PROFESSIONAL SUMMARY

Result-oriented professional with 4 years of experience in designing data pipelines, ETL workflows, and analytics dashboards across finance, healthcare, and technology domains. Proficient in Python, SQL, Airflow, and Snowflake, with expertise in automating reporting processes, improving data accuracy by 99%, and accelerating strategic planning through advanced visualization tools such as Tableau and Power BI. Proven success in managing large-scale datasets, predictive modeling, and cloud data solutions.

EXPERIENCE

Data Analyst: Juniper Networks

Feb 2025 – Present

- Streamlined SQL pipelines and Tableau dashboards, leading to a 35% reduction in reporting cycles and enabling finance and sales teams to access insights faster
- Conducted predictive analysis on customer support tickets using Python (Pandas, NumPy, Scikit-learn), identifying patterns, contributing to a 20% improvement in ticket resolution speed
- Implemented data quality validation frameworks with Apache Airflow and Python scripts, maintaining 99% accuracy for daily ETL loads within departments and systems
- Created automated Excel and Power Query templates for monthly financial reporting, accelerating manual data preparation time by 30% across recurring reports
- Designed interactive dashboards tracking operational and financial metrics, integrating data from SQL Server, Oracle, and cloud databases for cross-functional reporting
- Collaborated with data engineers to optimize Snowflake queries, lowering average query runtime for datasets exceeding 2.5 million records and complex aggregations

Data Engineer: Datamatics

Jul 2021 – Nov 2022

- Designed ETL workflows using Apache Airflow and AWS Glue, processing approximately 10M daily records within healthcare and financial datasets with accuracy
- Created data models and star schemas for analytics, accelerating reporting on credit risk, claims, and customer churn, contributing to a 35% acceleration in query runtime for large datasets
- Developed real-time streaming pipelines with Apache Kafka and Spark, handling 1.5M+ transactions per hour with sub-second processing latency and data consistency
- Executed AWS data migration from SQL Server to Snowflake, optimized ETL pipelines with Airflow and Glue, and processed streaming data using Kafka and Spark
- Managed version control and deployment of data pipelines using Git and Jenkins, supporting 10+ production updates per month without service disruption
- Constructed data validation scripts in Python, leading to a 22% decrease in SLA breaches and maintaining compliance with internal data governance policies

Data Analyst – Associate: 3i Infotech

Jul 2020 – Jun 2021

- Formulated Power BI and Tableau dashboards for financial and operations teams, enhancing management visibility into revenue, expenses, and KPIs, impacting 5+ departments and metrics
- Crafted and optimized SQL queries for ad-hoc reporting, shortening manual reporting time by 42% across reports for finance and operations teams
- Conducted cohort analysis on customer records using Python, identifying retention trends, achieving a 27% increase in actionable insights for marketing campaigns
- Executed data pipelines using Apache Airflow, processing daily records for transactional and operational datasets with a 99% successful job completion rate
- Engineered Excel-based automated templates with Power Query, reducing the monthly reporting cycle duration and enabling recurring reports

SKILLS

• Python	• Hadoop	• Google BigQuery	• Informatica
• SQL	• Snowflake	• Teradata	• Azure Data Factory
• R	• MongoDB	• Apache NiFi	• Prometheus/Grafana
• Shell Scripting	• Tableau	• Pub/Sub	• Apache Flink
• ETL Process	• Power BI	• Star Schema	• Kubernetes
• Data Pipelines	• AWS	• REST APIs	• Git
• Apache Airflow	• Azure	• Unit Testing	• CloudWatch
• Spark	• GCP	• Docker	• JIRA
• Kafka	• Amazon Redshift	• Hive	• Confluence

PROJECTS

Enterprise Sales Forecasting & Analytics Platform | Python, Scikit-Learn, Tableau Apr 2025 – Present

- Fine-tuned 3 regression models in Python (Scikit-learn) for predicting weekly sales, achieving 92% forecast accuracy and improved decision alignment
- Cleaned 5M+ sales records from Snowflake using SQL and Pandas, resolving inconsistencies within regional datasets, driving a 20% enhancement in data reliability
- Orchestrated weekly data pipelines with Airflow, reducing manual refresh efforts by 40% and ensuring updated forecasts for executive dashboards

Data Warehouse & ETL | Airflow, Snowflake, Power BI Sep 2021 – May 2022

- Developed 6 Power BI dashboards and visualized claims trends, fraud detection, and KPIs, enhancing management insight and strategic planning across healthcare and financial operations
- Implemented Change Data Capture (CDC) for near real-time updates on 2M+ daily transactions, reducing data latency and improving timeliness of operational and compliance reports

EDUCATION

Belhaven University Dec 2022 – Dec 2024

Master of Science in Information Systems, GPA: 3.78

Chaudhary Charan Singh University Jul 2017 – Jun 2020

Bachelor of Science in Computer Science, CGPA: 8.6
