Data Analytics Professional with 2 years of Industry Experience and 4 Years of Academic Training in Data- Driven Decision Making

EDUCATION

UNIVERSITY OF MARYLAND, ROBERT H. SMITH SCHOOL OF BUSINESS

College Park, MD

Master of Science in Business Analytics

Sept 2021 – Dec 2022

Data Science Coursework: Data Science for Business, Decision Analytics & Modeling, Data Visualization, Data Mining

Domain Coursework: Price Optimization and Revenue Management, Decision Analytics and Simulation for Business Applications

MANIPAL INSTITUTE OF TECHNOLOGY

Manipal, KA

Bachelor of Technology in Instrumentation and Control Engineering with a minor in Data Science

July 2017 – June 2021

Relevant Coursework: Database Management Systems and SQL for Data Science, Advanced Optimization with Python, Statistics and Probability, R Programming, Exploratory Data Science

EXPERIENCE

RADAR RADAR, *Technical Consultant*

June 2023 – Oct 2024

- Spearheaded the **EMIR REFIT project** for **two Fortune 500 corporations**, creating regulatory reporting data pipelines using **SQL and BI tools**, ensuring compliance through data cleansing, transformation, and accurate reporting to regulators.
- Designed and optimized **backend SQL stored procedures** and **ETL pipelines** for the Radar SAAS platform, **increasing data processing efficiency by 20%** and enabling real-time trading and risk analysis via interactive dashboards.
- Led **cross-functional teams** in developing and deploying a **trade monitoring system for regulatory reporting**, aligning compliance, engineering, and data strategy teams to define requirements, establish KPIs, and implement agile workflows. Achieved **25% faster delivery** and enhanced risk management capabilities.

SMARTHOP INC, *Data Science Intern*

Sept 2022 – Dec 2022

- Performed risk assessment analysis using **Snowflake and Tableau** to evaluate load security impact on carrier lanes, resulting in **7% reduction in driver deadhead risk** and improved carrier profitability.
- Developed a **Python-based predictive model** using Logistic Regression to identify available loads on specific lanes with **89% accuracy**, enabling carriers to prioritize lanes strategically and achieve significant cost savings.

ERNST & YOUNG (EY), *Business Analyst Intern*

Feb 2021 – June 2021

- Supported **agile-driven data analysis** and reporting initiatives using advanced Excel, implementing **sprint-based delivery of insights that achieved a 7% increase in operational efficiency** and supported data-informed decision making.
- Analyzed client requirements for one of the largest banks in India, **creating case studies and user stories** that supported the digitalization of their business model, resulting in a **~5% increase in revenue and productivity**.

ACADEMIC PROJECTS

Digit Recognizer | Python (TensorFlow, Shuffle Split, Sklearn)

- Trained **machine learning models and neural networks** on a dataset of **42,000 rows and 785 columns**, leveraging Convolutional Neural Networks to develop a precise and efficient method for recognizing handwritten digits, achieving a **validation accuracy of 99.357%** with broad applicability across diverse use cases.

Australia's COVID-19 Crisis | Advanced Excel, Tableau, Python

- Engineered a comprehensive analysis of **COVID-19's impact across Australia** and other countries using World Bank datasets with 50+ variables, creating an interactive Tableau Story with four dashboards to **showcase key economic and health KPI comparisons**.

Airline Satisfaction Rating Predictor | Tableau, Python, R, Advanced Excel

- **Leveraged Tableau** to analyze 100,000+ records and engineer 25 key features, leading to the development and deployment of six machine learning models in **Python** that achieved **93.4% accuracy**, enabling strategic data-driven decisions.

TECHNICAL CAPABILITIES

Advanced Excel, Google Analytics, PostgreSQL, Adobe Analytics, JIRA, Tableau, Power BI, MATLAB, R, Python, C++, SQL (MsSQL, Oracle, MySQL, IBM Db2), AWS , Amazon Redshift, MongoDB, Snowflake, Git BASH, NoSQL
