Summary

- Proficient Full stack Java Developer with more than one year of experience with complete Software Development Life Cycle in both Web based and Enterprise applications including requirement analysis, design, and implementation and testing with priority on **Object Oriented, Aspect Oriented, Java** and **Client Server technologies**.
- Hands on experience in building projects using popular IDEs such as **IntelliJ** and **Eclipse**.
- Hands-on experience with **Core Java**, including **Multithreading, Concurrency, File I/O, Generics, Data Structures**, and **Collections**.
- Good experience in implementing applications with **Model-View-Controller (MVC) / N-tier Architecture**.
- Knowledge on Design Patterns such as **MVC, Singleton, Prototype, DAO, Factory method, Builder, Iterator**.
- Experience in Spring Framework with **Spring (Spring Boot, Dependency Injections, Hibernate JPA, REST services, REST API Security, Spring MVC with Thymeleaf)**
- Proficient in developing **RESTful** and **SOAP** web applications using the **Spring Framework**. Skilled in documenting services such as **GitLab**
- Proficient in unit testing using **JUnit**, integrated with **Selenium** for automated browser testing.
- Proficient in **HTML5, CSS3, XML**, and **JSON** for developing web applications. Familiar with **XPath** for XML parsing.
- Involved in developing applications using **waterfall, Agile (Scrum/Iterative)** methodologies and Test First, Test Driven Development and Service orientation architecture.
- Have hands on experienced in AWS Like **RDS, DynamoDB, S3, AWS Glue, AWS Athena, CloudWatch** of Amazon web services (AWS)
- Good analytical and programming skills, good diagnostic ability, ability to go the core of the problem, capacity to meet deadlines and always focused on quality and speed.
- Have excellent communication and problem-solving skills with excellent understanding of system development methodologies, techniques, and script tools such as Linux.
- Experience in working with databases such as **mySQL** and using SQL to write storing procedures, functions, and triggers for different Data Models.
- Experience in Configuration Management, setting up company Version policies, building schedule using **Git** and **GitHub**.
- Designed and developed business logic using Spring Boot Controllers, Services, Repositories implementing **CRUD Repository** and **JPA Repository** using **Spring Data JPA** and **Hibernate**, POJOs.

- Used Spring Core Annotations for Dependency Injection Spring DI and Spring MVC for REST API's and Spring Boot for micro-services.
- Experience in using bug/issue tracking, project Tracking and Management tool **JIRA, GitLab**
- Worked collaboratively with Clients at **Onsite** and **offshore** teams to establish and maintain consistent test methodology and resolve any requirements ambiguities during the testing process.
- Experienced in presenting ideas and recommendations to stakeholders to identify **process improvements and efficiency**.
- Participated and contributed to converting the requirements into **effective business design**.

Key Skills

• Object Oriented Programming • Analytical Thinking and Problem solving • API Design and Development • Microservices • Data Structures & Collections • Multithread programming • Dependency Injection • Web Services • Testing • Design Patterns and Principles • Debugging and Troubleshooting • Code and Quality Standards

Professional experience

Software Engineer at Cognizant Technology Solutions, Irving TX **June 2022 - Current**
EAS – DCX, Contact Center, IVR development and testing

- Design and execute test cases, campaigns, regression testings for IVR call flows using Cyara Platform, Jira.
- Ensure quality, consistency, and accuracy in completing all required documentation on Confluence.
- Understand financial and security domain knowledge for credit card processing and verifying credit card users.
- Analyze log details and developer notes in AWS CloudWatch and Call Flow Design artifacts on Confluence.
- Access and debug application in AWS Lambda, CloudWatch, Amazon Connect, DynamoDB.
- **Used tools and technologies:** Cyara platform, Jira, Confluence, Confluence, AWS CloudWatch, Amazon Connect, AWS DynamoDB

Software Engineer Intern at Micro Focus, Houston TX **August 2021 - June 2022**

- Perform unit testing, regression testing, and automation testing using JUnit, Selenium, Java and Groovy
- For each sprint, create multiple deployable systems using Jenkins to test and validate new and existing features or Rest API
- Debug and investigate web page response, web elements using HTML, XML, xpath
- Analyze code changes, possible reverse changes, and validate code changes using Git, Junit, Integration testing for modified or added REST API
- Implemented daily system integration and executing for all REST API calls with Jenkins daily test report

- **Used tools and technologies:** IntelliJ, Jenkins, GitLab, MySQL, Java, Selenium, Rest API, HTML, XML, xpath

Software Engineer Intern at Illuma Labs, Dallas TX . **January 2021 – June 2022**

- Query data from Amazon RDS using AWS Glue and Athena for voice recognition, analysis and research.
- Design and execute AWS Glue jobs to cleanse and prepare data in 3-models Bronze Silver Gold buckets.
- Use MySQL, Amazon Data Lake, Amazon Athena and other AWS services to handle raw data, combine data, and filter incomplete data in S3 buckets.
- **Used tools and technologies:** AWS Glue, AWS Athena, AWS RDS, S3, MySQL

Education and Certifications

Bachelor of Science in Computer Science at University of Texas at Dallas

AWS Certified Cloud Practitioner - Credly

Cyara Certified Expert (Platform Essentials) – Credly

Cyara Certified Expert (IVR Application Testing) – Credly

Cyara Certified Expert (IVR Performance Testing) – Credly

Cyara Certified Expert (CX Monitoring) – Credly

Cyara Certified Expert (Outbound Testing) – Credly

Cyara Certified Expert (Virtual Agent Testing) – Credly

Udemy Certification (Java Database Connection JDBC and MySQL)

Udemy Certification (Relational Database Design)
