EXPERIENCE

CHANGING THE PRESENT

Mar 2024 – Present

Data Analytics Intern

- Delivered strategic business development consultations to 10+ companies by analyzing data and identifying growth opportunities, improving operational efficiency.
- Applied advanced data analysis techniques to uncover actionable insights, resulting in a 20% improvement in market expansion strategies and competitive positioning.
- Collaborated with internal teams and 5+ external clients to design and implement data-driven strategies, ensuring effective execution and measurable business outcomes.
- Produced 25+ detailed reports, dynamic data visualizations, and presentations tailored to clients, facilitating data-informed decision-making, which improved client satisfaction.

GOLDMAN SACHS

Oct 2021 – Jul 2022

Data Analyst- Fraud Detection and Prevention

- Enhanced dashboard reporting by tracking KPIs, KRIs, and CEIs with 95% accuracy and improving overall efficiency in fraud detection.
- Conducted 50+ ad-hoc data analysis tasks to identify trends and anomalies, providing actionable insights that led to a 10% reduction in fraud-related incidents.
- Leveraged SQL, Tableau, and Excel to design dynamic, user-friendly dashboards, improving fraud monitoring capabilities and reporting performance by 20%.
- Analyzed large datasets to uncover hidden patterns, contributing to fraud prevention strategies that reduced financial losses by \$2 million annually.
- Managed the delivery of 30+ weekly, monthly, and quarterly reports, collaborating with engineering and product teams to streamline reporting tools and processes.
- Fostered strong relationships with 10+ internal stakeholders, recommending and implementing process improvements that optimized workflows and enhanced personal reporting efficiency by 15%.

AMAZON

Sept 2020 – Sept 2021

Data Analyst - Transaction Risk

- Led investigations into 200+ suspicious transactions, identifying and mitigating financial, legal, and reputational risks across global markets, preventing losses of \$1.5 million.
- Applied standard operating procedures to ensure consistent decision-making, successfully identifying emerging fraud patterns that decreased risk exposure by 30%.
- Collaborated with cross-functional teams, including 5+ financial institutions, to resolve risk-related issues, improving fraud prevention measures and reducing fraud-related customer complaints.
- Consistently met or exceeded performance targets, completing 98% of investigations on time while adapting to the fast-paced work environment.
- Identified and implemented process improvements that enhanced customer experience and streamlined operations through research on 150+ complex transactions.

SKILLS

Programming Languages	Python, SQL, R, MATLAB, Tableau, Power BI, Databricks
Data Analytics	Data Mining, Predictive Analysis, Anomaly Detection, KPI Monitoring, Statistical Modeling
Machine Learning	Feature Engineering, Time Series Analysis, Deep Learning, Model Optimization
Advanced Analysis	Regression Analysis, Hypothesis Testing, Experimental Design, Descriptive & Inferential Statistics
Business Intelligence	Dashboard Development, Data Visualization, BI Solutions, FinTech Analytics, Fraud Detection

EDUCATION

BOSTON UNIVERSITY

Sept 2022 - Jan 2024

Master of Science, Applied Data Analytics

Boston, MA

VELLORE INSTITUTE OF TECHNOLOGY

Jul 2016 - May 2020

Bachelor of Technology, Electronics and Communication Engineering

Chennai, India

PROJECT

Financial Loan Risk Assessment Model

- Developed a Python-based predictive model to assess loan default risk for a banking client, achieving 85% accuracy in identifying high-risk applicants.
- Conducted feature engineering and statistical analysis to enhance model precision and built a Tableau dashboard to visualize risk factors, improving risk assessment speed by 25% and supporting data-driven decision-making.

Healthcare Patient Readmission Analysis

- Analyzed 50K+ patient records to predict readmission risks using logistic regression and time series analysis in Python, reducing readmission rates by 20%.
- Built a Power BI dashboard to display trends and key risk indicators, aiding healthcare administrators in effective resource planning.
