

Marlo Harrington

Nottingham, MD 21236 | 443-848-0914 | maharrington99@gmail.com

Summary:

Results-driven IT professional with extensive consulting experience in delivering innovative technology solutions to optimize business processes. Proven expertise in project management, systems integration, and stakeholder collaboration. Adept at managing cross-functional teams, mitigating risks, and driving digital transformation initiatives to achieve measurable results.

Education:

Bachelor of Science in Information Technology

Towson University, Towson MD

08/2019 – 12/2022

Experience:

Business Analyst – Accenture

Philadelphia, PA

02/2022 – Present

- Support the Program Manager with end-to-end project management tasks, ensuring adherence to client-specific methodologies and best practices while utilizing Microsoft Project, Smartsheets, and Azure DevOps.
- Manage project schedules and milestones, updating trackers in Excel, Smartsheets, and Microsoft Project to reflect real-time status and progress.
- Identify and resolve technical issues and project risks, leveraging tracking tools such as Azure DevOps and Salesforce to mitigate potential impacts.
- Facilitate team meetings by preparing agendas, leading discussions, and maintaining detailed meeting minutes with Microsoft Word and Smartsheets to drive project clarity and accountability.
- Coordinate workshops and logistics to ensure seamless execution and productive outcomes using Microsoft Teams, Excel, and Smartsheets.
- Develop Excel trackers to streamline deliverables across workstreams, enhancing efficiency and ensuring timely implementation.
- Direct business scenario mapping to align IT requirements across project phases, ensuring successful integration with SAP and Salesforce.
- Support service delivery and product teams by managing resources, budgets, and project timelines in Microsoft Project and SAP to meet client objectives.
- Develop and implement demand management processes to optimize project pipeline workflows using Azure DevOps, Jira, and Power BI.
- Create project plans and schedules in Microsoft Project, Smartsheets, and Excel, ensuring timely delivery of key milestones.
- Facilitate governance reporting and stakeholder communication through Power BI and Microsoft Access, aligning objectives and progress updates.
- Work directly with stakeholders to define project scope, complete requirements, and secure approval for deliverables.

- Author business process design documents and models in Microsoft Word, PowerPoint, and Access to enhance decision-making and efficiency.

Key Achievements:

- Promoted to Senior Business Analyst after consistently exceeding performance expectations and successfully managing large-scale projects.
- Played a critical role in maintaining project momentum and mitigating risks, contributing to a 20% increase in project efficiency.
- Streamlined demand management processes, reducing resource bottlenecks and increasing project completion rates by 15%.

IT Service Desk Analyst – Computer Aid Inc.

Remote

02/2021 – 02/2022

- Diagnosed and resolved technical issues related to hardware, software, networks, and applications.
- Provided first-line support for incidents and service requests.
- Escalated complex issues to higher-level IT teams as needed.
- Assisted users with system access, password resets, and software installations.
- Communicated effectively with end users to understand and resolve their IT problems.
- Provided guidance on best practices and IT security policies.
- Logged, tracked, and managed IT incidents and service requests using ticketing systems such as ServiceNow, and Workday.
- Followed ITIL (Information Technology Infrastructure Library) best practices for incident resolution and request fulfillment.
- Maintained detailed records of issues, resolutions, and IT procedures.
- Generated reports on incident trends to improve IT service management.
