

SUVARNA SREE NRUSIMHADEVARA

205-422-0395 | snrusimh@uab.edu | [Linkedin](#) | [Github](#) | Birmingham AL USA

EDUCATION

University of Alabama at Birmingham

Birmingham AL USA

Masters in Computer Science

Jan 2024 - Present

Relevant Coursework: Machine Learning, Systems Programming, Deep Learning, Advanced Algorithms

DBCE Goa University

Goa, India

Bachelors in Computer Engineering

July 2017 - July 2021

Relevant Coursework: C++ , OOPS, Data Structures and Algorithms, Statistics, Database Systems, Java Programming

WORK EXPERIENCE

Arora Translational Labs

Birmingham AL USA

Volunteer

June 2025 - Present

- Worked on developing generative adversarial networks (GANs), to translate raw ultrasound frames into clinically meaningful biplane views for cardiac analysis.
- Analysed and implemented deep learning techniques such as UNet architectures for semantic segmentation and image reconstruction tasks, improving interpretability of echocardiographic video frames.

DND Lab (Digitization and Digital Services)

Birmingham AL USA

Student Assistant

Feb 2024 – Present

- Digitized an average of 400 pages per week of rare historical and cultural heritage materials.
- Trained and coordinated with new team members assisting them with the preservation process which increased the speed of project completion by 50%.
- Ensured careful handling of fragile materials to prevent damage.
- Assisted with Python scripting , ms word and ms excel for data manipulation and other technical methods needed for the preservation process, increasing project completion speed by 29%.

Pivotree Inc.

Bangalore, India

Software Consultant

Mar 2022 – Aug 2023

- Worked as a Software Engineer on Order Management System (OMS) using Java 8 and GraphQL.
- Fixed order lifecycle bugs and implemented additional features using Java and GraphQL.
- Showcased problem-solving skills by developing Python scripts to automate the order-fixing process in an agile environment.
- Manipulated and performed Data analysis using Excel functions such as VLOOKUP, pivot tables, and conditional formatting.
- Collaborated with clients like Psycho-Bunny, ALDO, and Treasury Wine Estates.
- Led a team of 3 engineers, handling team planning, client communication, and strategic execution.

Bridge Solutions Group India (later renamed Pivotree Inc)

Bangalore, India

Intern

Mar 2021 – Mar 2022

- Gained experience with Fluent (OMS tool) and GraphQL.
- Performed basic operations on order management data.

PROJECTS

Face Recognition System on AWS Cloud

Technologies: AWS Amplify, Lambda, DynamoDB, IAM, Python

- Designed and deployed a face recognition application using AWS cloud services that identifies individuals from a set of pre-stored facial images.
- Integrated AWS Amplify for frontend deployment and API management, AWS Lambda for serverless backend logic, and DynamoDB to store and retrieve facial data.
- Implemented secure access using IAM roles and policies, ensuring proper permissions for data handling and execution.
- Improved system efficiency by 10% through optimizing Lambda function execution and response times.

Electricity Billing System using Java and SQL

Technologies: Java, MySQL

- Developed a desktop-based billing management system to automate customer data handling and billing processes.
- Integrated MySQL for secure data storage and retrieval, and optimized backend logic to improve application efficiency by 30%.
- Ensured robustness and scalability by modularizing code and implementing error handling mechanisms.

Electricity Consumption Forecasting Project

Technologies: Kaggle dataset, Python, Pandas, Matplotlib, Statsmodels (MachineLearning)

- Engineered and implemented a time series forecasting model to predict electricity consumption using historical Kaggle data.
- Preprocessed the data and analyzed data stationarity using the Augmented Dickey-Fuller (ADF) test and applied differencing to stabilize statistical properties over time.
- Constructed and fine-tuned an ARIMA ML model using machine learning techniques to forecast future electricity consumption based on stationary time series input which improved the performance of the model by 53.5%.
- Visualized consumption trends and forecasts using line plots to uncover patterns, seasonality, and support insights.

CERTIFICATIONS

- AWS Certified Cloud Practitioner by AWS
- Linux OS by Illinois Institute of Technology.
- Introduction to AI and ML by Google Cloud.

EXTRACURRICULAR ACTIVITIES

- Organized Code-It-Blind intercollegiate coding event where the participants were asked to code with the screen off. Was actively involved in organising the event right from coming up with questions shortlisting candidates to reviewing the results.
- Secured sponsorships for INSPIRUS intercollegiate events.
- Active participant in UAB Hindu Yuva and UAB ACM workshops which organises LeetCode nights.
- Assisted organizing as well as attended tech meetups for networking with CEO's of tech companies.
- Participated in non-tech hackathon organised by innovation depot Birmingham AL

SKILLS & INTERESTS

Skills : Java | Python | SQL | GraphQL | AWS | C++ | Machine Learning | HTML | CSS | Javascript | MS Excel
MS Word | Computer Vision | OpenCV | REST API

Interests : Networking and Communicating with people, Team Management and Leadership, Passionate about Music, Art & Nature, Volunteering
