

Nikhil Tanneeru

DATA SCIENTIST

tannerunikhil@gmail.com | +1 (937) 537-3454 | Houston, TX | [LinkedIn](#)

SUMMARY

- Data Scientist with around 4 years of experience in machine learning, predictive analytics, and NLP using Python, R, SQL, TensorFlow, PyTorch, and scikit-learn, improving model accuracy and driving data-backed decision-making.
- Proficient in data engineering and BI with SQL, Spark, Kafka, dbt, Tableau, Power BI, and cloud platforms (AWS, Azure, GCP, Snowflake), streamlining pipelines, automating ETL, and building real-time dashboards.
- Hands-on in MLOps and deployment with MLflow, Kubeflow, Docker, Kubernetes, and Airflow, ensuring scalable models, automated monitoring, and strong governance while delivering insights through clear storytelling.

EXPERIENCE

State Street | Data Scientist

Feb 2025 - Current

- Team up with cross-functional teams using Agile and Waterfall methodologies by holding regular sprint meetings, employing JIRA to track progress, delivering projects 10% ahead of schedule.
- Led data analysis and machine learning initiatives by preprocessing datasets, selecting appropriate features, and using Python and SQL, improving model accuracy by 25% across business units.
- Implemented supervised and unsupervised learning algorithms, including Support Vector Machines (SVM), K-Nearest Neighbors (KNN), Random Forests, by fine-tuning hyperparameters and performing cross-validation, enhancing customer segmentation classification accuracy by 20%.
- Developed deep learning models with TensorFlow and PyTorch by optimizing neural network architectures and leveraging GPUs for training, reducing processing time by 30% and improving prediction accuracy by 15%.
- Designed interactive dashboards in Tableau by integrating SQL queries and incorporating automated refresh features, driving a 35% increase in data-driven decision-making across departments.
- Managed cloud infrastructure on AWS and Azure by automating resource allocation with Terraform and setting up monitoring tools, achieving 99.9% uptime for data processing tasks and reducing operational costs by 20%.
- Optimized SQL Server and MySQL databases by normalizing tables, indexing frequently queried fields, and restructuring queries, increasing data retrieval speed by 25% and query efficiency by 15%.

Freshworks Inc |Data Scientist

Aug 2020 - Jul 2023

- Advanced credit risk assessment by integrating real-time credit scoring models with live transaction data, enabling faster lending approvals and reducing default exposure across portfolios.
- Improved financial forecasting accuracy using ARIMA and Prophet models for loan performance, transaction trends, and cash flow prediction, strengthening capital planning and liquidity management.
- Streamlined fraud monitoring by embedding automated anomaly detection and alert systems into compliance workflows, cutting manual oversight efforts by over 40%.
- Boosted executive visibility through predictive Power BI dashboards that merged risk analytics and business KPIs, enabling data-backed decisions and reducing compliance reporting delays.
- Managed SQL Server and MySQL databases, executed data cleaning, wrangling, analysis to inform business decisions. Specialized in Power BI to develop dashboards that improved stakeholder understanding of complex data sets by 40%.
- Leveraged cloud technologies, including AWS and Azure, for scalable data storage solutions, enhancing data analytics capabilities securely and facilitating a 20% improvement in data accessibility and analysis speed.
- Employed software tools like NumPy, Pandas, Matplotlib, SciPy, and Scikit-learn for data manipulation and statistical modeling. Developed predictive models using TensorFlow and PyTorch, improving model accuracy by 10%. Using Git for version control streamlined project collaboration, reducing merge conflicts by 50%.
- Spearheaded the integration of multimodal data sources into a single analytics platform, which doubled the speed of data driven decision-making within the company.

SKILLS

- **Methodologies:** SDLC, Agile, Waterfall
- **Bigdata Ecosystem:** Alteryx, Hadoop, Apache Spark, Kafka, Hive, Data Lakes, Redis, AWS Glue
- **IDEs & Development Tools:** Visual Studio Code, PyCharm, Jupyter Notebook
- **Programming & AI Frameworks:** Python, R, SQL, Scala, Julia, MATLAB, scikit-learn, TensorFlow, Keras, PyTorch, CNNs, RNNs, LSTMs, GANs, Hugging Face Transformers, Lang Chain, T5-based LLM, Crew AI, Retrieval-Augmented Generation, OpenAI API
- **Machine Learning & AI:** Regression Analysis, Classification, Bayesian Methods, Decision Trees, Random Forests, Naive Bayes, KNN, NLP, Sentiment Analysis, XGBoost, Deep Learning, Generative AI, AI Ethics & Explainability, Fairness Metrics
- **MLOps & Deployment:** MLflow, Kubeflow, Apache Airflow (ETL Automation & ML Pipelines), Docker, Kubernetes, CI/CD for ML, Feature Stores, Model Monitoring & Maintenance, Automated Model Retraining, API Development
- **Data Engineering & Processing:** Pandas, NumPy, dbt (Data Build Tool), Modern ETL/ELT Processes, Data Quality Checks, Data Pipeline Automation, Data Wrangling, Data Modeling, PySpark, Apache Kafka, AWS Kinesis, Apache Flink, Real-Time Dashboards
- **Cloud Platforms:** AWS (S3, EC2, Redshift, SageMaker), GCP (BigQuery, Vertex AI), Azure, Snowflake, Vector Databases
- **Data Visualization & Storytelling:** Tableau, Power BI, Matplotlib, Seaborn, Plotly, Insight Presentation for Stakeholders, Excel
- **Statistical Methods:** Hypothesis Testing, A/B Testing, Statistical Analysis, Time Series Analysis, Forecasting, UNIX / Linux Scripting, Autosys, Informatica PowerCenter, Teradata SQL Assistant, MS Office Suite, SharePoint, TOAD, Survival Analysis
- **Databases & Warehouses:** MySQL, PostgreSQL, SQL Server, MongoDB, Oracle, Snowflake, DB2 / UDB, MS Access

EDUCATION

Master of Science: Engineering Data Science | University of Houston, TX, USA

Bachelor of Science: Computer Science | Sathyabama University, India
