QA Manual Testing

E-mail: bijjamravindrareddy1999@gmail.com

Phone. No: +1 (928) 981-0633

PROFESSIONAL EXPERIENCE

- Detail-oriented Manual Test Engineer with over 3+ years of experience in designing and executing comprehensive test cases and test scripts for both manual and automated testing.
- Proficient in a range of testing methodologies, including functional, integration, and performance testing, with a strong focus on mobile application testing across Android and iOS platforms.
- Good experience in creating test scripts using Web-driver, Selenium RC, Selenium-IDE, Selenium Grid in Java.
- Good experience in Data Driven and Hybrid Testing.
- Experience in Functional, Regression and System testing using Manual and Automated testing tools - selenium Web-driver.
- Proven track record of collaborating effectively within Agile teams to enhance software quality and improve testing efficiency, resulting in significant reductions in testing time and increased accuracy.
- Experienced in utilizing tools like Selenium, Appium, and JIRA for test automation and defect tracking. Adept at communicating complex technical concepts clearly and providing mentors-hip to junior team members.
- Committed to delivering high-quality software solutions that meet client requirements and industry standards
- Extensive experience in designing Test Cases, Test Scenarios, Test Scripts and Test reports of manual and automated tests.
- Excellent knowledge and working experience in Android SDK, Eclipse IDE, Android Studio, Application Stack and Android Architecture.
- odologies

EDUCATION

- Bachelors in Kalasalingam University, India (2021).
- Masters in Indiana Wesleyan University, USA (2024).

TECHNICAL SKILLS

Testing Methodologies	Manual Testing, Automated Testing, Black Box Testing, White Box Testing
Scripting Languages	JavaScript, CSS, HTML,Bootstrap
Test Case Management	Test Case Design, Test Case Execution, Defect Reporting
Automation Tools	Selenium, Appium, UFT, Cucumber BDD
Programming Languages	Java,Python,SQL
Testing Tools	JIRA, HP Quality Center, Apache, Postman
Performance Testing	Load Testing, Stress Testing
Agile Methodologies	Scrum, Kanban, Agile Ceremonies
Database Testing	Data Validation, SQL Queries, Database Applications
Environment Setup	Testing Environment Setup, Test Data Management
Documentation	Test Plans, Test Reports, User Manuals
Communication Tools	Version One, Microsoft Office Suite
Mobile Testing	Android SDK, iOS Simulator, Cross-Platform Testing

WORK EXPERIENCE

Role: QA Manual Test Engineer

EMC Insurance Group Inc| | Des Moines,Iowa

July 2024 to Present

Responsibilities:

- Championed and drove the implementation of best practices for automated testing, ensuring QA team adhered to high-quality standards.
- Reviewing and updating Test Cases as per requirement for different releases.
- Involved in project from the kick off phase.
- Involved in end-to-end testing of the Mobile Applications.
- Involved in Sanity/Smoke testing, Integration testing, Localization Testing, Performance Testing, device testing, UAT and Regression Testing.
- Testing of chat conversations, Send/Receive Picture messages, sending SMS from chat, calling from the conversation.
- Bugs reporting on bug tracking tool & updating the status of the bugs.
- Designed, executed and maintained Selenium Web Driver (TestNG, J Unit) automated test cases for regression test cases.
- Selected the Test Cases to be automated and performed functional testing of the front end using Selenium (IDE and Web Driver) & created Data Driven framework using J Unit.
- Executed parallel browser testing on various machines using Selenium Grid and performed cross browser testing.
- Performing Regression test using automated testing tool QTP, Fitness e and Selenium.
- Involved in regular discussions with developers regarding defects.
- Provide testing Status Reports.
- Performed compatibility testing with various Confidential mobile handsets to ensure that functionality works fine.
- Involved in the user acceptance testing to make sure that the application should work according to the client requirements.
- Played an active participant role in testing of the sync related applications to identify more defects.

- Facilitated Agile ceremonies such as daily stand-ups, sprint planning, sprint retrospectives, demos, and reviews, to ensure all objectives were met and the project progressed on schedule.
- Improved overall API performance, scalability, and security by performing comprehensive
- performance and security testing, identifying and resolving critical issues before release.
- Collaborated with the development team to implement automated testing, reducing testing-time by 50% and improving overall testing accuracy by 25%.
- Provided guidance and training to team members on Agile practices and best practices.
- Monitored and improved Agile processes based on regular feedback.
- Designed and executed automation tests for complex API tests, including both back-end and UI-based components, increasing test coverage by 45%
- Developed and maintained automated testing documentation, including test scenarios, test plans, and requirements, improving project transparency.
- Improved overall test accuracy and efficiency by participating in code reviews, ensuring coding standards and best practices were met and followed.
- Updated existing scripts by parameterize which results in maintenance of the code by 50%.
- Developed sprint goals, staffing plans, and metrics to accurately measure sprint progress, ensuring successful completion of projects according to deadlines.
- Effectively monitored results of automated tests and maintained databases of results for further analysis.
- Sending Sign-off email after completing testing for releases.

Environment: J2ME, HTML, Oracle 11i, XML, Apache

Role: QA Manual Test

T-Mobile | Bellevue , Washington

May 2023 to June 2024

Responsibilities:

- Working on an agile development environment – consisting of many iterative releases with extensive co-ordination between the developers, testers and the business analysts.
- Planned, designed, executed test cases for automated test and manual test to support maintenance releases for multiple web-based applications using Cucumber BDD Approach.
- Experience in testing native applications on iPhone, Android and iPod devices manually.
- Expertise in performing Manual testing & Mobile Application Testing using Appium.
- Used Emulators and IOS simulators to perform the manual Mobile Testing.
- Performed usability, cross platform, accessibility, UI testing on Android and IOS platforms.
- Manual Execution of Test Cases for Functional Testing, GUI Testing, Regression Testing, Smoke testing.
- Developed and Executed Automation and Manual test cases for Functional testing of various modules of the application.
- Performed Manual testing, Mobile Testing and Black box testing methods -Functional, Integration, System and Acceptance.
- Wrote and executed automated test cases using Selenium RC to automate manual testing solutions.
- Analyzed test specifications and converted them into Manual Test Cases.
- Attending grooming, test planning, Daily Scrum, Iteration Planning and Release Planning Meetings and retro meeting.
- Setup testing environments and prepare test data for testing flows to validate and prove positive and negative cases.
- Pushed defects in Version one with defect type, priority, and detail information about the defect and route it to the specified application group.
- Created and enhanced numerous test scripts to handle changes in the objects, in the tested application's GUI and in the testing environment using Selenium RC.
- Created whole test framework using Selenium for further test creation and execution.
- Regression test cases were written and automated using Selenium RC.
- Provide exploratory testing for the systems.
- Write and execute test cases manually.
- Provide recommendations to improve the development process.
- Provide guidance and Supervision to more junior testers.

- Knowledge Jira -defect tracking tool and test case management tool.
- Provide consistent and clear status in verbal and written communications.
- Write clear and concise defect reports.
- Assists and cooperate with co-workers, supervisor and management.
- Partner with Development Manager in collaborating between engineers and QA Performs all duties in accordance with established Company goals.
- Perform technical analysis to identify the scope and schedule for upcoming projects and individual work items.
- Participating in all aspects of product testing, including test plan development, execution and delivery of well-tested solutions with short time to release.
- Independently analyzes issues, recommends software changes and writes detailed bug reports.
- Creates and maintains ownership of test cases and test results throughout SDLC .
- Provides the highest level of customer service to customers, whether these are current or prospective clients of the Company, vendors, staff, business partners or visitors.

Environment: Cucumber BDD, Jira, QA Performs, SDLC.

Role: Manual Tester

Metamor Software Solution | India

Jan2021 to Nov2022

Responsibilities:

- Extensively involved in all stages of testing life cycle, Software Development Life cycle (SDLC) using Waterfall, Agile methodologies.
- Developed Test cases for manual testing.
- Manually verified the validity of the failed test cases. Performed Positive, Negative, Black box testing and White Box Testing on the application.
- Prepared user manual and performed user acceptance testing.
- Functional and Cross Browser Testing of Defined Browser Stack of the site experience.
- Performed execution and logging defect in Quality Center and Verification of defects for System Testing
- Conducted Smoke testing, Functional testing, Regression testing, Integration testing, User Acceptance Testing (UAT), Data validation testing and used JIRA as Bug tracking tool.
- Testing Data warehouse and Database applications for client.
- Designed, and implemented Data Driven Framework By using UFT.
- Worked closely with the developers to resolve the design and development errors and to get the software released for system testing.
- Prepare Test Plan and Identify Test Cases.
- Worked in Telecommute Order Management and Life cycle including Provisioning and Service Activation.
- Prepare Quality Center for test execution and defect management Test Data Management, Test Execution.
- Working as a manual tester for JIO dot com website. Have done the simulator testing in browser stack for different breakpoints like mobile, tablet and desktops.
- Worked closely with Product Owners, Scrum master, Developers, Business Analysts and UI teams attended Vision calls and elaboration calls to understand the complete requirements for functional, integration and database testing.
- Attended release planning meeting, sprint planning meeting, story sizing meeting, and retrospective meeting.

Environment: Manual, HP Quality Center/ALM, Jira, UFT, QTP, Firebug, Putty, Oracle, UNIX, Windows, Version One, Browser stack, SQL Server, MS Word, MS Excel, MS PowerPoint, Page Object Model, Postman, POM, Data Driven Framework, X Path, Web Services, Agile, Apache, Internet Explorer, Firefox, Chrome.
