

Sai Niteesh Business Analyst

sainiteesh@mywebemails.com | (334)-440-1387 | Indianapolis, IN | LinkedIn

Summary

- Business Analyst with 6+ years of experience in leveraging data-driven insights to optimize business operations and drive strategic decision-making.
- Skilled in Python, SQL, Tableau, and Power BI, with a strong background in predictive modeling, financial forecasting, and data visualization.
- Highly proficient in TFS, JIRA, Confluence, ADO (Azure DevOps) for creating and tracking user stories, designing, requirements mapping, traceability matrix, reports, test execution and report defects.
- Equipped with strong analytical, detail orientation and communication skills which enabled me to perform exceptionally in all stages of Software Development Life Cycle (SDLC) and Testing Life Cycle (STLC) in both waterfall and agile/scrum, hybrid and SAFe methodologies.
- Ability to analyze and document the business requirements in the form of Business Requirement Document (BRD), Functional Requirement Document (FRD) / Functional Specification Document (FSD), Requirement Traceability Matrix (RTM), Request for Proposal (RFP).
- Proficient in Unified Modeling Language (UML) diagram for creating Use Case Diagrams, Activity Diagrams and Sequence Diagrams using MS Visio.
- Demonstrated robust User Interface (UI) and User Experience (UX) knowledge, and ability to manage and develop wireframes, and working prototype using Axure, Figma, Modern Requirements.
- Ability to understand the requirements for complex SQL queries and procedures and can write complex SQL queries on SQL Server Management Studio.
- Excellent project management skills with solid hands-on experience on Project scoping, Resource Allocation, Scheduling, Budgeting and Drafting Remedy Procedures using MS Project.

Technical Skills

- **Technical Skills:** MS Excel, Python, SQL, HTML, CSS, JavaScript, Typescript, Figma, VS Code, Git, MS Visio, Salesforce
- **Analytics Visualization Tools:** Tableau, PowerBI, looker, Workbench, Google Analytics, SAS, Agile, Scrum
- **Databases:** MS-SQL, MySQL, Redshift, Snowflake, Big Query, PostgreSQL, MongoDB
- **Management Tools:** Jira, Gitlab, Kanban Board, Confluence, Trello, HubSpot
- **SDLC Methodologies:** Waterfall, Agile, Agile-Scrum
- **Business Skills:** UML, Gap Analysis, SWOT Analysis, BRD, FRD, RFP, RTM, User Stories, Prototyping, JAD sessions, Requirement gathering

Professional Experience

Business Analyst, BNY Mellon

10/2023 – Present | Remote, USA

- Worked on Cash Management, Case management, Incident Management to upgrade and leverage the customer facing experience application.
- Analyzed and troubleshooted AWS, JSON API code to validate data from backend and customer portal.
- Worked on variety of documentation for database applications, including design, requirement, and specification documents, and test plans.
- Mapping business processes to applications, databases and IT systems.
- Assisted In writing SQL Queries as a part of Backend testing.
- Overviewed the manipulated data on a daily basis SSIS for ETL Stored Procedures, Reporting and Extracts SSIS/SSRS from complex data structures.

Business Analyst, Publix

04/2023 – 09/2023 | Atlanta, USA

- Created User Stories based on business requirement and system functionality to be aligned with the system and kept in Product backlog to maintain the PBIs.
- Performed Gap Analysis of the AS-IS and TO-BE processes to identify and validate the requirements.
- Wrote SQL queries to perform Data Validation and Data Integrity testing.

- Worked extensively with the GUI (Graphical User Interface) designing and developing for the As Is and To Be Provisioning front-end modules.
- Created Use Cases and used MS Visio to model Use Case Diagrams, Activity Diagrams, business processes, business flow diagrams, work flow diagrams, sequence diagrams for the application's design.

Business Analyst, Pragmatic-IT Solutions

03/2019 – 12/2022 | Hyderabad, India

- Maintain and administer ad hoc report writing tools, providing training and support to end users.
- Collaborate with the IT department to develop and improve HR reporting and dashboards.
- Track key performance indicators and commodity indices to verify supplier increase requests, identify cost-saving opportunities, mitigate potential threats, and inform contract negotiations.
- Assist the Generation Supply Chain Portfolio Manager and Category Leads with supplier selection and recommendations, including qualitative and quantitative analysis, selection criteria, and development and analysis of RFIs and RFPs.
- Perform SAP and Access queries to analyze and summarize data for presentation to decision-makers.
- Analyzed data from different systems from database extracts along with the customer data information and developed the mapping document for the ETL process.
- Created multiple Ad-hoc, change requests, incidents in ServiceNow for Release and process to provide support in release management
- Drafted and updated slide decks, map governance and process flow diagrams for future process and Developed wireframes, mockup screen for UI screen using Modern Requirements.
- Created Business Requirement Document (BRD), Functional Specification Document (FSD) and managing multiple projects.

Business Analyst, Techdata Solutions

08/2017 – 02/2019 | Hyderabad, India

- Fully responsible for requirements gathering and documentation.
- Excellent analytical skills to comprehend business processes, functionality, and requirements, and to translate them into system requirement specifications.
- Managing the Software Development Life Cycle (SDLC) using the waterfall model, with a strong understanding of agile methodology.
- Skilled in requirements gathering through workshops and JAD sessions with clients, developers, and QA analysts, as well as by referencing existing system documentation, procedures, and test scenarios.
- Experienced in conducting User Acceptance Testing (UAT).
- Writing Use cases and producing behavioral diagrams such as sequence diagrams, collaboration diagrams and class diagrams based on UML methodology and creating business process flow diagrams.
- Provide support during User Acceptance Testing (UAT) and perform functional testing to ensure requirements are met.
- Experienced with business analysis frameworks, including BABOK (Business Analysis Body of Knowledge).
- Meticulously assessed data from various sources and generated conceptual and logical database designs using data modelling tool.
- Conducted interviews, meetings and JAD sessions during the process of Requirement Gathering.
- Interacted with client and the Technical Team for requirement gathering and translation of Business Requirement to Technical specifications.
- Created and managed parameters in Power BI Desktop for changing the source with different environments such as development, test and production.

Education

Master of Science, Auburn University at Montgomery
Management Information Systems

01/2023 – 05/2024 | Alabama, USA

Bachelor of Engineering, Anna University
Electronics and Communication Engineering

07/2013 – 05/2017 | Chennai, India
