EDUCATION

NORTHERN ILLINOIS UNIVERSITY

Master of Science in Management Information Systems

USA

Aug 2022 – May 2024

SRM UNIVERSITY

Bachelor's degree in Electronics & Communications Engineering

India

Jun 2017 – Jun 2021

SKILLS

Programming Languages: Python, Java Spring Boot

Database Technologies: SQL (MySQL)

Cloud Technologies: AWS Cloud (S3, EBS, Lambda, EC2)

Software & Simulation Tools: Keil, Arduino, MATLAB, Proteus

Business & Management Tools: Microsoft Office, SAP, Project Management

Operational Techniques: 5S

PROFESSIONAL EXPERIENCE

EXPERIENTIAL LEARNING CENTER, NIU

IL, USA

Business Consultant

Jan 2024 – May 2024

- Led in-depth organizational analysis for Link Logistics to refine HR processes using AI, leveraging SQL and AWS for data management.
- Evaluated AI-driven LMS platforms to enhance talent development, integrating them with existing HR systems using Java Spring Boot.
- Headed the integration of AI tools into HR, enhancing talent management using Python for algorithms and AWS for deployment.
- Authored a report detailing the evaluation process, findings, and recommendations on the use of AI in HR, analyzing data with SAP and Microsoft Office to provide actionable insights that drove decision-making.

SHIASH INFO SOLUTIONS

Chennai, India

Digital Marketing Intern

Oct 2021 – Dec 2021

- Conducted market research, analyzing industry trends and competitor strategies using SQL for data insights to refine marketing strategies.
- Managed Instagram/Facebook via Hootsuite to schedule posts, track engagement, and optimize campaigns for increased brand visibility.
- Utilized Google Analytics to measure digital campaign success, using data to provide actionable insights for campaign optimization.
- Streamlined campaign reporting processes with Microsoft Office, facilitating better decision-making and stakeholder communication.

OIL AND NATURAL GAS CORPORATION

Rajahmundry, India

Data Analyst Intern

Apr 2019 – May 2019

- Employed SQL for data querying and management tasks, significantly enhancing data accessibility and analysis at ONGC.
- Refined Standard Operating Procedures (SOPs) using SAP, focusing on optimizing data processes to support high-quality data management.
- Engaged in data analytics projects, utilizing Python to perform detailed data analysis and visualization to drive operational improvements.
- Tracked data-related tasks and supported requests using AWS (S3, EBS, Lambda, EC2), ensuring efficient data storage and accessibility.
- Collaborated on data-driven initiatives employing advanced analytical tools, contributing to advancements in ONGC's analytics capabilities.

PROJECTS

Digital Transformation Strategy for Nike

- Devised and implemented digital transformation strategies for Nike, increasing operational efficiency by identifying optimization areas using ERP systems, CRM tools, and cloud computing.

Coffee Shop Order App - Agile

- Engineered an Agile mobile app for a hypothetical coffee shop, enhancing customer experience and streamlining payment processes through Swift/Kotlin, AWS, Firebase, and UI design tools.

Channel Modelling

- Simulated and analyzed a Fading Channel Model using MATLAB, reducing Bit Error Rate (BER) by employing QAM, PSK, and FSK modulation techniques.

Water Level Controller with 8051 Microcontroller

- Developed a water level controller and indicator, improving system responsiveness and display accuracy with atmega328p microcontroller, embedded C, and LCD integration via Arduino rapid-prototyping.
