

Zaheena Mohammed

Data Analyst | Business Intelligence Analyst

Kansas, USA | +1 (316) 869-3922 | mohammedzaheena7@gmail.com |

PROFESSIONAL SUMMARY

Data Analyst with 6+ years of experience specializing in BI reporting, dashboard development, healthcare analytics, and cloud data warehousing. Strong expertise in SQL, Power BI, Tableau, Python, and ETL tools such as dbt, Airflow, SSIS, and Azure Data Factory. Skilled in building automated reporting pipelines, improving data quality, and delivering insights for clinical, operational, and financial decision-making. Proven track record of reducing manual reporting time, improving forecasting accuracy, and supporting regulatory and compliance workflows across healthcare and finance environments.

TECHNICAL SKILLS

- Data Analysis & Visualization:** Power BI (DAX, Power Query M), Tableau, Looker (LookML), Excel (Power Query, Pivot Tables, Macros)
- Programming & Analytics:** Python (Pandas, NumPy, Matplotlib, Seaborn), SQL (T-SQL, PL/SQL), Statistical Analysis, EDA
- Databases & Warehousing:** SQL Server, Oracle, PostgreSQL, MySQL, Snowflake, Databricks (Delta Lake), Amazon Redshift
- ETL & Data Integration:** dbt, Apache Airflow, SSIS, Alteryx, Azure Data Factory, API & batch data ingestion
- Cloud Platforms:** AWS (S3, Redshift, Glue), Azure (Synapse, ADF, Data Lake), GCP BigQuery
- Data Modeling & Governance:** Star/Snowflake schema, Dimensional modeling, Data quality checks, Metadata management, HIPAA/GDPR
- Reporting & KPI Dashboards:** Executive dashboards, KPI scorecards, Operational/Financial reporting, Automated Power BI refresh pipelines
- Collaboration & Agile Tools:** Jira, Confluence, Git/GitHub, SharePoint, Agile/Scrum methodology

PROFESSIONAL EXPERIENCE

Elevance Health, USA

July 2024 – Present

Data Analyst

- Designed, developed, and maintained enterprise Power BI dashboards using DAX, Power Query, and Snowflake datasets, improving forecasting accuracy and reducing manual reporting errors by 15%.
- Automated SQL/dbt pipelines to streamline data refresh processes, cutting reporting preparation time by 40% and enabling real-time performance tracking.
- Conducted ad-hoc analysis for finance and operations teams, providing actionable insights that improved reporting efficiency and decision-making.
- Implemented rigorous data quality rules and governance checks across datasets, reducing compliance-related reporting issues by 30%.
- Optimized Snowflake and Databricks workflows on AWS through performance tuning, reducing query execution time for key dashboards.
- Collaborated with cross-functional teams to gather business requirements and translate them into scalable BI solutions.
- Mentored junior analysts on Power BI modeling, DAX optimization, and best practices for dashboard usability.

Ennovar Data Solutions, USA

June 2023 – May 2024

Data Analyst Intern

- Built Power BI dashboards and SQL-based reports for healthcare clients, enhancing visibility into patient flow, clinical operations, and resource utilization.
- Performed data profiling, cleaning, and transformation using SQL, Power Query, and Excel automation to ensure accurate reporting.
- Defined KPIs and created advanced DAX measures to support decision-making for client leadership teams.
- Automated recurring weekly and monthly reports through Power BI Service and scheduled refresh pipelines.
- Worked with senior analysts and healthcare stakeholders to convert complex business requirements into usable BI deliverables.
- Contributed to migration of manual Excel processes into centralized automated dashboards.

Mphasis, India

Jan 2019 – Aug 2022

Data Analyst

- Developed interactive dashboards using Power BI, Tableau, and Looker to support clinical, operational, and leadership reporting, reducing manual reporting by 50%.
- Built SQL/Python forecasting models for patient admissions and resource utilization, improving planning accuracy across multiple facilities.
- Led integration of EHR/HIS data from 100+ healthcare locations into Snowflake through Airflow and SSIS pipelines, improving data consistency and reliability.
- Implemented data validation workflows and quality monitoring processes, reducing clinical reporting errors by 35%.
- Optimized SQL queries and Snowflake schemas to improve dashboard refresh times and reduce system load.
- Partnered with healthcare teams to provide ad-hoc analysis for revenue, claims, patient outcomes, and compliance initiatives.

EDUCATION

Masters in Data Science – Wichita State University, Kansas, USA

May 2024

Bachelor of Technology in Computer Science – Andhra University, India

May 2020

CAPSTONE PROJECT

Enterprise Healthcare & Finance Analytics Platform

WICHITA STATE UNIVERSITY — MS in Data Science

Aug 2022 – May 2024

SQL, Python, Power BI, dbt, Airflow, Snowflake, Databricks, AWS

- Designed a Snowflake/Databricks data warehouse integrating 2M+ healthcare claims and financial records across multiple sources.
- Developed automated ETL pipelines using dbt, SQL, and Airflow, reducing manual refresh processes by 40%.
- Built Power BI dashboards monitoring claim rejection patterns, patient volumes, revenue KPIs, and compliance metrics.
- Developed predictive forecasting models (scikit-learn) achieving ~85% accuracy, supporting improved resource planning.
- Implemented data governance and validation checks ensuring HIPAA and GDPR compliance and reducing data anomalies by ~30%.
- Optimized Snowflake performance using clustering/partitioning, cutting heavy-report execution time by 50%.
