EXPERIENCE

Business Analyst, HCA Healthcare, USA

January 2024-Present

- Spearheaded data-driven initiatives at HCA Healthcare, leveraging tools such as SQL, Python, and Tableau to analyze financial data and generate actionable insights, resulting in a 15% increase in portfolio performance.
- Led cross-functional teams to develop and implement predictive models using machine learning algorithms, contributing to a 20% reduction in investment risk and enhancing decision-making processes.
- Implemented data quality improvements, resulting in a 25% decrease in data discrepancies and ensuring accurate reporting for regulatory compliance and client satisfaction.
- Collaborated with stakeholders to streamline business processes, utilizing JIRA to document requirements, leading to a 30% decrease in project delivery time.
- Automated data extraction and reporting procedures using Alteryx, reducing manual effort by 40% and enabling real-time monitoring of key performance indicators.
- Collaborated with IT teams to implement data governance frameworks and ensure data integrity, contributing to a 25% improvement in data accuracy and reliability across business systems.

Business Analyst, Experion Technologies, India

July 2020-August 2022

- Employed advanced statistical analysis and predictive modeling techniques using R to optimize customer segmentation strategies, resulting in a 20% increase in cross-selling opportunities and revenue growth.
- Incorporated Salesforce CRM and Adobe Analytics to analyze customer journey data, leading to a 15% improvement in customer retention rates through targeted marketing campaigns and personalized product offerings.
- Led the implementation of data visualization solutions using Tableau, providing actionable insights to senior management and driving a 10% reduction in operational costs within the insurance claims department.
- Executed advanced Excel functions such as VLOOKUP, PivotTables, and Macros to streamline data analysis processes, leading to a 20% increase in efficiency in generating financial reports for decision-makers at Experion.
- Implemented business process improvements using Lean Six Sigma methodologies, leading to a 30% decrease in turnaround time for policy issuance and improving overall customer satisfaction scores by 15%.
- Conceptualized SAP for data extraction, analysis, and reporting, streamlining business processes by automating data workflows and improving data accuracy, resulting in a 20% reduction in manual reporting errors.

Business Analyst, Intex Technologies, India

September 2019-June 2020

- Leveraged VLOOKUPS and HLOOKUPS to rigorously validate data integrity, cross-referencing data from datasets to maintain uniform consistency.
- Streamlined data manipulation tasks by incorporating NumPy and Pandas libraries, resulting in an efficient workflow that processed data sets 50% faster than previous methods, enhancing team responsiveness to data requests.
- Settled and documented Functional Requirements Documents (FRD), Business Requirements Documents (BRD), and Software Requirements Specifications (SRS) to capture stakeholder needs, ensuring clear communication and alignment between business objectives and technical teams.
