SUMMARY

Data Analytics professional with 3 years of experience using SQL, Python, and data visualization to drive decision-making and optimize business processes. Adept at uncovering insights, enhancing efficiency, and driving performance improvements.

EDUCATION

Pennsylvania State University

State College, PA

Master of Business Analytics (GPA: 3.87/4.0)

Aug 2023 - Aug 2024

Coursework: Data Management, Data Visualization, Predictive Analytics, Prescriptive Analytics, Data Mining for Business

Activities: Learning Assistant- Intro to Programming (Python), Consulting Training Program, Super Analytics Challenge 2024 Team

PROFESSIONAL EXPERIENCE

Business Associate, Meritus Intelytics Private Limited

Oct 2022 – Aug 2023

Revenue Cycle Management (Healthcare Client)

- Provided business insights to the C-suite executives by analyzing the Protected Health Information and utilizing data modeling and reporting dashboards in Power BI.
- **A/R:** Detailed a comprehensive picture of accounts receivable to identify the bottlenecks in the revenue cycle and provided an actionable overview to enhance operational efficiency. This helped in maintaining a sustainable cash flow by reducing the A/R by \$4M (~13%) and stabilize the journey out of bankruptcy.
- **Claims:** Built a claim denial prediction model and claims management dashboard with KPIs by analyzing the electronic health records and 835 response files and provided actionable insights to reduce the denial amount by ~20% within 3 months.
- **Statistical Analysis:** Conducted paired t-tests on patient survey data to assess the effectiveness of medical services across a diverse population. Identified groups with statistically insignificant difference and recommended different medical approaches.
- **Process Optimization:** Fully streamlined the daily and weekly business performance reports using Power Automate to free up ~30% bandwidth of the team members to work on value-added ad-hoc work streams.

Sales Officer, Hindustan Petroleum Corporation Limited

Sep 2020- Sep 2022

Product Analytics and Marketing

- In charge of 70 petroleum retail dealerships providing motoring public with petroleum products.
- Implemented A/B testing to analyze the effectiveness of promotional strategies optimizing pricing models and dealer incentives, increasing fuel sales by 5% and diesel customer retention by 3.4% by targeting the most effective solutions.
- Increased the company's market share by 2.95% in gasoline and 0.32% in diesel by providing new business solutions to the dealers after analyzing the customer segment behaviors, monetary impact, and automation data of the forecourt utilization.
- Validated the commercial viability of scouted new locations using a GIS-driven model to set up new dealerships and increased the network share by 5%.

Research and Development Intern, Pal ReMaterials Private Limited

May 2019- July 2019

- Designed and trained a logistic regression model based on 1000 randomly selected samples to predict if the raw material's warpage is within limits for the end product.
- Deployed the model in the production line resulting in a cost reduction of 8% in raw materials and operational expenses

SKILLS

Programming: Python, SQL, DAX, VBA, R, MATLAB, MDX, Latex

Frameworks/Libraries: PyTorch, PySpark, Scikit-Learn, Pandas, NumPy, Matplotlib, Seaborn

Database/Tools/Cloud: MS SQL Server, NoSQL, Power BI, Tableau, MS Excel, MS Office Suite, RapidMiner, AWS EC2, Athena, Glue

CORE Skills: Business Insights, Machine Learning, ETL Techniques, Statistical Modelling, Deep Learning, A/B Testing

SOFT Skills: Problem-Solving, Critical Thinking, Communication, Team Player, Adaptability, Attention to Detail, Curiosity, Storytelling

TECHNICAL PROJECTS

Airline Analytics (SSMS, Jupyter Notebook, Tableau)

- Performed data preprocessing and feature engineering techniques on a huge airline dataset to provide a recommendation.
- Built a multivariate linear regression model using the scikit-learn library in Python to predict the sales revenue of the airline and achieved an R-squared value of 0.87.
- Developed an interactive Tableau dashboard to dive deep and identify avenues to increase the fleet's operational efficiency.
- Proposed a recommendation to change flights in 10 routes to increase the profit by 4.5% and revenue per seat by 15%.
