organizational skills and attention to detail
- Streamlined operational workflows by introducing automated solutions, enhancing efficiency and reducing manual processing time

JAVA INTERN

TEKGENCE.INC, HYDERABAD,INDIA — Jun 2020 - Dec 2020

- Participated in agile development cycles, contributed to daily stand-ups, and assisted in debugging complex Java applications
- Maintained clean, documented code while learning industry best practices and design patterns in enterprise Java development
- Created modular, reusable components for web applications while adapting to new technologies and development methodologies
- Implemented Java-based solutions within agile sprints, optimising application performance through systematic debugging and code review processes
- Engineered modular components for enterprise web applications while adhering to clean code principles and industry documentation standards
- Integrated seamlessly with development teams through active participation in daily stand-ups and sprint planning sessions

Skills

Education

MASTERS IN BUSSINESS ANALYTICS GPA :3.3

Anderson University, Anderson,SOUTH CAROLINA ,USA — May 2023 - Dec 2024

- Related Courses: Data Analytics with SAS Base, Data Management and Modeling, Enterprise Data Management, Data Warehouse & Business Intelligence, BI Data Viz & Storytelling, Data Mining to Business Insights, Data Analytics & Credit Risk
- A Master of Science in Business Analytics (MSBA) is an interdisciplinary STEM graduate professional degree that blends concepts from data science, computer science, statistics, business intelligence, and information theory geared towards commercial applications
- This program blends statistics, computer science, and business strategy to **analyze complex data sets and extract valuable insights**. Graduates of this program are skilled at interpreting data trends, making informed decisions, and implementing strategies that drive organizational success.
- skills to analyze large datasets, extract valuable insights from complex data, and use those insights to inform strategic business decisions, typically involving a blend of statistics, computer science, and business strategy to solve real-world problems across various industries like finance, marketing, and operations

BACHELORS IN COMPUTER SCIENCE

PRIST UNIVERSITY, VALLAM,TN,INDIA — Jun 2017 - May 2021

GPA:7.6

PROJECTS:

CREATOR:

- Built a native mobile app for android and ios that allows a host to invite party attendees which reduced time for 45 minutes an average.
- Started with an mobile app for android and then learned swift to port into ios.
- Utilized the spotify api and build an interactive voting function
- Using swift,java,SQL,HTML,/CSS in creationand maintenance ,implementing user feedback

Languages

ENGLISH,TELUGU,HINDI

Hobbies

PLAYING CRICKET,FLYING CESSNA 172 PLANE,UPDATING MYSELF TO CURRENT TREND
