PROFESSIONAL SUMMARY

Dynamic professional with expertise in product development, business strategy, and data-driven problem-solving. Skilled in enhancing organizational productivity through strategic goal setting, cross-functional collaboration, and effective use of key performance metrics. Dedicated to driving growth and delivering impactful solutions that achieve organizational goals while meeting customer needs.

SKILLS

Technical Skills: MS Excel (data analysis, modeling) | Python | SQL | HTML & CSS | Google Analytics | Figma | Miro (Affinity/Research) | Competitive Analysis

Methodologies: Agile | OKRs | Digital Products

EXPERIENCE

Collective[i] | May 2023 - May 2024

Product Intern, Product Owner

- Developed and scaled the organization's OKR (Objectives and Key Results) framework by identifying key performance metrics and creating dashboards, enhancing reporting clarity and supporting strategic decision-making.
- Deployed Google Analytics across digital product platforms to collect actionable metrics, enabling data-driven decisions aligned with organizational goals. Summarized user feedback and market insights into reports and presentations for weekly product team meetings.
- Interpreted analytics data for the product team to refine digital product features, defining capability requirements based on user behavior and performance insights.
- Facilitated and led scrum meetings to ensure cross-functional alignment. Led and participated in agile sprint ceremonies for the front-end team, often acting as scrum master to streamline workflows and meet product deadlines. Worked closely with design and engineering teams to ensure product requirements and deliverables were met.
- Conducted in-depth competitive analysis of the product suite, delivering quarterly reports to senior leadership that provided insights to guide product development and market positioning strategies, as well as identifying trends and opportunities for new product features.
- Identified low user engagement on the Intelligence page, collaborating with design, engineering, and marketing teams to implement improvements, resulting in a 10% increase in engagement.
- Designed wireframes and mockups for new product features, using feedback to refine the user experience. Created user stories and interactive wireframes in Figma to illustrate user interactions with the Intelligence page and its dashboards.
- Organized and prioritized feature requests in JIRA to streamline development and track project milestones, collaborating on building requirements for requested features.

Rosow Elite Performance | Deal, NJ | June 2022 – August 2024

Basketball Trainer

- Designed and implemented structured development programs to enhance client performance, focusing on strategic goal setting, discipline, and measurable outcomes.
- Coordinated and led sessions across diverse age groups, adapting methods to align with individual growth goals and developmental needs, ensuring client satisfaction and retention.
- Provided mentorship on teamwork, mental preparedness, and resilience, fostering a growth mindset to improve performance in high-stakes situations.
- Monitored and analyzed client progress, using data to adjust training plans and optimize outcomes, ensuring alignment with performance objectives and personal growth goals.

EDUCATION

Indiana University, Bloomington, IN

Bachelor of Science (B.S.), Informatics | Minors in Financial Literacy and Business

Final GPA: 3.6

ACCOMPLISHMENTS

Awards & Honors: Dean's List (Fall 2020 | 2021 | 2022 | Spring 2022 | 2023)
