SUMMARY

Dedicated and passionate Analytics professional driven to uncover insights and drive business growth through data analysis, storytelling, and strategic recommendations. With a keen interest in the intersection of data and business, I leverage technical skills in SQL, Python, and R to deliver actionable insights that inform decision-making and propel organizational success. Eager to join a dynamic team at Toyota Financial Services, where I can utilize my analytical expertise to drive innovation and excellence.

TECHNICAL SKILLS

- **Tools:** Python, MySQL, R, Power Bi, Tableau, Snowflake, Advanced MS Excel, AWS, Looker, PostgreSQL, My SQL Server
- **Skills:** Storytelling, Data Manipulation, Problem-Solving, Analytical Thinking, Data Cleaning, Data Modeling

PROFESSIONAL EXPERIENCE

Dining Hall West (The University of Texas at Dallas) | Data Analyst

Aug 2023 - Jul 2024

- Developed and monitored performance dashboards using Excel and SQL that aligned with stakeholder KPI needs, improving data reporting effectiveness.
- Implemented data cleansing and transformation strategies in SQL and Excel, enhancing dataset quality which reduced wait times by 30% during peak periods.
- Performed DAX calculations for comprehensive consumer preference analysis, providing actionable insights that enriched menu diversity and increased customer satisfaction by 40%.
- Collaborated with stakeholders to consolidate diverse data sources and ensure accurate insight generation for 20+ regular reports.
- Utilized VLOOKUP and XLOOKUP functions to evaluate feedback data and pinpoint essential areas for enhancement, leading to actionable insights for strategic improvements

Cognizant | Data Analyst

Feb 2020 - Nov 2022

- Enhanced Oracle database scalability and query efficiency through optimized Joins and procedures redesign, improving performance by 40%.
- Executed trend analysis and identified solutions for business challenges using Excel, reducing ServiceNow ticket volumes related to Blue Yonder users by 50%.
- Enhanced data integrity and functionality by 80% using improved testing protocols which optimized data accessibility and report generation for stakeholders.

Vijaya Hospitals | Business Intelligence Analyst Intern

May 2019 - Jul 2019

- Led the design and implementation of interactive dashboards using Tableau, enhancing the monitoring of Key Performance Indicators for patient care and resulting in a 25% increase in actionable insights for nursing staff.
- Utilized advanced data analysis techniques, including data mining and statistical modeling, to identify trends in patient care data, achieving a 15% increase in operational efficiency through improved scheduling and resource allocation.
- Conducted regression analyses and hypothesis testing using Python's scikit-learn library to evaluate the efficacy of treatment protocols, resulting in a 5% improvement in patient recovery rates over a three-month period.

ACADEMIC PROJECT EXPERIENCE

Papallo Hospital Patient Care Insights using Power BI

- Designed a comprehensive Power BI data model that incorporated data cleaning and transformation techniques, optimizing performance and usability, which resulted in a 30% increase in report generation speed.
- Executed DAX calculations to categorize patient satisfaction levels, which improved reporting precision by 25%, supporting informed decision-making for stakeholders.
- Utilized pivot tables in Power BI to perform in-depth analysis of bed occupancy, revealing that 60% of private ward beds were occupied and aiding resource distribution.

Predictive Analytics for Customer Churn in OTT Platform

- Conducted an extensive analysis utilizing R to assess the influence of various subscription models on subscriber churn, uncovering a 25% churn rate among certain segments, prompting a focus on targeted retention initiatives.
- Analyzed viewer trends and retention, finding that a 10% reduction in viewing time resulted in a 15% rise in churn rates, underscoring the significance of user engagement.

EDUCATION

The University of Texas at Dallas

Jan 2023 - Dec 2024

Master of Science, Business Analytics and AI (GPA: 3.83)

Coursework: Advance Statistics for Data Science, Applied Machine learning, Data Vizualization, Database Foundations, Business analytics with R, Python, Healthcare Informatics

GITAM University

Jun 2016 - Jul 2020

Bachelor of Engineering, Computer Science and Engineering (GPA: 3.9)
