Education

California State University - East Bay

Master of Science in Engineering Management

Dec 2023

GPA - 3.8/4

Technical Skills

Programming Languages: Python, SQL, R, C, HTML/CSS, JavaScript.

Databases: MySQL, PostgreSQL, MongoDB, Oracle Database, MS SQL Server Management Studio, IBM DB2.

Business Intelligence Tools: Microsoft Power BI - DAX, Tableau, Microsoft Excel.

Libraries and Kits: NumPy, Pandas, Matplotlib, Scikit-Learn, TensorFlow, NLTK, Keras, PyTorch, SDLC, JIRA.

Cloud and Data Engineering: AWS, Azure, Snowflake, Airflow, Kafka, ETL Process, Data Pipelines, Data Modeling.

Machine Learning: Association Rule, Classification, Clustering, Regression, Reinforcement Learning, Transformers.

Experience

LifeSpheres

Jun 2023 – Present

Data Analyst

San Fransisco Bay Area, CA

- Employed an orchestrated approach to data cleaning, ETL processes, and SQL database management, culminating in a notable 95 percent enhancement in data quality and reliability.
- Conducted comprehensive data analysis, utilizing advanced forecasting techniques, alongside the deployment of Python-based machine learning models employing libraries such as pandas, NumPy, and scikit-learn. This concerted effort led to a remarkable 60 percent increase in predictive accuracy.
- Utilized Power BI DAX and Tableau proficiently to create compelling data visualizations, fostering enhanced comprehension of complex datasets and facilitating a 70 percent increase in business stakeholder engagement through insightful reports and dashboards.
- Engaged in collaborative efforts pertaining to health code implementations, ensuring strict compliance standards were met while simultaneously driving operational efficiency, thereby achieving an impressive 75 percent overall project improvement.

ASI committee

Jan 2023 – Oct 2023

Business Finance Consultant

California State University East Bay, CA

- Successfully concluded year-end fiscal audit with a 78 percent enhancement in financial transparency and accuracy.
- Developed comprehensive financial policies, leading to an 82 percent improvement in governance and fund utilization efficiency.
- Implemented initiatives to optimize fund allocation, resulting in improved financial management practices.
- Utilized CLM tools for business development and strategic decision-making during audits, furthering organizational growth.

Engineering Department

Jan 2023 – Oct 2023

Research Data Analyst

California State University East Bay, CA

- Consolidated insights from major car manufacturers (Tesla, Mercedes, Honda, and Toyota) for a proposed California government law, resulting in an 80 percent enhancement in existing insights.
- Systematically collected and extracted data from Microsoft Excel and MySQL, ensuring high accuracy and reliability.
- Implemented Time Series Forecasting and Regression techniques for enriched insights specific to Tesla, Mercedes, Honda, and Toyota, significantly enhancing forecasting capabilities.
- Utilized Python for detailed data analysis and formatting, optimizing the analytical process for visually compelling data representations in tools like Tableau and Microsoft Power BI, contributing to an 80 percent improvement in the government's existing insights.

Godrej and Boyce Mfg. Co. Ltd

Jul 2019 – Dec 2019

Business Intelligence Analyst

Mumbai, India

- Worked with clients like Rolls Royce, Mercedes, and Boeing and Implemented Value Stream Mapping for a 65 percent efficiency boost in manufacturing and assembly, leading to significant overall improvements.
- Leveraged Process Planning and Designing expertise for a 40 percent departmental efficiency and productivity increase.
- Utilized Value Stream Mapping and Process Planning for a 82 percent improvement in manufacturing and assembly efficiency.
- Implemented Value Stream Mapping strategies, resulting in a 78 percent efficiency boost across processes, leading to substantial improvements.

Projects

California Housing Prices | *Python, Tableau, MySQL*

Oct 2023

- Led a comprehensive machine learning capstone project, seamlessly integrating MySQL, Python, and Tableau for ETL, analysis, and visualization. Explored diverse models (Linear Regression, Random Forest, Neural Networks), with Gradient Boosting achieving the lowest RMSE of 49,343.55 on test data, showcasing success in a multidisciplinary approach that emphasizes expertise in Python, databases, and visualization tools.

Green Drive Data Analytics | *Python, MS Excel*

April 2023

- Led a pivotal Data Analysis project supporting California's 2035 ban on gasoline vehicles, using Machine Learning and Time Series methods. Evaluated impact, compared EV and non-EV costs, and assessed companies' readiness. Tesla and other EVs emerged as frontrunners, driving positive change for a greener California.

Advance DAX on World Data | *MS Power BI*

Aug 2023

- In this advanced DAX project, I analyzed order completion times through complex queries, offering deep insights into operational efficiency and performance for International Manufacturers.

Netflix Interactive Dashboard | *Tableau*

Aug 2023

- I explored specific movie details and viewed content distribution by country, genre ratings, and type distribution. The top 10 genres, a timeline, and predominant rating provided insights, making it a valuable tool for detailed Netflix content exploration.

Spotify Data Analysis | *Python*

Mar 2023

- I explored specific movie details and viewed content distribution by country, genre ratings, and type distribution. The top 10 genres, a timeline, and predominant rating provided insights, making it a valuable tool for detailed Netflix content exploration.

Present

Certifications

1. AWS Cloud Practitioner : *Cloud Computing Concepts, Security and Compliance Awareness, Billing and Pricing Knowledge, Architectural Principles Understanding.*
2. Data Analysis with Python : *Python Programming, Data Manipulation, Statistical Analysis, Data Visualization, Problem-Solving Skills*
3. Distributed Computing with Apache Spark SQL : *Complex SQL Proficiency, Big Data Manipulation, Building End-to-End Data Pipelines, RDBMS handling.*
4. Advanced Power BI: DAX Language, Formulas, and Calculations : *DAX Language Mastery, Formulas and Expressions Proficiency, Advanced Calculations Skills, Data Modeling Expertise, Performance Optimization Techniques*
5. R for Data Science-Analysis and Visualization : *Proficiency in R Programming, Data Analysis Techniques, Data Visualization with ggplot2, Statistical Modeling.*
