EDUCATION

Bachelor of Science, Computer Science

Aug 2021 - May 2025

Arizona State University, Tempe, Arizona

GPA: 3.7

Dean's List Holder (6x), Magna Cum Laude

Relevant Coursework: Machine Learning, Artificial Intelligence, Cloud Computing, Data Structures and Algorithms, Distributed Software Development, Mobile App Development, Software Engineering, Object-oriented Programming.

SKILLS

Languages: Java, Python, C++, JavaScript, C#, Swift, PHP

Libraries and Frameworks: React, Node.js, Next.js, SwiftUI, ASP.NET

Tools: Git, GitHub, AWS, Firebase, Docker, MySQL, PostgreSQL, Postman, Jira

PROFESSIONAL EXPERIENCE

Software Engineering Intern, PAQT

Aug 2024 - May 2025

- Built reusable **React** components using **Tailwind CSS**, enhancing responsiveness and increasing engagement by **25%**.
- Integrated **OpenAI's ChatGPT API** to automate agreement generation, reducing effort by **50%** and improving accuracy.
- Optimized and debugged backend APIs**, resolving critical issues to boost system uptime, stability, and performance.
- Refactored** oversized code modules, reducing their size by **over 80%** and making the **codebase** easier to maintain.

Data Engineer Assistant, Follett Higher Education

Dec 2022 - Apr 2025

- Developed scalable **Python** and **SQL** data workflows to optimize inventory allocation, boosting sales revenue by **32%**.
- Automated end-to-end sales data processes to identify top-selling products, **reducing inventory losses by 30%**.
- Created interactive **Power BI** dashboards using SQL data to guide purchasing decisions and drive **\$135,000 in sales**.
- Improved data pipeline reliability** by restructuring messy **SQL** logic and reducing **processing failures** across workflows.

Full Stack Web Developer Intern, World Blazing Pvt. Ltd

Jan 2021 - Aug 2021

- Developed **20+** interactive client websites and an e-commerce platform with **1,000+ products** and inventory tracking.
- Optimized website **SEO**, achieving **top 10** Google rankings within **3 months** and increasing organic traffic across clients.
- Implemented **AES-256-encrypted** PHP-MySQL storage to protect user and business data in production environments.
- Collaborated with stakeholders to iterate on **UX** and feature requirements, improving engagement and conversions.

PROJECTS

Your Next Lease | *Next.js, React, Cloudinary, Vercel*

- Built scalable **Next.js** server components and API actions handling **10,000+ listings** with **35% faster** fetch performance.
- Integrated **Cloudinary** pipelines with automated transforms, reducing image size by **60%** and improving rendering.
- Improved system reliability by optimizing **Vercel** deployments, traffic routing, and DNS configuration in production.

Track My Day | *SwiftUI, Firebase Firestore, CoreLocation, WeatherKit*

- Built a task management app using **SwiftUI** with an intuitive interface for organizing and tracking daily tasks.
- Integrated **Firebase Firestore** to store and manage **75+ tasks**, with real-time weather and location tracking.
- Implemented task categorization, allowing users to **organize 200+ tasks** into Personal, Work, and School categories.

Stock Finder | *C#, ASP.NET, WCF, SOAP, REST APIs, XML*

- Engineered a web platform using **C#** and **ASP.NET**, deployed on ASU's web server for real-time stock tracking.
- Integrated financial metrics and news APIs via **WCF**, **WSDL**, **SOAP**, and **RESTful** services for live market data.
- Enhanced security with **encrypted passwords** and **CAPTCHA**, cutting incidents by **60%** and optimizing **XML** handling.

Lucia AI | *Python, SpeechRecognition, PHP, MySQL, REST APIs*

- Implemented a cross-device voice assistant using **Python's SpeechRecognition module** to process system commands.
- Established secure **REST APIs** enabling real-time remote control of laptops and PCs via browser-based web interfaces.
- Configured a **PHP-MySQL** backend with encrypted storage supporting authentication, synchronization, and routing.

EXTRACURRICULAR ACTIVITIES

Google Developers Student Club

Aug 2022 - May 2025

- Led technical workshops and coding events that expanded student engagement and strengthened the community.
- Coordinated team collaborations that improved event workflows and strengthened peer knowledge sharing.
