SUMMARY

- Around 4 years of experience as a Business Analyst and an exceptional record of delivering cost-effective, high-performance technology solutions to meet challenging business demands.
- Good knowledge of Software Development Life Cycle (SDLC), Agile/Scrum, and Waterfall Methodologies.
- Knowledge in writing an SQL query for identifying databases involved in the application development.
- Experience in documenting business requirements in the Requirement Definition Document that includes BRD, and FRD cases.
- Well-versed in project management tools such as MS Project for project planning and project scheduling.
- Expert in designing and deploying data visualizations using Tableau and Power BI.
- Well-versed in conducting GAP analysis, Impact analysis, SWOT analysis, Risk analysis, and Cost/Benefit analysis.
- Knowledge of Facilitating Joint Application Development (JAD) sessions to gather, synthesize, and prioritize requirements using interviews, document analysis, requirements workshops, site visits, and surveys.
- Ability to create defect tracking using HP Quality Center and Jira and reviewed them in subsequent iterations of the application development process.

SKILLS

Methodologies:	SDLC, Agile/Scrum, Waterfall
Documentation:	FRD, BRD, SRS
Project Management Tools:	MS Project, MS Excel, MS SharePoint
Visualization Tools:	Tableau, Power BI
Analysis Skills:	Cost/benefit analysis, Impact analysis, GAP analysis, Risk analysis, SWOT analysis
Tracking/Other Skills:	Jira, Microsoft Visio, HP Quality Center, JAD, Rational ClearQuest, RTM, UAT, SQL
Soft Skills:	Time management, Leadership, Problem-solving, Negotiation, Decision-Making, Documentation and Presentation, Verbal communication
Operating System:	Windows, Linux

EXPERIENCE

Huntington Bank | May 2022 - Current | Business Analyst

- Accelerated product development cycles by 15% through effective participation in all phases of the Agile SDLC, from requirements analysis to integration testing.
- Optimized reporting efficiency and accuracy by writing SQL stored procedures and troubleshooting Crystal Reports, enabling data-driven decision-making.
- Ensured user-centric software solutions by gathering requirements for SharePoint and other applications, increasing adoption and satisfaction.
- Empowered strategic business decisions by connecting Tableau to databases to create insightful visualizations, leading to targeted actions and improved KPIs.
- Minimized project risks and ensured alignment by conducting GAP and Impact Analyses, preventing costly rework and maximizing the value of enhancements.
- Fostered collaboration and drove successful project outcomes by facilitating JAD sessions, effectively translating business needs into technical solutions, and expertly managing requirements within Jira.
- Manage functional and non-functional Business Requirements and new requested requirements using Jira.

Zimmer Biomet, OH | March 2021 - April 2022 | Business Analyst

- Ensured timely project delivery and continuous improvement by applying Agile/Scrum principles, actively participating in release management, and facilitating effective sprints.
- Ensured project clarity and alignment by creating comprehensive BRD, SRS, and FRD documents, resulting in streamlined communication and reduced development rework.
- Accelerated project success by facilitating collaborative JAD sessions, translating business needs into effective architectural solutions, and ensuring timely resolution of issues and change requests
- Enhanced team collaboration and project efficiency by effectively managing the SharePoint site, ensuring secure document sharing, controlled authorizations, and organized deliverables tracking.
- Optimized operational efficiency by analyzing the "AS-IS" process, identifying bottlenecks, and designing a streamlined "TO-BE" process that [mention a specific improvement metric, if possible].
- Analyzed requirements for various reports, and dashboards and created them using Tableau.
- Executed SQL Queries to provide the testers with sample test data.
- Responsible for creating sub-tasks in JIRA for each User story during the sprint planning sessions and assigning sub-tasks to the developers.
