UI Developer

PROFESSIONAL SUMMARY:

- Passionate web developer with over 5+ years of professional experience as a **Front-end UI/Web developer**, debugging and testing of different modules of an application.
- Professional experience in Application Software Design, Object Oriented Design, Development, Analysis, Documentation, Debugging, Testing and Implementation of User Interface (**UI**) **web applications**.
- Experience in Web Applications Development using **HTML 4.01/5, CSS (2/3), XHTML, XML, JavaScript, Angular Js, JQuery, Bootstrap, and Node. Js, React. Js, AJAX, XML and JSON**.
- Experience in developing modern web applications using **Angular2, Node.js, React.js, Express.js** and **Mongo DB**.
- Experienced in **React JS** and working with **Redux** architecture.
- Working with **ECMA Script 6** features. Used Babel, web pack with es2015, **react JSX** presets.
- Developed user interface by using **React JS**, Flux for SPA development.
- Implemented client-side Interface using **React JS**.
- Developed various screens for the front end using React JS and used various predefined components from NPM (Node Package Manager) and **Redux** library.
- Developed Single page applications (SPA) using **Angular.JS 2.0**, HTML5, CSS3, **BootStrap3** for websites requiring data-rich and instant feedback on interaction.
- Experience with creating prototypes/wireframes of websites from PSD images and working with CSS pre-processors **LESS** and **SASS**.
- Experience with Angular2 & ES6 Features.
- Experience in development and implementation of Restful Web APIs, and exposes endpoints using **HTTP** verbs like **GET, PUT, POST** and **DELETE**.
- Experience in all phases of the Software Development Life Cycle (**SDLC**) including requirement gathering, Analysis, Design, Development, Testing, Implementation and Maintenance support in various computing environments.
- Experience in designing database using PL/SQL to write Triggers, Stored Procedures and expert in writing queries using Oracle, SQL Server and MySQL.
- Good and extensive experience in Web designing technologies like **HTML5, XHTML, JavaScript, CSS3, Angular. Js, jQuery, Ajax and JSON**.
- Experience on working with CSS Backgrounds, CSS Layouts, CSS Positioning, CSS Animations, CSS Text, CSS Borders, CSS Margin, CSS Padding, CSS Table and Pseudo Classes.
- Experience in using **AngularJS/AngularJS 2, React.JS, Node.JS, BackboneJS**, knockoutJS Twitter Bootstrap and Underscores.
- Responsible for React UI and architecture. Building components library, including Tree, Slide-View, and Table Grid.
- Used **React JS** for templating for faster compilation and developing reusable components.
- Extensive experience on modern JavaScript frameworks Node.js, React.js, JQuery, AngularJS etc.
- Extensive experience in **jQuery, jQuery plugins, AJAX, dynamic HTML, JSON, AngularJS** with **Bootstrap**.
- Proficient in making **AJAX** calls using **JQuery** and usage of **JSON** for faster and impulsive responses. Proficient

TECHNICAL SKILLS:

Web Technologies	HTML/HTML5, CSS3, Bootstrap3, JavaScript, AJAX, JSON
JavaScript Libraries	JQuery, Angular.js, Angular. Js (v.2), TypeScript, Backbone.js, Require.js, Node.js, Bootstrap, React. Js
Database	Oracle 9i/10g/11g, PL/SQL, MySQL.
Web Services:	XML, SOAP, RESTful, Graph QL.
Unit Test Framework	Jasmine, Karma
Operating System:	Windows 98/NT/XP/2000, Linux, Mac OS X
Methodologies	Agile, Scrum, 41Waterfall
Version Control	GIT, CVS, SVN, TFS.
IDEs worked on:	Notepad++, Eclipse, Visual Studio, Junit, Sublime Text2, Text Mate, Microsoft Publisher, WebStorm, Brackets
Web/Application Servers	Apache, Tomcat, Glassfish, IBM Web Sphere, JBuilder.
Debugging Tools	Firebug, Chrome Developer Tools, POSTMAN, IE Developer Toolbar.
Browsers	Firefox, Chrome, IE, Opera, Safari

ACHIEVEMENTS:

- Certificate awarded by udemy for completing Javascript Course.
- Certificate awarded by Google for excellent performance in Google Tag Manager Professional Certification.
- Certificate awarded by Google for excellent performance in Google Analytics for Beginners Certification.
- Certificate awarded by Google for excellent performance in Advanced Google Analytics Certification.
- Certificate awarded by Google for excellent performance in Google Data Studio Professional Certification.

PROFESSIONAL EXPERIENCE:

Tech Mahindra

Nov 2023 – May 2024

Client : Applied Materials

Front End UI Developer

Applied Materials is a global leader in materials engineering solutions for the semiconductor, flat panel display, and solar photovoltaic (PV) industries. They play a crucial role in producing virtually every new chip and advanced display worldwide.

Responsibilities:

- Developed and implemented various features of a web application designed to streamline the chip-making process for process engineers, enhancing their productivity and efficiency.
- Designed and maintained intuitive, responsive, and user-friendly interfaces using **Angular 14**.
- Worked closely with process engineers, product managers, and backend developers to gather requirements, create specifications, and ensure seamless integration and functionality of web applications.
- Optimized web applications for maximum speed and scalability, ensuring a smooth user experience for engineers working on critical chip-making processes.

- Participated in code reviews, debugging, and testing to ensure high-quality code and adherence to industry standards and best practices.
- Created and maintained detailed documentation of the developed features, user guides, and technical specifications to facilitate knowledge transfer and future development.

Key Achievements:

- Significantly improved the efficiency of process engineers by implementing features that automated complex tasks and provided real-time data insights.
- Received positive feedback from end-users for the intuitive design and functionality of the application, which led to higher adoption rates among process engineers.
- Successfully collaborated with cross-functional teams to deliver projects on time and within scope, contributing to the overall success of Applied Materials' engineering solutions.

Environment: HTML5, CSS3, JavaScript, React.js, Angular, Git, Bitbucket, Webpack, Gulp
Jira, Confluence

Perficient Inc
Client: Reckitt Benckiser
Sr. React Js Developer

Jan 2021 – July 2023

Reckitt Benckiser is a global leader in consumer health, hygiene, and home products. Known for its innovation and commitment to quality, Reckitt Benckiser's portfolio includes many well-known brands that are household names.

Responsibilities:

- Led the project to revamp a legacy eCommerce web application by transitioning it to a modern, React.js-based architecture, significantly enhancing the performance and user experience.
- Designed and developed responsive, intuitive, and user-friendly interfaces using React.js, ensuring a seamless shopping experience for users.
- Implemented a modular, component-based architecture in React.js, allowing for reusable components and efficient code management.
- Worked closely with backend developers, UX/UI designers, and product managers to gather requirements, design solutions, and ensure the seamless integration of new features.
- Optimized application performance by implementing best practices in React.js, including code splitting, lazy loading, and efficient state management.
- Conducted thorough testing, including unit testing and end-to-end testing, to ensure the application met high standards of quality and reliability.
- Created detailed documentation of the revamped application, including user guides, technical specifications, and developer documentation to support future maintenance and development.

Key Achievements:

- Successfully transitioned the legacy application to a modern React.js-based platform, resulting in a more responsive, faster, and visually appealing user experience.
- The new component-based architecture improved code maintainability and scalability, facilitating easier updates and feature additions.

- Received positive feedback from Reckitt Benckiser for the improved performance and user experience of the revamped application, contributing to stronger client relations.
- Effectively collaborated with cross-functional teams, ensuring that project goals were met on time and within budget.

Environment: HTML, CSS, ReactJs 16, GraphQL, Umbraco Headless CMS, Shopify CMS, .Net, JSON

Miracle Software Systems
Java/UI Developer

July 2018 – Dec 2020

Employee Self Service Portal which is a web-based application using which the employees of an organization can access and get reports of their payroll. They can create compensation summary, view taxes and deductions, view paycheck history, view time off balances and view direct deposits. The system also involves request and approval workflows for W4 changes, demographic changes time off requests etc. Handled the below

Responsibilities:

- Developed various features of the Employee Self Service Portal, including compensation summaries, payroll reports, tax and deduction views, and paycheck history interfaces.
- Designed and implemented responsive, user-friendly interfaces using modern front-end technologies to ensure a seamless user experience for employees.
- Implemented request and approval workflows for W4 changes, demographic changes, and time off requests, ensuring efficient and secure processing.
- Worked closely with backend developers, UX/UI designers, and business analysts to gather requirements, design solutions, and ensure the seamless integration of new features.
- Optimized the performance of the web application to ensure fast loading times and a smooth user experience, even with large amounts of data.
- Conducted thorough testing, including unit testing and end-to-end testing, to ensure the application met high standards of quality and reliability.
- Created detailed documentation for the developed features, user guides, and technical specifications to facilitate knowledge transfer and future development.

Key Achievements:

- Successfully developed and implemented key features that provided employees with comprehensive access to their payroll and compensation information, improving transparency and convenience.
- Effectively collaborated with cross-functional teams to deliver the project on time and within scope, contributing to the overall success of the Employee Self Service Portal.

Environment: Angular 8, HTML5, CSS3, TypeScript, RxJS, Angular Services, Spring Boot, Java, JWT (JSON Web Tokens), Jasmine, Karma, Git, Angular CLI, Maven, MySQL, PostgreSQL, Jira, Confluence, Agile methodologies

Academic Details:

May 2018

- Jawaharlal Nehru Technological University - Kakinada, India Bachelor of Technology in Computer Science
