

Mahender Naik Meravath
Full Stack Developer
(469)-848-6594, mahendermeravath013@gmail.com, [LinkedIn](#)

Professional Summary:

- Having 6 years of professional experience in developing **User Interface (UI)** applications using cutting - edge **Front-end Technologies**.
- Experience in web application development for developing Single Page Applications (SPA) **JavaScript, React.JS, Type Script, Bootstrap, jQuery, JSON, XML, AJAX**.
- Experience in working with **Angular12/14, Angular2/4** modules, services, templates, directives, services, and dependency injection to create a SPA.
- Hands on Experience on **Angular CLI** (Command line Interface).
- Implemented component **lifecycle management** in React, leveraging **store actions** and integrating **Socket.IO** for handling real-time data within a **React-Redux** application
- Proficient in **ReactJS** for building and managing dynamic front-end components, with a strong focus on responsive design and seamless user experience.
- Extensive experience with **TypeScript** to ensure type safety and maintainable code in complex applications.
- Skilled in **integrating front-end applications** with **Java Spring Boot** backends for **robust, scalable** solutions.
- **Experienced in React.js** for building interactive user interfaces utilizing one-way data flow, reusable components, forms, events, keys, animations, Virtual DOM, JSX.
- Adept at translating **UX mockups** into **pixel-perfect UI components**, ensuring a seamless, responsive, and interactive user experience across different devices and screen sizes.
- Developed **scalable APIs using Node.js and GraphQL**, providing efficient data fetching and flexible query capabilities, optimizing the user experience with minimal data load.
- Expertise creating user validation forms and sending data to server using **RESTful** services.
- Experience in **Unit Testing (UIT), Integration Testing** and in preparing test cases.
- Experience in using **jQuery, JSON, AJAX, and DOM** scripting to create interactive web Applications.
- Expertise in Video Coding by using **HTML5, CSS3 and java Script**.
- Integrated **MongoDB with front-end applications** to efficiently fetch and display data, utilizing MongoDB queries and ensuring optimal data binding in UI components.
- Utilized **Jasmine, Jest, Karma, Grunt, and NPM** to automate build processes, write unit and integration tests, and ensure high-quality, maintainable code for web applications.
- **Integrated React.js applications with AWS services** (such as EC2, S3, and Lambda) to enable scalable, secure, and high-performance solutions, ensuring efficient cloud-based deployment and real-time data handling.
- Proficient and specializing in full-stack development with expertise in **.NET, C#, JavaScript**, and React.js, and a strong focus on building scalable SaaS applications.
- Skilled in **AWS and Azure cloud platforms**, Microservices architecture, and RESTful API development, with advanced expertise in **SQL Server optimization and CI/CD pipelines**.
- Passionate about Agile methodologies, **TDD**, and code refactoring, with a proven track record of mentoring teams and delivering high-quality, maintainable software solutions
- Experienced **Application Developer** with expertise in building and deploying scalable applications using **Spring Boot, AWS, and Kafka**.
- Skilled in leveraging **DevOps pipelines** for efficient CI/CD workflows and working in **Agile Scrum** environments.

- Implemented server-side rendering and integrated front-end solutions with **Microservices** and APIs using **Node.js**.
- Utilized **Git, Bitbucket for version control** to manage codebase, collaborate with team members, and maintain seamless integration of React.js features, ensuring efficient workflows and minimizing conflicts during development.
- Experienced in automating build processes using **Jenkins and Maven**, streamlining continuous integration and deployment workflows.

Qualification:

Bachelor's in Information Technology
2019
 Guru Nanak University

May -

Technical Skills:

Frontend Technologies:	React.js, Angular (12/14/16), TypeScript, Vue.js, JavaScript, HTML5, CSS3, C#, .NET, Bootstrap, SASS
State Management:	Flux, Redux
Back-End/Full-Stack:	Node.js, Express, MongoDB, RESTful APIs, GraphQL
Cloud/DevOps:	AWS (EC2, S3, Lambda), Jenkins, Webpack
Mobile Development:	React Native, Flutter
Version Controls:	GIT, Bitbucket
Testing:	Jest, Jasmine, Enzyme
Soft Skills:	Team Collaboration, Problem-Solving, Communication, Agile Methodologies

Professional Experience:

Client: 7-Eleven –Irving, TX
Present
Job Title: UI/React Developer

Jul 2023 –

Responsibilities:

- Involved in complete **SDLC** lifecycle including **Requirement analysis, Development, System, and Integration Testing.**
- Involved in designing web pages using **HTML5, CSS3, JavaScript, Bootstrap, React.js, Redux, Flex, MongoDB.**
- Implemented various screens for the **front end** using React.js and used various predefined components from **NPM** (Node Package Manager) and **redux** library
- Worked on React JS virtual **Dom** and **React views**, rendering using components which contains additional components called custom **HTML tags.**

- Developed and maintained scalable, user-centric applications using **React JS** and **Next JS**.
- Responsible to Style, look and feel of the web page with **SASS** that extends **CSS** with dynamic behavior such as variable, mixing, operations and functions.
- Implemented **stable React components** and stand-alone functions to be added to any future pages.
- Used **React-Autocomplete** for creating google map's location search on the webpage.
- Configured **Webpack** to execute **linters, magnifiers, pre/post-processors, tests**, transpilers based on build target.
- Proficient in **Flutter for cross-platform mobile app development**, leveraging widgets, state management (e.g., Provider, Riverpod), and RESTful APIs to build scalable and responsive applications.
- Experienced in implementing **Flux architecture for state management**, ensuring predictable and maintainable code in complex applications.
- Developed ETL workflows using **AWS Glue**, ensuring efficient data transformation and integration.
- Developed and maintained scalable SaaS applications using **.NET, C#, JavaScript, and React.js**, ensuring high performance and seamless user experiences across platforms.
- Leveraged **AWS (EC2, S3, Lambda) and Azure** for cloud-based application deployment, scaling, and management, optimizing performance and ensuring high availability.
- Designed and **implemented RESTful APIs** and Microservices architecture using **.NET Core and Node.js**, enabling efficient communication between front-end and back-end systems.
- Designed **CSS templates** for use in all pages on the website working with **CSS Background, positioning, text, border, margin, padding, and table**
- Worked with backend engineers to optimize existing **API calls** to create efficiencies by **deprecating** unneeded **API** calls.
- Implemented server-side rendering and integrated front-end solutions with **Microservices** and APIs using **Node.js**.
- Called the Restful Webservice calls like **POST, PUT, DELETE and GET** methods.
- Worked on AWS to fetch image files from **AWS S3** bucket to UI.
- Extensively used **GIT** for version controlling and regularly push the code to **GIT**.

Environment: React.js, Redux, JavaScript, HTML5, CSS3, Node.js, MongoDB, AWS, Webpack, Jenkins, Git, Agile, Jira.

Client: ULINE – Pleasant Prairie, Wisconsin.
2023

Sep 2022- May

Job Title: Frontend Developer

Responsibilities:

- Designed and implemented dynamic **Single Page Applications (SPAs)** using **React**, enhancing user interactivity and optimizing performance with **React hooks** and component-based architecture.
- Developed scalable and modular **web applications with React**, ensuring maintainability and ease of updates across large codebases.

- Developed dynamic, responsive web applications using **ReactJS, TypeScript, Redux,** and **Material UI**, ensuring accessibility and modern UI/UX principles.
- Implemented dynamic data binding and optimized **DOM** manipulation using React state, **props, and hooks**, improving application performance and user experience.
- Ensure cross-browser compatibility for **React applications**, guaranteeing consistent functionality and appearance across various web browsers.
- Integrated **RESTful APIs** with React using **Axios** or **Fetch** for seamless data communication between the frontend and backend services.
- Leveraged **TypeScript** in React applications to enhance code readability, maintainability, and type safety for complex applications.
- Integrated state management using **Redux** for efficient data flow and centralized state control across components in complex React applications.
- Proficient in **JavaScript, HTML5, CSS3,** and **Bootstrap**, building robust, responsive, and visually appealing front-end applications.
- Optimized **SQL Server databases**, improving query performance and ensuring efficient data handling and storage for large-scale applications.
- Implemented **CI/CD pipelines using Jenkins, Azure DevOps,** and **GitHub**, streamlining software delivery processes and ensuring rapid, reliable deployments.
- Worked on containerizing applications using **Kubernetes, OpenShift, and EKS** to ensure seamless scaling and high availability.
- Developed scalable APIs using **Node.js and GraphQL** for optimized, flexible data fetching with minimal server load and efficient communication.
- Managed version control using **Git** for efficient codebase management and team collaboration in a distributed development environment.
- Deployed applications on **AWS (EC2, S3)**, optimizing performance and scalability in cloud environments.
- Configured and maintained **CI/CD pipelines using Jenkins**, automating deployment processes to ensure smooth and efficient integration.

Environment: React, Redux, TypeScript, JavaScript, HTML5, CSS3, Node.js, GraphQL, AWS, Webpack, Jenkins, Git, Jest, React Testing Library, Agile, Jira.

Client: Innovative Solutions, India
Job Title: UI/Angular Developer

Sep 2020 – Apr 2022

Responsibilities:

- Developed backend logic using the **Express framework in Node.js** to retrieve data from **MongoDB** and dynamically bind the response data to the front-end using **Angular 12/14**.
- Developed **responsive and modular web UIs** using **SASS** for maintainable and scalable CSS, enabling efficient styling management, and **Bootstrap** for mobile-first, grid-based layouts, ensuring a seamless user experience across devices and screen sizes
- Utilized **RESTful** web services to efficiently transmit large blocks of **JSON** data, ensuring smooth data exchange and scalability in web applications.
- Led the development of **Single-Page Applications (SPAs) using Angular**, ensuring a fast, responsive, and intuitive user experience through efficient component design and state management.

- Leveraged **Webpack** for **JavaScript optimization**, including **uglify** to minimize file sizes and **SASS compilation** into CSS for better performance, while utilizing **Grunt** for efficient **build automation** and **task management**, streamlining the development workflow and improving deployment efficiency
- Implemented template-driven form validation using **Angular 12/14**, ensuring robust and user-friendly forms.
- Worked on containerizing applications using Kubernetes, **OpenShift**, and **EKS** to ensure seamless scaling and high availability.
- Monitored and logged **front-end application** performance, ensuring seamless user experiences and proactive issue resolution.
- Strong Experience with **client-to-server data flow**, leveraging full stack knowledge to create reliable, scalable applications.
- Worked with cross-functional **Agile** teams to deliver multiple sprints on schedule, consistently **achieving 95% of sprint** goals.
- Developed **reusable Angular 14 Pipes** to filter and display vendor lists efficiently, improving UI performance.
- Utilized **Webpack** as a module bundler to preprocess and minify **TypeScript and SASS** files, optimizing build times and application performance.
- Worked on migrating legacy systems to cloud platforms (**AWS**), **utilizing tools like EC2, S3, and Lambda** for enhanced performance optimization.

Environment: Node.js, Express, MongoDB, Angular 12/13/14, SASS, Bootstrap, REST web service, AJAX, JSON, Webpack, Jasmine, Jenkins, Agile, Kanban, GIT, AWS

Client: Smart Squad Solutions, India
2020

May 2019 – Aug

Job Title: Software Developer

Responsibilities:

- Implemented complex **AngularJS** directives, services, and modules to enhance functionality and maintainability.
- Utilized two-way data binding, dependency injection, and **MVVM** architecture to build robust and scalable applications.
- Collaborated with backend developers to integrate **RESTful APIs** with **AngularJS** applications.
- Utilized Webpack's proxy feature in **Webpack Dev Server** to seamlessly integrate front-end and back-end APIs during development
- Developed each page of web application as **single page application (SPA)** with its own **store and state**.
- Developed various screens for the front-end using **AngularJS** and used various predefined **components** from **NPM (Node Package Manager)** and **redux libraries**.
- Implemented the **Drag and Drop** functionality using **DragDropModule** as part of the **Angular CDK (Component Dev Kit)**
- Involved in writing application-level code to interact with APIs, Web Services using **AJAX, JSON and XML**.

- Developed ETL workflows using **AWS Glue**, ensuring efficient data transformation and integration.
- Integrated **DevOps pipelines** with Jenkins and Docker to streamline software delivery processes.
- Optimized relational database queries for improved application performance and reliability.
- Communicated with **NoSQL** databases (e.g., **MongoDB**) through **RESTful APIs** in Angular, handling asynchronous data streams with RxJS and ensuring optimal data handling and display.

Environment: AngularJS, HTML5, CSS, AJAX, JavaScript, jQuery, GIT, Webpack, Restful, JSON, NPM, MongoDB, JIRA, Agile.
