

# Mitesh Chhatbar

## Software Developer

Santa Clara, CA | [mitesh@myemailjob.com](mailto:mitesh@myemailjob.com) | 323-943-0570 | [LinkedIn](#)

### SUMMARY

- 4+ years of experience developing web-based applications with extensive hands-on expertise in analysis, design patterns, client-server application development, and implementation and testing using Java and J2EE.
- Proficient in SDLC methodologies, including Waterfall and Agile (TDD, Scrum), ensuring efficient and effective project management.
- Skilled in designing and developing multi-tiered web applications using Java and J2EE technologies (Core Java, JSP, Servlets, JUnit, RESTful API, JDBC, XML/XSLT, JMS) and frameworks such as Struts, Spring, JSF, MVC, and Hibernate.
- Proficient in Front-End UI technologies, including HTML, CSS, JavaScript, jQuery, AngularJS, NodeJS, ReactJS, Grunt, and Bootstrap, enabling the creation of responsive and user interfaces.
- Experience working with AWS EC2, S3, and RDS for high availability and scalability and deploying infrastructures and backend compute services using Lambda.
- Extensive experience with Oracle and SQL databases and automated testing frameworks like Selenium and Mockito, ensuring high-quality and reliable software solutions.
- Adept at writing build scripts using Gradle and Maven and implementing Continuous Integration (CI) and Continuous Deployment (CD) pipelines with Jenkins for streamlined development and deployment processes.

### SKILLS

**Methodology:** SDLC, Waterfall, Agile

**Programming Languages:** Java, C++, PL/SQL

**Frameworks:** Spring MVC, Spring, Hibernate, Spring Boot, Spring Security, Spring Data JPA, Node.js, React.js, Angular JS

**J2EE Technologies:** Servlets, JSP, JDBC, JUnit, JAXB, JMS, JSTL, Multi-threading, EJB, JavaBeans, JSF, JSTL, Multithreading

**IDEs:** IntelliJ IDEA, Eclipse, Visual Studio Code

**Web Technologies:** HTML5, CSS3, JavaScript, RESTful APIs, GraphQL, TypeScript, jQuery, Ajax, XML, JSON, Bootstrap

**DevOps:** Docker, Kubernetes, Jenkins, Bamboo, Ansible

**Cloud Platforms:** AWS, Azure, Google Cloud Platform (GCP)

**Databases:** Oracle, MySQL, SQL Server, DB2, PostgreSQL, MongoDB, Cassandra, Cosmos DB, DynamoDB

**Version Control & Other Tools:** Git, SVN, Gitlab, Bit Bucket, Maven, Gradle, Ant

**Testing and Logging Tools:** Junit, Mockito, Selenium, TestNG, Power Mock, JMeter, Jest, Enzyme, Cucumber, Log4J

**Soft Skills:** Effective verbal and written communication, Problem-solving, and Troubleshooting skills

**Operating Systems:** Windows, Linux, Unix

### EXPERIENCE

**Capital One, USA | Software Developer**

**July 2023 - Current**

- Followed Agile Scrum methodology that included iterative application development and stand-up meetings.
- Implemented various front-end screens using React.js, leveraging predefined components from NPM and the Redux library to streamline development and state management.
- Utilized Express.js, a fast and minimal web framework for Node.js, to effectively manage server operations and routing.
- Developed RESTful APIs using Spring REST to enable communication between the front-end and back-end systems.
- Implemented unit and integration tests for Java applications, achieving 95% test coverage and a 30% reduction in production defects.
- Designed front-end presentation logic using JSP, HTML, CSS, and Bootstrap.
- Deployed Spring Boot-based microservices on Docker containers using Amazon ECS, ensuring scalable & efficient deployment processes.
- Developed SQL scripts to create and manage tables for various business logic requirements in Oracle Database, ensuring data integrity and efficient querying.
- Implemented Continuous Integration (CI) and Continuous Deployment (CD) pipelines in Jenkins, significantly reducing deployment times for microservices and enhancing overall development efficiency.

**Rlogical Techsoft Pvt. Ltd, India | Software Developer**

**May 2019 - April 2022**

- Involved in SDLC Requirements gathering, Analysis, Development, and Testing production of applications using the Waterfall model.
- Specialized in Microservices architecture, utilizing technologies like the Spring framework, Hibernate, and RESTful web services.
- Designed and developed RESTful APIs in Node.js using Express.js, implementing CRUD operations, request validation, and error handling.
- Developed web pages using HTML5, CSS3, jQuery, and JavaScript, with working knowledge of Angular and React.js.
- Extensively used jQuery, React, Bootstrap, JSON, AJAX, and DOM scripting to create interactive web applications, including message posting and auto-complete forms for secure validations.
- Implemented Kafka consumers in Java to subscribe to Kafka topics and process incoming messages or events.
- Utilized Kubernetes services for exposing applications internally or externally, providing service discovery and load balancing for client requests.
- Enhanced application performance by 40% through optimization of backend code and database queries, resulting in reduced response times and improved user experience.
- Wrote database interaction code using JDBC API to connect to MySQL, ensuring efficient and reliable database operations.

### EDUCATION

**Master in Computer Science |** University of Southern California, Los Angeles, CA

**Bachelor in Information Technology |** Gujarat Technological University, Ahmedabad, Gujarat
