

Sanjana Sana

CA | (660) 525-8264 | sanjanasanach@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY:

- DevOps Engineer with 3+ years of extensive experience in automating build, deployment and monitoring processes, leveraging AWS, Kubernetes, Terraform, Ansible and Jenkins to optimize system scalability, reliability and performance
- Skilled in managing cloud resources, automating workflows and implementing cost-efficient, secure, and high-availability infrastructures to meet business goals and technical requirements
- Proven ability in CI/CD pipeline management, system monitoring and cross-functional collaboration, driving continuous improvement and delivering reliable solutions aligned with organizational objectives

PROFESSIONAL EXPERIENCE:

Client - Truist - DevOps Engineer

Jul 2024 - Present

- Streamlined build and deployment processes with Jenkins, set up environments using Ansible, and effectively managed resources with Kubernetes to ensure smooth operations
- Enhanced infrastructure and application monitoring by integrating Dynatrace and Splunk, enabling automated incident resolution and faster troubleshooting
- Improved database performance and reliability by optimizing SQL Server with Flyway for schema management, tuning, and seamless version upgrades
- Managed agile workflows with Jira for sprint planning and used Confluence to create detailed and user-friendly documentation for deployment processes
- Re-engineered systems for better performance, continuous improvement and scalability, leveraging Kubernetes and CloudBees to deliver reliable and highly available deployments

Client - Blue Cross Blue Shield - Cloud Engineer

Aug 2023 - May 2024

- Managed containerized applications with Docker, coordinated Kubernetes clusters, and streamlined deployment workflows using Helm for efficient scaling and reliability
- Maintained scalable cloud infrastructure by leveraging tools like Terraform and Ansible
- Created and refined pipelines with GitLab CI/CD, automating the entire build, test, and deployment lifecycle for Kubernetes applications through Helm charts
- Automated critical tasks such as cloud resource management, system monitoring, and data processing workflows using Python and Bash scripts
- Used Ansible to handle configuration management and automated infrastructure provisioning across cloud environment

SuperOps - Junior cloud Engineer

Jul 2021 – Jun 2022

- Managed AWS infrastructure to ensure scalability and high availability, utilizing EC2, S3, ELB, VPC, Auto Scaling, and Route 53, while using Cost Explorer, CloudWatch, and Trusted Advisor to fine-tune resource usage
- Automated the provisioning of cloud resources with tools like AWS CloudFormation, Elastic Beanstalk, and Lambda, ensuring efficient and repeatable deployments
- Applied cost-saving techniques, including EC2 Spot Instances, Reserved Instances, and cloud resource optimization to significantly reduce operational expenses
- Implemented strict security measures by configuring IAM policies, Security Groups, and KMS encryption, while running regular vulnerability assessments with AWS Inspector, GuardDuty, and Macie
- Collaborated with cross-functional teams to enforce DevOps best practices, security compliance, and automated infrastructure audits using CloudTrail and Config

Dhyanahitha Organization - Software Engineer trainee

May 2020 – Dec 2020

- Built CI/CD pipelines with Jenkins, automating builds, tests, and deployments
- Set up EC2 instances and VPCs for secure hosting and network segmentation
- Used Ansible playbooks for managing server configurations and environment setups
- Integrated Prometheus and Grafana for real-time monitoring and performance tracking
- Automated end-to-end testing with Selenium and managed version control with Git

TECHNICAL SKILLS:

- **Containerization & Orchestration:** Docker, Kubernetes, Docker Compose
- **Infrastructure as Code:** Terraform, Ansible
- **CI/CD & Build tools:** Jenkins, GitLab CI, Maven
- **Cloud Platforms:** AWS (EC2, S3, ELB, IAM, Route 53, Cost Explorer, CloudWatch, Trusted Advisor, CloudFormation, Elastic Beanstalk,), Azure
- **Monitoring & Logging:** Prometheus, Grafana, ELK Stack
- **Scripting & Automation:** Linux shell scripting, bash, python
- **Networking:** TCP/IP, DNS, Load Balancers, SSH
- **Programming:** Python, C, C++, Java
- **Other:** SQL, VS Code, Git, Confluence, Jira, PowerShell

EDUCATION:

University of Missouri Kansas City
Master of Science (M.S) in Computer Science

Kansas City, MO
May 2024

GITAM School of Technology
Bachelor of Technology in Computer Science

Hyderabad, India
May 2021

CERTIFICATIONS:

- DevOps on AWS
- AWS Cloud Practitioner Essentials
