Experience

DATA ANALYST | START-UPP LLC | NEWJERSEY, USA | AUG 2024 – JAN 2025

- Implemented automated data pipelines that reduced reporting latency by 35%.
- Conducted exploratory data analysis (EDA) to uncover customer behavior trends and support business strategy.
- Visualized KPIs through dashboards and reports to provide real-time insights to stakeholders.
- Collaborated with product managers to translate data into actionable recommendations for growth.

DATA ANALYST | MINDTREE | HYDERABAD, INDIA | MAY 2022 – JUN 2023

- Engineered and optimized ETL pipelines using Azure Data Factory and Databricks to process structured and unstructured data.
- Validated datasets through rigorous quality checks, ensuring accuracy for reporting and analytics.
- Created SQL queries and Power BI dashboards to monitor KPIs and support data-driven decision-making.
- Streamlined reporting workflows, reducing data processing time by 70%.

DATA ANALYST INTERN | ROBOKALAM | WARANGAL, INDIA | JAN 2022 – APR 2022

- Analyzed student performance datasets to identify trends and optimize teaching modules.
- Developed Python-based data workflows with Pandas and scikit-learn to track engagement in workshops.
- Designed interactive dashboards in Power BI to measure adoption rates, boosting retention by 30%.
- Delivered actionable insights that improved curriculum design and student learning outcomes.

Projects

- **Public Perception of Renewable Energy – A Social Media Sentiment Analysis Approach**
- Applied NLP and sentiment analysis to assess public opinion on renewable energy initiatives (EVs, wind power, green hydrogen).
- Analyzed temporal patterns in sentiment shifts aligned with major events (COVID-19, energy crises).
- Delivered policy recommendations for governments, NGOs, and businesses to boost engagement in clean energy.
- **Netflix Data Segregation – Python for Data Science**
- Processed Netflix dataset using Pandas, NumPy, and Matplotlib to analyze content type, country, genre, and release year.
- Built data cleaning pipelines for handling missing values and transforming multi-genre/movie duration features.
- Created visualizations (bar charts, trend plots) highlighting top-performing genres, countries, and year-wise growth trends.

Education

Montclair State University | MASTERS |

- Major: Data Science

Kakatiya Institute of Technology and Science | BACHELORS |

- Major: Electronics Communications and Instrumentation

Skills & Certifications

R, SQL, Python, Power BI, TensorFlow for Artificial Intelligence, Machine Learning, Optimization and Deep Learning, NLP, Clustering, Segmentation, Regression and Classification (linear / logistic), Tree-based models (Random Forest, Decision Trees)
