CAREER OBJECTIVE

A experienced Analyst with expertise in distribution systems and claims analysis, skilled in data-driven decision-making using SQL, Power BI, and Tableau Proven track record in optimizing warehouse management systems, ensuring claims accuracy, and collaborating cross-functionally to support supply chain and healthcare operations

SKILLS

Data Analytics | Business Intelligence Tools | ETL Tools

Power BI DAX | Tableau | Alteryx | Google Sheets | Microsoft Excel | Microsoft Office Suite | SQL | Dataiku | Power Automate | JIRA | Visio

Programming & Scripting Languages

Python | R Programming

Cloud & Data Infrastructure

Data Analysis and Insights | Data Science | Statistical Analysis | AI & ML Modeling | Data Manipulation | Data Visualization | Process Improvement | Innovation | Reporting Automation | Cross-functional Collaboration | Financial Compliance | Data Warehousing | Agile Methodologies

EDUCATION

Southern Methodist University, Cox School of Business

Dallas, Texas

Master of Science in Business Analytics

May 2023

EXPERIENCE

Delta Global Services, LLC

Dallas, Texas

Business Intelligence Analyst

July 2023 – Present

- Conducted in-depth data analysis across distribution operations using warehouse and supply chain data, identifying efficiency opportunities and uncovering business insights to drive operational growth
- Ensured data accuracy and integrity by performing meticulous reviews, refining datasets, and ensuring error-free reporting before analysis
- Developed actionable, data-driven recommendations for warehouse and distribution performance improvements, boosting operational efficiency and aligning with strategic business goals
- Proficient in using SQL for querying and analyzing relational databases, which is essential for extracting and manipulating data
- Collaborated closely with cross-functional teams across supply chain, planning, customer service, and IT, optimizing end-to-end processes and ensuring alignment with business requirements
- Provided insights on warehouse management system (WMS) implementation, supporting decision-making on functionality and key design considerations for improved infrastructure
- Analyzed supply chain and distribution data to recommend SKU optimization and inventory management strategies, enhancing product availability and supporting customer growth
- Spearheaded strategic initiatives, taking on cross-functional projects aligned with distribution transformation goals and process automation
- Mentored and coached junior analysts, sharing expertise in analytical methodologies, tools SQL, Power BI, Tableau, and best practices for high-impact reporting
- Utilized advanced Excel, PowerPoint, and SharePoint skills to produce impactful presentations and summaries, influencing key business decisions and supporting go-to-market strategies
- Implemented an automated reporting system using Power BI and Excel, incorporating VBA macros to streamline performance reporting and provide real-time insights into key performance indicators (KPIs) for the E-commerce platform.
- Supported the integration of a new payment gateway, working closely with the development team and using tools such as Postman for API testing to ensure seamless functionality and compliance with security standards

North Texas Food Bank

Dallas, Texas

Data Analyst Intern

Jan 2023 - April 2023

- Leveraged APIs for data scraping, rectified inaccuracies, used advanced analytics in R Studio, used Alteryx to extract and map data for a 13-county service area
- Collaborated with cross-functional teams, including merchants, logistics, production and suppliers, to ensure accurate data management and support business initiatives to create supply route
- Developed 100+ graphs/maps & 20+ Tableau and Power BI dashboards identified food access gaps, provided insights for supply chain, operations, vendor, customers and teams
- Utilized SQL window functions to define food swamp & food desert created a food access map for operational insights, and logistical plans in rural areas
- Collaborated to correlate food insecurity with disability & unemployment rates, provided business recommendations & influenced stakeholders for 5 new agencies

Here Technologies

Mumbai, India

Spatial Data Analyst II

Jun 2019 - Jul 2022

- Leveraged Postgre SQL for geospatial data analysis and automated mapping using MS SQL queries and Advanced SQL techniques to optimize location data processing

- Proficiently managed GIS datasets, applying diverse models including Random Forest, Decision Tree, K-Mean, Cluster Analysis & Neural Network in Python
- Utilized Python libraries such as Numpy, Keras, Theano, Pandas, PyTorch, Scipy, Seaborn, Matplotlib, Scikit-learn, and TensorFlow for geospatial data modeling
- Conducted regression, correlation, and covariance analyses, demonstrating proficiency in multivariate analysis and the application of advanced statistical concepts
- Applied discrete event simulation and predictive analytics techniques, using R Studio for data mining, further enhancing analytical auditing, and/or forecasting
- Practiced agile methodology, implemented best practices from A/B/C testing for process, product, and tool improvements, leading R&D to enhance map features

Hinduja Global Solution
Process Consultant Intern

Mumbai, India
Apr 2017 - Oct 2018

- Reviewed and adjudicated insurance claims by analyzing claims processing policies, guidelines, and provider contracts, ensuring accurate and timely claim resolutions
- Conducted in-depth investigations into claims, validating details such as claim ID, date of service, refund amount, and reason for overpayment, ensuring compliance with standards
- Analyzed historical overpayment trends and claims data to identify outliers and potential discrepancies, driving improvements in claims accuracy
- Collaborated with internal departments and insurance adjusters to gather necessary documentation insights, supporting comprehensive claim evaluations
- Calculated correct payment amounts for claims, ensuring consistency with policy coverage and contract terms
- Maintained detailed records and documentation for claims and related communications, contributing to efficient claims tracking and audit
- Managed and tracked overpayment projects with a strong emphasis on organization & adherence to timelines, improving project completion rates
- Leveraged MS Excel and SQL for data analysis and reporting, delivering insights and updates on claims processing and overpayment projects
- Utilized claims management software to streamline processing, improve data accuracy, and support error-free claims adjudication
- Demonstrated expertise in US healthcare claims processing with strong communication skills for effective client interactions & collaborative work
- Ensured adherence to client and company policies without exceptions, upholding ethical standards and maintaining confidentiality

PROJECTS

Data Visualization, SMU

Aug 2022

- Spearheaded a comprehensive analytics project for the HR Manager at the Production Company to enhance understanding of departmental performance
- Applied Alteryx for seamless data integration and utilized Tableau for impactful visualization, contributing to informed and strategic decision-making processes

Database Management & R Shiny App, SMU

Oct 2022

- Engineered a robust SQL database using SSMS for student housing with data interaction within an R Shiny App; expertly constructed & managed SQL tables
- Leveraged expertise in development to design an R Shiny app with advanced CRUD operations for seamless data management, ETL and user interaction

Data Driven Marketing, SMU

March 2023

- A/B testing, Naive Bayes & clustering methods to the effective promotional strategy for enhancing ticket and concession revenue for the Dallas Stars hockey team
- Employed statistical analysis, Multivariate, Bayesian, Predictive Modeling, and Hypothesis Testing ANOVA, Welch's T-test, Chi-Square and Proportion tests

CERTIFICATION

PwC Switzerland and Forage – Alteryx | Power BI Dashboards & DAX

New world. New skills: PowerBI Virtual Case Experience

UDACITY - SQL

SQL for Data Analysis

KPMG and Forage – Python | SQL | Tableau

Data Analytics Consulting Virtual Internship
