ACADEMIC PROJECTS

Web Development and AWS Integration Showcase

May 2024

- **Static Website with AWS S3:** Utilizing a free Bootstrap template, I created a static website hosted on Amazon S3. The website features a home page with personalized information and my portfolio. WordPress Website with AWS
- **AWS LightSail:** Following AWS's guided tutorial, I launched a WordPress website using AWS LightSail. I customized the website to include a homepage with details about myself, including my resume.
- **Amazon Rekognition and Amazon Comprehend Tutorials:** I successfully completed tutorials on Amazon Rekognition and Amazon Comprehend, demonstrating my ability to work with AWS's machine learning services. These projects allowed me to enhance my skills in web development and AWS services.

Employee Wellness Enhancement Project

December 2023

- Adminstrated the Recreation and Wellness intranet Project, balancing 5-month schedule and \$175,000 budget, demonstrating strong project management skills by providing technical solutions according to the business needs.
- Collaborated with the project team to create an intranet application that promoted employee well-being, reduced healthcare insurance premium costs by 14%, and facilitated cost-effective management using Smartsheet and other tools.
- Played a vital role as Project Manager role in implementing user-friendly features, such as registration, health tracking, and incentives. Additionally, actively participated in risk management, cost control, and stakeholder engagement strategies.

Cloud Data Visualization Project for Fire Department Calls Across USA

Spring 2023

- Developed interactive Power BI dashboards, effectively reducing decision-making time by 18% through effective data-driven insights. Utilized Data Analysis Expressions (DAX) to create interactive visual reports, offering innovative business solutions
- Analysed Fire Department data to identify incident trends by location and conducted analysis on incidents, cities, emergencies, and priority calls across the USA, recommending data organization and strategic improvements

Automated Facemask Detection and Body Temperature Check, using IoT-enabled Smart Doors

2021-2022

- Coordinated with team of 4 to design and develop automated system that detects face masks, dispenses hand sanitizer, and checks body temperature with IoT-enabled smart doors, using OpenCV and TensorFlow
- Presented project to panel of 6 professors from all over the country, at the 2nd International Conference on Artificial Intelligence and Signal Processing (AISP), 2022. Published paper in the *IEEE Journal*

TECHNICAL SKILLS

- **Languages:** Python, SQL, PL/SQL, R, Java, JavaScript, C/C++
- **Data Visualization and analysis:** MS Excel, Power BI, Tableau, Qlik View, Qlik Sens
- **Collaboration and Documentation:** MS Visco, Jupyter Notebook, Git/GitHub, MS Project
- **Database:** MS Access, MySQL, MongoDB, Oracle
- **Cloud Technologies:** MS Azure, AWS (Especially like S3, EC2, RDS, Redshift), GCP

ADDITIONAL

- **Certifications:** Product Management: Building a Product Strategy, Project Management Foundations, Business Analysis Foundations: Strategy Analysis, Introduction to Internet of Things
- **Languages:** Basic skills in French and Spanish; Fluent in Telugu and Hindi
