

NARENDRA YENUMULA

Data Analyst - SAP

Boca Raton, Florida | narendra.nani936@gmail.com | +1(954)501-1832 | [LinkedIn](#)

OBJECTIVE:

Data Analyst with 3 years of professional experience leveraging SQL, Python, BI tools and SAP technologies (S/4HANA, SAP BW, SAP Analytics Cloud) to analyze large datasets, develop KPI dashboards, and automate reporting workflows. Experienced in financial and operational analytics, with a strong focus on data accuracy, compliance, and business insights. Proven ability to work with cross-functional stakeholders, integrate multiple data sources, and translate complex data into clear, actionable insights that support strategic decision-making and performance improvement.

EDUCATION:

Master of Science in Data Science and Analytics

Florida Atlantic University, FL

| May 2025

TECHNICAL SKILLS:

- **Data Analysis & Programming:** Python (pandas, NumPy, matplotlib, seaborn), SQL (CTEs, joins, subqueries, window functions), R, Data Cleaning validation, ad-hoc reporting, SPSS
- **SAP Technology :** SAP ECC, SAP S/4HANA, SAP HANA, SAP BW/4HANA, SAP Analytics Cloud, SAP BusinessObjects (WebI, Crystal Reports)
- **Business Intelligence & Visualization:** Power BI (DAX, data modelling), Tableau, Google Analytics, Excel
- **Automation & Tools:** ETL workflows & Python scripting, Power Automate / basic RPA Snowflake, SQL Server, Microsoft Access, Jupiter Notebook, Git/GitHub
- **Data Science & Analytics:** Predictive Modelling, Statistical Analysis, Data Preprocessing, Data Processing, KPI development
- **Other Skills:** Dashboard storytelling & visualization best practice

EXPERIENCE:

Data Analyst | Discover Financial Services, USA

| Mar 2025 – Present

- Analyze large-scale financial and transactional datasets using **advanced SQL** (CTEs, window functions) and **Python** to support credit risk, spending behaviour, and operational reporting.
- Design and maintain **Power BI dashboards** with complex DAX measures to monitor KPIs, trends, and compliance metrics for business stakeholders.
- Integrate multiple data sources including **SAP S/4HANA/ECC, Snowflake and SQL Server**, ensuring data accuracy and consistency across reports.
- Perform **basic data extraction and validation from SAP systems** to support financial and regulatory reporting.
- Automate recurring reports and ETL workflows using **Python scripts and Power Automate**, reducing manual effort and reporting cycle time by **~40%**.
- Partner with compliance and risk teams to support **regulatory reporting and data governance**, improving data reliability and audit readiness.

Data Analyst | VR Digital Solutions

| Jan 2022 – July 2023

- Used **SQL, Excel, and Python** to clean, validate, and analyze structured datasets for performance tracking and business insights.
- Developed **Power BI and Tableau dashboards** to visualize KPIs, campaign performance, and operational metrics for internal teams and clients.
- Conducted ad-hoc analysis to support management decisions related to growth, customer engagement, and operational efficiency.
- Collaborated with developers and business stakeholders to understand data requirements and deliver accurate, meaningful reports.
- Automated routine reporting tasks using Excel macros and Python, improving turnaround time and data consistency.

Data Analyst Intern | VR Digital Solutions

| July 2021 – Dec 2021

- Assisted senior analysts with **data collection, cleaning, and preprocessing** using Excel, SQL, and Python.
- Created basic dashboards and reports in **Power BI and Excel** to track business metrics and project performance.
- Gained hands-on experience with **real-world datasets, reporting workflows, and business analytics** practices.
- Performed exploratory data analysis to identify trends and patterns for internal presentations.

PROJECTS:

- **Business Performance Analytics Dashboard** | Tools: SQL, Power BI / Tableau, Excel
- **Customer Behavior & Retention Analysis** | Tools: Python (Pandas, NumPy), SQL, Tableau / Power BI
