

ROBIN SHARMA

+1 (680) 697-4357 | sharmarobin1121@gmail.com | www.linkedin.com/in/robinSharma11 | <https://github.com/RobMinister> | [Portfolio](#)

EDUCATION

Syracuse University
Master of Science in Computer Science

Syracuse, NY, USA

Himachal Pradesh University
Bachelor of Science in Computer Science

Shimla, HP, India

SKILLS

- **Frontend:** React, Angular, JavaScript, HTML, CSS, Bootstrap, Ionic Framework, TypeScript, WordPress, jQuery
- **Backend:** Python, Java, C++, C, C#, Node.js, .NET, NoSQL, MySQL, MS SQL, MongoDB, LINUX, UNIX, Shell Script, PHP
- **Tools:** Visual Studio, Jira, Git, Jenkins, Postman, Control-M, ServiceNow, VIM, JUnit, Selenium, JSON, Jenkins, Peoplesoft, AWS(EC2, S3, Lambda), Microsoft Azure, Google Cloud Platform, Docker, Kubernetes, CI/CD (Jenkins, Bamboo), Splunk

PROFESSIONAL EXPERIENCE

University of Wisconsin - Superior
Software Engineer II

Wisconsin, USA
Jun 2024 - Present

- Engineered **Scholarship App** including **system design**, C#, .NET, LINQ, MS SQL and **OAuth authentication** with **Azure Active Directory** increasing **system efficiency by 90%**
- Architected **MS SQL database** schemas, developed scalable **RESTful APIs** and utilized **asynchronous programming** and **Entity Framework Core** to optimize server-side performance and data processing **improving data throughput by 75%**
- Enhanced university websites by fixing bugs and adding features using **WordPress, MySQL, PHP, JavaScript, jQuery** and integrating **PeopleSoft** with **RESTful APIs, JSON** and **AJAX** increasing **system efficiency by 80%** and **reducing downtime by 70%**

United Parcel Service (UPS)
Software Engineer

New Jersey, USA
Jun 2023 - Feb 2024

- Spearheaded **Agile-based** password management solution across 300 servers saving 200+ hours/month by utilizing **Angular, Ionic, C#, .NET** for **REST APIs** and **MySQL** achieving **20% reduction in bugs** and development speed improvement
- Implemented automated email notifications to enhance security reducing password incidents by 45% and upgrading security with **Azure authentication** utilizing **AES+HMAC encryption**
- Engineered scripts using **Python (Pandas, SQLAlchemy)** to automate the transfer of 3,000 legacy records from **MySQL to MS SQL**, **cutting migration time by 50%** and **reducing errors by 40%**
- Leveraged **JFrog, HashiCorp, OWASP ZAP** and **SonarQube** for rigorous vulnerability testing and resolution, maintained top-tier security with **Azure authentication** and **AES+HMAC encryption** achieving a **50% reduction in potential threats**

Infosys Ltd
Senior Software Engineer

Pune, India
Nov 2017 - Dec 2021

- Advocated as **SCRUM Master** using **Agile Methodology** for Travel Booking website with **Oracle Database, Java (Spring Boot), Node.js, HTML, CSS, Angular 6** and **Typescript** delivering features 30% faster through iterative sprints
- Built backend microservices with **Java (Spring Boot), Hibernate, JAX-RS**, and **Oracle PL/SQL** implemented **RESTful APIs** with **OAuth2** and **Swagger**, automated **CI/CD pipelines** with **Jenkins** reducing processing time by 65%
- Optimized **backend performance** by integrating **Redis caching, RabbitMQ messaging**, and **GraphQL**, enhancing **API efficiency, inter-service communication**, and reducing **latency by 50%**
- **Led a 3-member team** in transitioning Westpac Bank's database from **Oracle to MS SQL**, developing new **SQL Scripts, Stored Procedures, Shell Scripts** and **SFTP Configuration** encompassing **more than 2000 tables and 400 scripts**
- Devised **Shell Script** code utilizing **UNIX** and **Control-M**, automating retrieval and secure transfer of essential files for Risk Analysis; resulted in remarkable **80% improvement in efficiency, saving 25+ hours per week**

PROJECTS

CodeSync: Real-Time Code Collaboration

Jun 2023 - Aug 2023

- Created real-time code collaboration platform using **React.js, Node.js, MongoDB, WebSockets** enabling multi-user editing and live chat **increasing user productivity by 40%** with **OAuth authentication** for secure access
- Containerized microservices with **Docker** and deployed via **Kubernetes** using **containerd runtime** achieving **99.9% uptime** and scaling to handle **5,000+ concurrent users**
- Automated builds, tests, and deployments with **GitHub Actions**, **reducing deployment time by 50%** and ensuring reliable delivery

BlueText: Android Messaging App

Apr 2022 - May 2022

- Developed offline messaging app using **Java, Android SDK** and **Bluetooth API** enabling **real-time peer-to-peer communication** without internet supporting a **range of 10 meters**
- Optimized **Bluetooth data transmission** and implemented **AES encryption** ensuring **25% faster delivery** and **secure reliable messaging**

PUBLICATION

Sharma R. (2021). [Artificial Intelligence in Agriculture: A Review](#), submitted and published in 2021 5th International Conference on Intelligent Computing and Control Systems (ICICCS) in IEEE Xplore on 26 May 2021

Abstract: Explored AI solutions for farming challenges like disease detection, resource use, and pest control, highlighting adoption barriers
