

Rutuja Wavikar Business Analyst - CSPO

Boston, MA | +1-857-381-7829 | rutuja@mywebemails.com | [linkedin.com/in/rutuja-w-a26a15131](https://www.linkedin.com/in/rutuja-w-a26a15131)

SUMMARY

Accomplished Business Analyst with 4 years of experience in conducting comprehensive market and operational analyses to drive strategic business decisions. Proficient in translating complex data into actionable insights using advanced analytical. Highly skilled in defining business requirements, developing functional specifications, and implementing effective business solutions. Adept at leading cross-functional teams through the lifecycle of project management using Agile and Scrum methodologies. Committed to enhancing client engagements through meticulous requirement gathering, stakeholder management, and delivering customized presentations and reports

WORK EXPERIENCE

Business Analyst

January 2024 – Present

Deloitte

Remote, USA

- Collaborate closely with clients to understand their business needs and challenges, translating these into detailed requirement documents and functional specifications to guide the consulting team's efforts.
- Conduct comprehensive market and business process analyses using advanced data analytics tools such as SAS, SPSS, and Excel to derive actionable insights that inform strategic recommendations.
- Design and implement business solutions and frameworks using industry-standard methodologies like Agile and Scrum, ensuring alignment with client objectives and timely project delivery.
- Develop and maintain dynamic dashboards and reporting systems for clients using Tableau and Power BI, providing them with real-time insights into business performance and operational metrics.
- Facilitate effective stakeholder management through regular updates and presentations using PowerPoint, ensuring all parties are aligned with project progress and outcomes.
- Lead cross-functional teams in the execution of business transformation initiatives, overseeing the adoption of new processes and technologies that enhance operational efficiency and competitive advantage.
- Perform risk assessments on potential investments and strategies, employing financial modeling techniques and risk analysis software to support prudent decision-making.
- Organize and conduct training sessions for clients and internal teams on new systems and processes, ensuring smooth transitions and sustained impact of project implementations.

Course Analyst

September 2022 – December 2023

Northeastern University

Remote, USA

- Designed and implemented multimedia instructional materials and quality assurance (QA) checklists for curriculum review, resulting in a 65% increase in course satisfaction and significant reduction in administrative errors.
- Streamlined class scheduling and resource allocation across four campuses, enhancing operational efficiency by 80% and improving resource utilization.
- Collaborated with Fortune 500 industry experts to conduct workshops on job search strategies in technical domains, significantly boosting students' career readiness and engagement.
- Optimized enrollment processes for over 200 students per semester by implementing systematic approaches to data management and process flow, reducing administrative errors and streamlining student onboarding.

Business Data Analyst Intern

June 2023 – July 2023

MDF Painting & Power Wash LLC

Connecticut, USA

- Conducted in-depth analysis of operational processes to identify efficiency improvements using Microsoft Excel and SQL for data manipulation, resulting in optimized workflows for project execution and resource allocation.
- Collaborated with cross-functional teams to gather requirements and deliver actionable insights, utilizing JIRA for task management and ensuring alignment with business objectives.
- Prepared detailed reports and presentations using Microsoft PowerPoint and Google Slides to communicate findings and recommendations to senior management, facilitating informed decision-making and strategic planning.
- Managed project documentation and ensured compliance with industry standards, leveraging Google Drive and Microsoft SharePoint for secure and organized storage of project files, contributing to the maintenance of high-quality service delivery.

Business Analyst

July 2020 – December 2021

ICICI Prudential Life Insurance

Mumbai, India

- Facilitated strategic collaborations between IT and business units, utilizing analytics tools like Tableau and Google Data Studio to create sales tools, enhance stakeholder engagement, and identify key growth opportunities.
- Led the sourcing and evaluation of quotations for new products, partnering with startups and the commercialization team to enhance project outcomes and significantly cut down client reporting times.
- Championed the integration of an AI-powered system for underwriting decisions, working with technical and underwriting teams to refine and deploy the technology, achieving high accuracy in automated decision-making.
- Directed change management initiatives across underwriting, claims, and IT departments to improve the policy issuance process, resulting in reduced processing times and improved compliance and customer satisfaction.
- Implemented PowerShell scripts for efficient data management, including the bulk uploading of employee records and the generation of access credentials, enhancing system efficiency and security.
- Developed automated solutions for email management using natural language processing, improving the efficiency and accuracy of customer service operations.
- Consistently met project delivery deadlines and operational goals through effective sprint planning and project management, maintaining high productivity and team alignment.
- Spearheaded the implementation of an IBM Watson-powered chatbot, leveraging natural language processing to optimize customer service and sales interactions.
- Automated and streamlined data reporting processes using Microsoft Power Automate, improving the timeliness and accuracy of business reporting and operational analysis.

Business Analyst

June 2018 – August 2019

Keystone Construction Pvt. Ltd.

Mumbai, India

- Led the development and execution of comprehensive project plans, utilizing tools such as Microsoft Project and Visio for work breakdown structures and resource allocations, ensuring timely management review and stakeholder approval.
- Crafted detailed business cases and maintained a strategic project roadmap, risk register, and action log using advanced Excel functionalities and risk management software to enhance tracking accuracy and project governance.
- Engaged proactively in the follow-up on action items, showcasing strong multitasking abilities and high-level interactions across functional teams using tools like JIRA and Asana for task management.
- Supported project documentation and communication flows within Project Confluence, SharePoint, and Microsoft Teams, ensuring repository integrity and accessibility for all project stakeholders.
- Analyzed and synthesized over 150,000 data records, employing Tableau and Power BI for the creation of dynamic, interactive dashboards that highlight key performance indicators (KPIs) and support data-driven decision-making.
- Enhanced operational processes by implementing machine learning algorithms via Python to identify trends and improve predictive analytics capabilities, contributing to substantial operational improvements and cost efficiencies.
