OK, USA | +1 (405)-622-1871 | saikrishnaanuga23@gmail.com | [LinkedIn](#)

SUMMARY

Full Stack Java Developer with **3+ years** of experience designing, developing, and deploying scalable enterprise applications across banking, technology, and consulting domains. Proficient in building microservices-based systems using **Java, Spring Boot, and RESTful APIs**, with expertise in front-end frameworks like **Angular and React** for seamless end-to-end integration. Skilled in database design and performance tuning using **PostgreSQL, MySQL, and Oracle**, and experienced in **CI/CD automation using Jenkins, Maven, and Docker within AWS and Azure environments**. Adept at implementing security frameworks (**Spring Security, OAuth2, JWT**), **event-driven architectures (Kafka, RabbitMQ)**, and **Agile/Scrum** collaboration to deliver high-performing, production-grade software solutions. Recognized for optimizing application performance, reducing deployment times, and enhancing user experience across multi-environment enterprise systems.

TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3, Shell Scripting
- **Backend Development:** Spring Boot, Spring MVC, Hibernate, JPA, RESTful APIs, Microservices Architecture, JSP, Servlets
- **Frontend Development:** Angular, React (Basic), Bootstrap, jQuery, AJAX, JSON, Responsive Web Design
- **Database & Storage:** MySQL, PostgreSQL, Oracle, MongoDB, Redis, PL/SQL, Database Optimization & Query Tuning
- **Cloud & Deployment:** AWS (EC2, S3, RDS, Lambda), Azure (Devops), Docker, Kubernetes, Jenkins, CI/CD Pipelines, Maven, Gradle
- **Messaging & Streaming:** Apache Kafka, RabbitMQ, JMS (Java Message Service)
- **Version Control & Collaboration:** Git, GitHub, GitLab, Bitbucket, JIRA, Confluence, Agile/Scrum
- **Testing & Quality Assurance:** JUnit, Mockito, Postman, Selenium (Automation), Swagger API Documentation
- **Security & Authentication:** Spring Security, OAuth2, JWT, Role-Based Access Control (RBAC), OWASP Security Standards
- **Performance Monitoring & Logging:** ELK Stack (Elasticsearch, Logstash, Kibana), Grafana, Prometheus, Splunk, Application Performance Monitoring (APM)
- **Development Tools & IDEs:** IntelliJ IDEA, Eclipse, Visual Studio Code, Postman, Docker Desktop
- **Design & Architecture Concepts:** Object-Oriented Design (OOD), SOLID Principles, MVC, Design Patterns, API Gateway, Load Balancing, RESTful Service Design

EXPERIENCE

JPMorgan Chase & Co – Java Developer | Aug 2025 - Present | USA

- **Engineered** enterprise-scale **microservices applications** using **Java, Spring Boot**, and **RESTful APIs**, enabling real-time processing of **8M+ financial transactions daily** across retail banking systems.
- **Implemented Spring Security** and **OAuth2** authentication frameworks to enhance security compliance, protecting sensitive data across **6+ integrated applications**.
- **Integrated AWS services (EC2, S3, Lambda, RDS)** and **Apache Kafka** to support event-driven processing, improving throughput and reducing system latency by **2 seconds per transaction**.
- **Optimized** complex **SQL** and **PL/SQL** queries in **PostgreSQL** and **Oracle**, accelerating analytics pipelines and improving data access speeds for **mission-critical reports**.
- **Automated** CI/CD pipelines using **Jenkins, Git**, and **Maven**, cutting manual deployment time by **10+ developer hours per sprint** while maintaining continuous delivery standards.
- **Collaborated** in **Agile/Scrum** sprints, leading **6+ high-priority modules** through design discussions, peer reviews, and feature implementation for production delivery.

Dell Technologies – Java Full Stack Developer | May 2021 - July 2023 | India

- **Developed and deployed** scalable **web applications** using **Java, Spring Boot, RESTful APIs**, and **Angular**, supporting **15,000+ active users** across global enterprise systems.
- **Architected** modular **microservices** with **Spring Boot, Hibernate**, and **PostgreSQL**, improving system modularity and reducing API response time by **1.8 seconds per request**.
- **Integrated AWS (EC2, S3, RDS)** and **Docker** to streamline deployments across **3 production environments**, ensuring consistent release management.
- **Automated CI/CD workflows** via **Jenkins, Git**, and **Maven**, reducing release duration from **2 days to under 6 hours**, improving delivery frequency and reliability.
- **Collaborated** with **UI/UX** and **backend teams** in **Agile sprints**, delivering **12+ production-grade features** with **JWT-based authentication** and enhanced user experience using **Angular** and **Bootstrap**.

KPMG - Software Developer | July 2020 - April 2021 | India

- **Programmed and deployed** enterprise **web applications** using **Java, Spring Boot**, and **RESTful APIs**, supporting **5+ internal platforms** across audit and tax domains.
- **Designed and implemented** modular **microservices** with **Spring Boot, Hibernate**, and **MySQL**, improving architecture scalability and reducing API latency by **1.5 seconds per operation**.
- **Integrated Azure DevOps pipelines** for continuous integration and deployment across **3 production environments**, ensuring stable release management.
- **Built and optimized SQL queries** and **stored procedures** to process **1M+ transactional records**, improving database performance and backend efficiency.
- **Assembled** dynamic front-end components using **Angular, HTML5**, and **Bootstrap**, enhancing dashboard responsiveness and data visualization for enterprise clients.

EDUCATION

Oklahoma City University, Oklahoma City, USA
Master of Science in Computer Science

Aug 2023 -May 2025
