

MANU PRIYA

Boston, MA | manupriya.f@northeastern.edu | 617-866-2242 | [LinkedIn](#)

OBJECTIVE

Results-oriented Data Analyst five years of experience with a proven track record of leveraging data to drive strategic business decisions. Proficient in Python, SQL and BI tools, with a strong focus on automation, seamless data integration, and process optimization.

EDUCATION

Northeastern University | GPA-3.9

Master of Science in Health Informatics

Courses: Advanced Database System, Applied Machine Learning in Python, Data Visualization, Project Management

Boston, Massachusetts

May 2026

Delhi Pharmaceutical Science and Research University | GPA-3.6

Master of Pharmacy (Cosmeceuticals)

Courses: Drug Development, Product Management, Clinical Trail

New Delhi, India

May 2019

PROFESSIONAL EXPERIENCE

Charles River Community Health

Project Manager

- Led **cross -functional** collaborations to optimize workflows and resource allocation for healthcare provider
- Developed strategic project plans to improve efficiency and communication within and between teams
- Created visual project roadmaps using **Canva, MS Visio, PowerPoint** to enhance stakeholder communication

Boston, Massachusetts

Jan 2025 - Present

RIRCM

Data Analyst

- Redesigned claims transaction mapping by integrating Excel **VLOOKUP, pivot tables** and **macros** reducing manual data entry by **20%**, ensuring accurate billing for Medicare and Medicaid
- Streamlined data validation workflows by **cross-functional collaboration** across billings, compliance and operations teams reducing processing claims delays by **15%** and improving reimbursement efficiency.
- Architected dashboards to track claim denial trends and engagement metrics, empowering revenue cycle teams to target Key issues and improve payment accuracy by **10%**
- Modernized **SQL Server database** with automated data validation checks, reducing reporting discrepancies by **30%** and safeguarding critical healthcare metrics for audits and stakeholder reporting

Gurugram, India

Feb 2020 - July 2024

Delhi Pharmaceutical Science and Research University

Research Mentor

- Delivered lectures on healthcare analytics by guiding students through performing **EDA** on healthcare datasets, which enabled **model deployment** for targeted marketing strategies and recovered over **\$9K** in potential losses
- Composed **Tableau** dashboards visualizing **KPIs** such as sales performance, growth trends, and net profit. These dashboards replaced fragmented **MS Excel** reports, providing actionable insights to stakeholders and reducing their decision-making time by over **20%**

New Delhi, India

Jan 2019 -Apr 2019

ACADEMIC PROJECTS

Smart Library Analytics – SQL-Driven Insights for User Engagement and Inventory Optimization

Jan 2025 - Apr 2025

- Analyzed library user and book transaction data using advanced SQL queries to identify overdue trends and high-demand titles
- Optimized book lending and return workflows through a relational **SQL database system**, resulting in a **30% reduction** in average checkout time and a **20% increase** in on-time returns, enhancing overall user satisfaction

Maternal Health Insights - Data Analytics and Visualization in Healthcare Equity

Sep 2024 – Dec 2024

- Engineered a **Power BI and R** dashboard integrating maternal health data from clinical, demographic, and socio-economic sources to identify key intervention areas like Disparities in care, contributing to a **15%** improvement in healthcare outreach effectiveness
- Analyzed revenue of maternal health and profits to refine performance assessment, leading to a **20%** reduction in decision-making
- Utilized regional health datasets to uncover disparities and inform targeted strategies and drive a **10%** increase in prenatal outreach

Medical Claims Analytics – Revenue Cycle Optimization

Feb 2023 - July 2024

- Developed a **Tableau** dashboard and **ETL** for data cleaning to monitor claims performance, with **key performance indicators** including claim approval rate (**95%**), the average processing time (**3 days**), and patient lifetime value (**\$2,500**).
- Utilized a combination of **structured** and **unstructured** data to uncover denial risk trends such as delayed claim resolution in the Southeast region (**8%** of total claims) and **15%** increase in approved claims from **2023 to 2024**

CERTIFICATIONS

- Nominated for the **Gold Medal Award** at Pacific University for excellence in academics, outstanding contribution to university
- Developed a tech-driven solution at **MIT Hackathon 2025** (Heart Health Track) to combat late cardiac diagnosis and emergency care delays in underserved communities.

SKILLS

Programming:	Python (Pandas, NumPy, Seaborn, Matplotlib, Plotly), VBA
Framework and Databases:	MySQL, PostgreSQL and MS SQL Server, Azure Data Studio, AWS
Data Visualization Tools:	Tableau, Power BI, Microsoft Excel, Google Sheets, Looker
Healthcare Expertise:	HIPPA, ICD-10, CPT, HCPCS, EHR, HEDIS, EMR, Medical
coding Project Management:	JIRA, MS Project, Agile, Scrum, Scheduling, Risk Management
