Andhra Pradesh, India
Graduated: Sep 2020

PROFESSIONAL EXPERIENCE

Northern Illinois University

Dekalb, Illinois

Business Analyst Intern

Jan 2024 – Aug 2024

- Developed test cases, business cases, Jira User Stories, created test plans, Data analysis, user requirements analysis and coordinated the overall test execution with technical documentation.
- Strong experience and vision working in fast-paced Agile/Scrum environments, participating in daily stand-ups, status calls, sprint planning, and retrospectives to ensure smooth project progression.
- Worked according to the activities/roles laid down in roadmap of each phase in software development life cycle (SDLC) and helped in development of applications to improve business process management for Supply Chain operations.
- Designed and build solutions with stakeholders and worked closely with both development and devops teams to improve quality of the application integration by actively participating in risk management and User Acceptance Testing and regression testing (UAT).
- Utilized advanced Microsoft excel skills, including pivot tables, to prepare and analyze reports on key project metrics, identifying opportunities for continuous improvement and offering problem-solving solutions by regulatory monitoring.
- Managed end to end change Requests and led production migrations, ensuring a seamless transition to live environments.
- Prioritized business issues and initiatives by in depth understanding of business processes in close collaboration with cross functional management, setting team direction and guaranteeing timely execution of outstanding results.

Northern Illinois University

Dekalb, Illinois

Graduate Teaching Assistant

Aug 2023 – Dec 2023

- Guided students through the intricacies of the Software Development Life Cycle (SDLC), encompassing analysis, innovation, design, testing, implementation, and project management phases, enabling them to excel in their academic project pursuits.
- Offered mentorship with excellent decision-making and analytical skills and delivered unwavering academic support to a cohort of 100+ students, conducting regular office hours and ensuring prompt email responses to guarantee a comprehensive grasp of course content, assignments, and homework, with a particular focus on project management concepts.
- Graded assignments and worked one-on-one with students during office hours to assist them with questions, while also identifying student learning obstacles, with a specific emphasis on project management techniques, to improve their overall performance by a remarkable 50%.

Northern Illinois University

Dekalb, Illinois

Graduate Research Assistant

Jan 2023 - Dec 2023

- Gathered and established guidelines for the training data sets used across a set of 100 research programs increasing the quality of results by 40%.
- Conducted strategic Data Analysis and data validation using python over 75,000 Bloomberg Supply Chain sets to help define 2020 market opportunity & trends; decreased average analysis time by 25%.
- Provided training and recommendations to 50 research assistants on data collection best practices & processes, resulting in reduced errors by 30%.
- Examined and processed a vast dataset of health-related information sourced from website content management systems (CMS), totaling over 100K records, to discern key insights into health trends and opportunities from the year 2013 to 2022; concurrently, streamlined the average data analysis and cleaning time by an impressive 50%.
- Conducted in-depth statistical analysis of large datasets, improving data accuracy and delivering insights that informed strategic decision-making.

Infosys Private Limited

Hyderabad, Telangana

Business Systems Analyst

Nov 2018 - Jul 2022

- Gathered user and business requirements through interviews, surveys, prototyping and observing from account managers and UI (User Interface) of the existing system contributing to business objectives.
- Developed business strategies and Full Life Cycle documentation from product requirements in the developmental stage to functional specifications for the completed modules of application components.
- Designed and implemented integrations between Supply Chain systems and internal/third-party systems for seamless data flow.
- Monitored and resolved errors in system integrations, ensuring uninterrupted data exchange and communication.
- Participated in system upgrades and releases, testing new features to maintain system reliability and usability.
- Generated standard and ad hoc reports to support Supply Chain and operational decision-making.
- Conducted regular audits to ensure compliance with data privacy and security policies, supporting audit preparations.
- Maintained detailed documentation of system configurations, customizations, and integrations for reference and compliance.
- Proposed and implemented continuous improvements to Supply Chain systems, leveraging best practices and community insights.
- Experience in organizing Joint Application Development (AD), Interviews, Workshops and Requirement elicitation sessions to communicate with stakeholders and team members enhance organizational skills.
- Leveraged and used PeopleSoft's Customer Relationship Management (CRM) tool to access information about customers and Human Resource Management System (HRM) to implement formalize selection, evaluation and payroll systems.

- Extensive experience with leading HCM platforms, including SAP SuccessFactors, PeopleSoft, and Workday, managing core HR functions such as payroll, recruitment, employee data management, and compliance.
- Created ad-hoc reports for supply chain operation needs and analyzed reports on important project metrics using advanced Excel skills, including pivot tables, VLOOKUP, XLOOKUP, INDEX MATCH. This allowed me to identify areas for continuous improvement while offering Problem solving and troubleshooting solutions.
- Worked with relational databases such as SQL Server, PostgreSQL, MySQL to support business administration.
- Applied People Analytics methodologies to drive data-driven decision-making, improving the accuracy of strategic HR forecasting and employee evaluations.
- Conducted fast paced in-depth analysis to validate customer needs and market trends to align project objectives with customer expectations, driving successful execution across multiple transactions in a fast-paced environment.
- Managed full-scale SAP SuccessFactors implementations, ensuring seamless integration and data migration within Employee Central, both in functional and technical capacities.
- Hands-on experience with ServiceNow, Data migration processes, ensuring integrity and accuracy during system transitions and implementations.
