

MASOOD ABEDIN

530-556-1367 • masood2024abe@gmail.com

Overall 10+ industry experience, 4+ years' experience as Python Developer. Developed ETL pipelines for integrating data from different ERP systems and various data sources into a central database.

SKILLS

AirFlow, Python, PySpark, Hive, Presto, Scuba, GraphQL, SQL Server, MySQL, Cassandra, AWS Redshift, AWS Boto, AWS Athena, AWS Glue, AWS Lambda, Javascript, Typescript, React/Redux, Angular, Django/Flask, API Development, Java Spring Boot,

PROFESSIONAL EXPERIENCE

Magnit Global(On contract with Meta), Menlo Park

May 2024 – Present

Python Developer

Collaborated with the Ads Platform data engineering team and business to enhance data privacy compliance by identifying and excluding unconsented user data from advertising models

- Conducted detailed audits across large-scale data tables to classify datasets by sensitivity and consent status.
- Re-Engineered and optimized data pipelines to enable efficient aggregation and re-aggregation of compliant data, ensuring privacy-preserving transformations without compromising model performance or business insights.
- Created dashboards to visualize anomalies in data and optimized slow running queries.

ServiceChannel, Pleasanton, CA

Feb 2023 – March 2024

Python Developer

Developed data warehouse, data lake to import data from csv files and consuming API response into MS-SQL Server for different clients

- Created table schemas and documentation for data marts
- Wrote Python scripts to transfer data from csv files and REST API into SQL server tables
- Created logging scripts to ensure data quality checks and capture errors.
- Scheduled the scripts using VisualCron software.

HCL America Inc. (On Contract with Meta), Fremont, CA

Feb 2022 – Dec 2022

Python Developer

Developed data warehouse to study the Hardware Utilization Efficiency across millions of switches

- Gather sensor data of various hardware components by aggregating from different sources into a central namespace.
- Created and scheduled batch pipelines using Dataswarm (Airflow) to extract data from file logs, Hive/Presto and MySQL databases.
- Created daily, weekly and monthly dashboards monitor the performance of switches.
- Troubleshoot slow queries, write python scripts to perform column backfills.
- Ingested large datasets from log files generated from switches.
- Used proprietary tools to create pipelines, dashboards and write SQL commands.
- Worked in an Agile environment by participating in on-call rotations and team meetings to update on the assigned tasks.

Python Developer

Medicare insurance company. The scope of the project is to maintain the CRM Application written Python using Django/Flask API framework with PostgreSQL backend.

- Medicare insurance company. The scope of the project is to maintain the CRM Application written Python using Django/Flask API framework with PostgreSQL backend.
- Experience supporting database application development including developing, deploying, maintaining, and documenting PostgreSQL databases and stored procedures throughout the software development lifecycle dashboard.
- Orchestrated the migration of on-premises data to a cloud-based environment, leveraging AWS (Amazon Web Services) to build scalable and cost-effective data processing solutions using services like Amazon EMR, S3, and Redshift.
- Monitor PostgreSQL jobs and python scripts in Linux environment
- Worked on developing a new ETL processing flow which consists of data transformations, data sourcing and mapping.
- Development/tuning of advanced PostgreSQL monitoring setups either from scratch or based on existing components.
- Orchestrated container applications using Docker in a healthcare environment.
- Developed and maintained data collection and aggregation on AWS infrastructure, using Redshift SQL database.
- Designed and automated ETL workflows using Python and Airflow, enhancing the data pipeline's efficiency and reliability.
- Created AWS Data Pipelines to load data into Snowflake based data warehouse. Configured Kinesis firehose for streaming log data into S3 buckets.
- Leveraged Looker to provide comprehensive business intelligence insights, tailoring reports for stakeholder decision-making.
- Automated daily file ingestion for processes using Python, migrated complex excel spreadsheet logic into PostgreSQL views eliminating the human effort of generating spreadsheets.
- Modified front end written in JavaScript and Redux/React.
- Used Django REST framework and integrated new and existing API's endpoints and worked on Django ORM API to create and insert data into the tables and access the Postgres database.
- Used Docker to implement the testing of changes in the Python/Django Application
- Used Amazon S3 to import csv files into PostgreSQL

Ruiz Foods, Dinuba, CA	Application Developer	Mar 2020 - May 2021
Kaweah Delta Hospital, Visala, CA	Senior BI Developer	Dec 2015 – Mar 2020
Alfred Music Publishing, Van Nuys	C# ASP.Net Developer	Mar 2013 – Dec 2015
PennyMacUSA, Moorpark, CA	Database Developer	Feb 2012 – Mar 2013
Rapattoni, Simi Valley, CA	SQL Developer	Apr 2011 – Feb 2012
DNTG, Buena Park, CA	MS Access/SQL Developer	Nov 2010 – Apr 2011
BenefitMall, Selma, CA	Database Support Analyst	Oct 2006 – May 2009

EDUCATION

University Of South Alabama, Mobile, AL

B.S in Computer and Information Science
