SUMMARY

Highly skilled Java developer with over 5+ years of experience in designing and implementing enterprise web and desktop solutions to support corporate objectives. Applies strong analytical, problem-solving, and technical skills in delivering high-quality systems in alignment with user needs. Proficient in contributing to the full software development lifecycle (SDLC) and implementing agile and waterfall methods and technologies such as Java EE, Spring, JPA, Hibernate, Servlet, REST, MySQL, and JavaScript. Possesses excellent teamwork and communication skills with a friendly and approachable personality. Enthusiastic about learning new technologies and open to feedback.

TECHNICAL SKILLS

- **Languages:** Java, SQL, JavaScript, HTML, CSS, C#
- **Frameworks:** Spring, Spring Boot, Hibernate, Maven, JPA, JUnit, Mockito
- **Databases:** MySQL, MS SQL
- **CI/CD:** Git, GitHub
- **Web:** HTML5, CSS3, JavaScript, XML, AJAX, MVC, Servlets, JSP
- **Web Services:** REST
- **Web/App Servers:** Apache Tomcat
- **Design Patterns:** Strategy, Singleton, Observer, Decorator, Factory, Command, Adapter, Facade, Template Method, Iterator, Composite, State, Proxy
- **SDLC:** Models, Planning, Development, Testing, Deployment, Maintenance & Support
- **IDEs and Technologies:** Eclipse, IntelliJ IDEA, Visual Studio, Python, Visual Studio Code, Android Studio, Lucid Chart, Git, GitHub, UML Designer, Star UML, Postman, Slack, Trello, MS Teams, JESI Tool, Jira, Plant UML,
- **Platforms:** Windows

PROFESSIONAL EXPERIENCE

Software Engineer, T-MOBILE US October 2021 – June 2023

- Developed new APIs and maintained existing APIs in billing system using Java and Spring framework.

- Experience in DevOps processes, CI-CD (Continuous Development-Continuous Integration) pipeline development and orchestration.
- Create new and maintain existing Swagger files (Describe the structure of APIs).
- Create new and maintain existing IDD files (Interface Design Document).
- Create new and maintain Mapping files.
- Worked closely with product owners and team members to understand business requirements and translate them into technical specifications.
- Review IDD, Mapping and Swagger files.
- Participated in code reviews and provided constructive feedback to team members.

Software Engineer, UT Solutions, Addis Ababa Ethiopia *Feb 2016 - April 2020*

Contributed to all phases of software development lifecycle including requirement analysis, design, development, testing, and deployment.

- Developed core business logic, Spring controllers, URL requests mapping, and response paradigm using Spring Boot and Java.
- Performed requirements analysis and translated information to functional and design specifications.
- Created use cases as well as sequence and class diagrams.
- Used frameworks such as Spring and Hibernate for persistence and application layers.
- Managed creation and retrieval of user accounts (Restful API), enabling data storage and retrieval using JSON.
- Participated in code reviews and provided constructive feedback to team members.
- Developed and executed automated test scripts using Postman, ensuring API reliability and functionality.
- Collaborated with product managers to define acceptance criteria and create comprehensive test plans.
- Contributed to the creation of test plans, test cases, and test scripts for both manual and automated testing.
- Detected and reported software defects, worked with other development teams to resolve issues.
- Assisted in the implementation of continuous integration and continuous delivery (CI/CD) pipelines, ensuring faster and more reliable software releases.

EDUCATION

Master of Science in Computer Science, Maharishi International University, Fairfield, Iowa, USA.

Key Courses: *Fundamental Programming Practices, Modern Programming Practices, Database Management System, Web Application Programming, Enterprise Architecture, Web Applications*

Architecture, Big Data Technology, Machine Learning, Advanced Software Development, Mobile Device Programming (Using Kotlin), Algorithms.

ACADEMIC PROJECTS

- Banking System, MIU (2020): Designed and developed a banking system with four other team members. Implemented the Banking and Credit Card Application using the Framework. Technologies Used: Java/ Java8, IntelliJ, Git, Star UML, Design Patterns (Singleton, Strategy, Observer, Command, Facade)
- Covid-19 Face Mask Detection using machine learning, MIU (2020): Implemented detection of face mask given a photo or a video feed to remind people put on their masks. Used transfer learning with 'ImageNet' weighted MobileNetV2 architecture and adding a fully connected layer on top. Achieved 99% accuracy in doing so.
- Library Management System, MIU (2020): Designed and integrated modules for completed management system. Created data access backend functionality. Technologies Used: Java, JavaFX with Eclipse, Scene Builder, MVC, UML, Star UML.
- Meditation Checking Appointment System, MIU (2020): Collaborated with 5 team members in the design and development of backend part of RESTful Web Services to automate the process of meditation checking appointment system. Technologies Used: RESTful Web Services, Spring, Spring Boot, Spring MVC, Spring Data, JPA/Hibernate, MySQL
- Telecommunication System Database Design, MIU (2020): Developed database solution to register new users, generate bills, and eliminate manual data entry. Technologies Used: MS SQL, SQL server management studio, Microsoft report builder.
