

Education

Master of Science - Computer Science Arizona State University, Tempe, Arizona	(Aug 2022 – May 2024) GPA - 3.3/4.0
Bachelor of Engineering - Electronics and Communication Visvesvaraya Technological University (VTU), KA, India	(Aug 2014 – Aug 2018) CGPA - 8.5/10

Skills

Languages: Python (NumPy, Pandas, Scikit-learn, PySpark, SQLAlchemy), SQL, UNIX Shell Script, Microsoft Excel VBA

Big Data Technologies: Apache Spark, Airflow, Hadoop.

Cloud Platforms: AWS(Glue, Lambda, EC2, Redshift, EMR), Azure (ML, Data Factory), GCP(VM, BigQuery, Cloud Storage, Dataflow, AI Platform)

Tools & Databases: Databricks, Docker, Terraform, PostgreSQL, Snowflake, MongoDB, Informatica, Salesforce (SFDC), SQL Server, PowerBI, Git Version Control.

Data Modeling & Governance: Star Schema, Snowflake Schema, Dimensional Modeling, Normalization/Denormalization, Data Quality, Data Lineage, Metadata Management, Compliance (GDPR, HIPAA).

Monitoring: Prometheus, Grafana.

Others: Big Data, Business Intelligence, DevOps practices in ML (**MLOps**), Machine Learning (supervised and unsupervised learning), Deep Learning (Neural Networks), Data Visualization, Big Data Analysis.

Professional Experience

Volunteer Data Science Engineer EPICS ASU (Part-time Volunteer) Remote, USA	(June 2024 - Present)
• Designed and implemented optimized ETL processes, ensuring data integrity and pipeline stability. • Redesigned legacy SQL relational database, implementing normalized schema and efficient query structures to enhance data integrity and retrieval speed. • Prepared written summaries to accompany results and maintain documentation. • Generated detailed studies on potential third-party data handling solutions, verifying compliance with internal needs and stakeholder requirements.	

Data Science Engineer Piramal Finance Bangalore, India	(April 2021 – July 2022)
• Improved customer service efficiency by 15%, achieved through Implementing a Scalable ETL Batch Data processing pipeline for CSAT dashboard, improvement was measured by pre- and post-implementation CSAT scores and response time metrics. Utilized Python, SQL queries and tools like AWS Glue, PostgreSQL, EC2, Code Commit and Apache Airflow. • Significantly reduced dashboard data loading latency by 50%, cutting average load times from 10 minutes to 5 minutes, by implementing an ELT pipeline using AWS Glue, and Airflow to designing a DataMart optimized with Python/PySpark and SQL queries. • Boosted employee retention by 15% through a predictive churn model. Integrated a Random Forest model into sales operations to proactively identify at-risk employees, enabling targeted retention strategies. • Collaborated with cross-functional teams to design & implement an optimized data processing workflows analysis using Python API scripts for automated scheduling, resulting in 50% faster and more accurate sales reporting.	

Junior Data Scientist Radome Technology Bangalore, India	(June 2019 – March 2021)
• Achieved 85% accuracy in inventory and sales forecasting by developing and deploying modules using ARIMA, ARMA, Random Forest, and Support Vector Machine models. Leveraged GCP services like VM, BigQuery, Cloud Storage, PostgreSQL and Apache Airflow. • Improved model performance and prediction accuracy by 10% through pre-processing techniques such as feature engineering and dimensionality reduction. • Achieved 83% accuracy in real-time aircraft detection at 30 frames per second by developing an end-to-end object detection application using the Regional CNN model. Utilized TensorFlow, Code Commit, and Python Flask. • Implemented information technology solutions for machine learning papers on forecasting and object detection, presenting demos to senior team members and clients.	

Publication & Presentation

- **Developed and implemented** a Novel approach for Breast Cancer Detection with Image segmentation technique and Artificial Neural Network algorithm MATLAB with 80% in accuracy, **published in International Journal of Engineering Research in Electronics and Communication Engineering (IJERECE) in 2018**. – [\[Paper Link\]](#)
- **Delivered a product demo and walkthrough** to an audience of 350 professionals at the **IESS IX Conference-2020**, showcasing expertise and facilitating engaging interactions.
