

Sasi Kumar Gorantla
Java Full Stack Developer
sasig942@gmail.com
+1 4702879965

PROFESSIONAL SUMMARY

- Have 5+ Years of experience in **Object-Oriented Analysis & Design, Development** with strong **Java / J2EE** programming background developing **Web based application** using **Agile methodologies practices**.
- Involved in all the phases of SDLC life cycle such as **requirement gathering, analysis, design, development, deploying, testing, debugging, project management, implementation & maintenance** of various Enterprise and web-based applications using **Java8, J2EE, JDBC, spring, JSP, Hibernate Technologies**.
- Strong development and hands-on experience in **J2EE** technologies such as **JSP, Servlets, Hibernate, JDBC, Web Services (SOAP, REST)**.
- Extensive experience of designing and developing software applications with the **EJB, Java, JSP, Servlets, Java Beans, JNDI, AJAX, JMS, ORM, JNDI, Web Services (SOAP REST), JDBC, JAXP, RMI, XML, JavaScript, jQuery, CSS, Web Services, SOAP, JSON**.
- Experience in developing web applications using **J2EE, Servlets2.1, JSP, Spring4.0/5.0, AngularJS, Struts, Hibernate, EJB, JMS, JDBC, JAVAX-WS, HTML, CSS, ReactJS**.
- Have experience in **API Management Technologies** for 2 years in **Apigee**.
- Experience in developing and supporting with API management tool(Apigee).
- Good experience in developing customized policies in **Apigee Edge** and developing API's in **Apigee Baas**.
- Proficient in **Java8** Design Patterns including singleton, Factory, Model View Controller (MVC) and Data Access Object (DAO). Well versed with core **Java** concepts like collections, serialization, **Java** beans.
- Responsible for planning Presentation level (web pages) using the concepts like **HTML, XML, CSS, JavaScript** and to some extent **JQuery** using **AJAX**.
- Substantial experience in developing JEE based Web Services to expose useful functionality to web users through **SOAP**, describing them using **WSDL**, registering them using **UDDI** for easy availability to potential users and consuming using **Axis2** and **JAX-WS**.
- Have good knowledge on different **databases** like **PostgreSQL, MySQL, DB2, Oracle 13c/11g, Microsoft SQL Server, NoSQL DB (Raven DB, Mongo DB and Cassandra, Couch DB, Redis**.
- Good working experience with Version Control Tools (**Git, GitLab, BitBucket**), **Build Tools (Ant, Maven, Gradle)**, **Automation Tools (Selenium, Tosca)**, **Bug Tracking Tools (Jira, BugZilla, Redmine, ALM)**, **Ticketing Tools (DoveTail)**, **Other Tools like Log4j, Logback, Junit, TestNG, Jenkins, Cucumber, putty**.
- Strong knowledge of Cloud application security models, protocols and tools like **AWS IAM, AWS KMS policy, Microsoft Azure AD((Functions, Queues, Entra ID, DevOps, Storage), Google Cloud** experience in **microservices** cloud architecture in **AWS (EC2, S3, EBS, Cloud watch, load Balancer)**.
- Experience in **Use Cases, Sequence Diagrams and Class Diagrams** using **UML, J2EEDesign Patterns**.
- Experience in **developing and deploying applications on Cloud Platforms** like **Amazon Web Services**.
- Managed **Amazon Web Services** like **EC2, S3 bucket, ELB, Auto-Scaling, SNS, ELK, SQS, AMI, IAM, Dynamo DB, Elastic search, Virtual Private Cloud (VPC)** through **AWS Console** and **API Integration**.
- Excellent deploying applications in **AWS** as **EC2** instances and created snapshots data that had stored in **AWS S3**.
- Implemented a **Continuous Delivery** pipeline with **Docker, Jenkins and GitHub** and **AWS AMI's**.
- Experience working with **Docker** components like **Docker Engine, creating Docker images, Compose, Docker Registry**.
- Experienced in **Java Web-based, Desktop Based Development with Concepts of, Object Oriented Design (OOD), Object Oriented Analysis (OOA), Object Oriented Programming (OOP)** and its **implementation**.
- Experience in developing **Microservices** using **Spring Boot** and followed domain driven design in developing user interfaces with **Angular6/7, HTML, CSS, JSTL and Custom Tag Libraries**.
- Technology leadership for the direction of the Web-based application using **spring framework, MVC pattern, and WebSphere** Server integrating to a proprietary framework.
- Experience in applying **JMS (Java Messaging Service)** for reliable information exchange across **Java** applications using **Apache Kafka, RabbitMQ, ActiveMQ** and **IBM MQ** to communicate from **Client to Server**.
- Experienced in working with various **Python** Integrated Development Environments like **Net Beans, PyCharm, PyScripter, Spyder, PyStudio, PyDev** and **Sublime Text**
- Expert in **HTML5/CSS3** development and have experience in **JS Framework**, Responsive designing **Spring** Core Annotations for Dependency Injection **Spring DI** and **Spring MVC** for **RESTAPI** and **SPRING boot for micro-services**.
- Experience in the developing Front-end web applications using **HTML 4.0/5, CSS3, JavaScript, AngularJS, jQuery, JSF, ReactJS, NodeJS, AJAX, JSON, XHTML** and **XML**
- Experience in Integration, Design, and Implementation of **RESTFUL** services for Web-Applications worked on IDE's such as **Eclipse/My Eclipse, IntelliJ, IDEA, WSAD/RAD** and **JBuilder** for developing, deploying and debugging the applications.
- Good working knowledge of persisting **Java** objects using **Hibernate** that simplify data storage and retrieval to the underlying database.
- Experienced in working with databases such as **Oracle 8.x/9i/10g/11g, MS-SQL Server, MySQL** and using **PL/SQL** to write stored procedures, functions and Triggers for different Data Models.

- Experience in Configuration Management, setting up company Version policies, build schedule using **SVN**, **GitLab**, **BitBucket** and **Git** with Building and project development tools like **ANT & MAVEN**.
- Strong experience in a quick paced Agile Development Environment including (**TDD**) **Test Driven Development** and Scrum.
- Good knowledge in Big Data Technologies like **Hadoop**, **HDFS**, **MapReduce**, **Hive**, **HBase**, **Flume**
- Expertise working on Application servers and Web servers like **WebLogic 8.x/9.x/10.x/12.x**, **Apache Tomcat 5.x/6.x/7.x**, and **WebSphere 8.x/9. x**.

TECHNICAL SKILLS

Programming Languages	C, C++, Embedded C, Java 1.5/1.7/1.8, J2EE, Python 3.6.0, SQL server, PL/SQL.
Databases	Oracle 9i/10g/11g/12c, SQL Server, MongoDB, MySQL, DB2, Apache Cassandra, PostgreSQL
Tools	TOAD,GULP, Report Builder, Maven, Jenkins, Cucumber, GitHub, GitLab, Bitbucket.
IDE	Eclipse, Edit Plus 3, My Eclipse, NetBeans, Flash Builder 4.5, IntelliJ
J2EE Technologies	Servlets, Struts, EJB 2.0, JSF, JDBC, JSTL, JNDI, JMS, RMI, Java Bean, JTA,
Middleware Frameworks	Spring MVC, Spring Security, Spring DATA, Spring JDBC, EJB, Servlets, JDBC, Spring Boot.
Cloud Technologies	AWS EC2, EBS, S3, SNS, ES, SQS, RDS, VPC, PCF, Route53, ELB, IAM, Docker, Google cloud, Elastic Search, Microsoft Azure(Functions, Queues, Entra ID, DevOps, Storage)
Web Technologies	HTML, JSP, J2EE, Soap, Rest, Rest API, AJAX, JSF, jQuery, CSS3, AngularJS, Angular 9/10/11/12, JavaScript, JSON-Parsing, JSON-DTD, React JS, NodeJS, Apigee.
Scripting Language	Unix Shell
Messaging services	JMS (Rabbit MQ), Multithreading, JSP, Hibernate, Apache Kafka
Architecture	ORM, SOA, MVC, Service Facade, Micro services, Client-Server Architecture.
Web Services	JAX-WS(R), JAX-RS(Restful), WSDL
Operating Systems	Windows, Linux.

PROFESSIONAL EXPERIENCE

Java Full Stack Developer
Anthem
Atlanta, Georgia

April 2023 - Till date

Responsibilities:

- Implemented Agile methodologies, actively involved in technical meetings, requirement gathering, analysis, planning, effort estimation, development and testing.
- Deployed the application to **AWS** cloud and used some features like **lambda**, **S3** Buckets, **EC2**, and **Cloud watch** using **Terraform**.
- Worked with **EC2** instances, **AMI rehydration** for every 45 days and deployments in AWS console and routing the traffic using **AWS Route53 service**.
- Developed UI Layer from Scratch for the application using **HTML5**, **CSS3**, **Angular** and **Bootstrap**.
- Implement client-side interface using **Angular 12** and **Node.js** to structure **JavaScript** in an **MVC**.
- Involved in writing application-level code to interact with APIs, Web Services using **AJAX**, **JSON**, **XML**.
- Responsible for enhancing the UI using **HTML**, **JavaScript**, **XML**, **JSP**, **CSS** as per the requirements and providing the client side using **jQuery** validations.
- Extensively used **SASS** (Syntactically awesome style sheets) while styling with **CSS3**.
- Developed Single Page Applications using **NodeJS**, **GULP**, **WEBPACK(ES6)**.
- Involved in developing the latest version of Object-Oriented JavaScript Libraries like **Angular** and had hands-on experience with Web Responsive using Bootstrap's templates.
- Understand existing Java services so that they can be converted to **APIGEE** based services.
- Developed Restful API's using **APIGEE** platform. Worked on building proxies and policies with in **APIGEE** along with security frameworks.
- Extensively used Core Java 1.8 concepts and implemented Collections, I/O, Exception Handling, Lambda and Generics in logic design, and development.
- Developed the application to support Multithreading to achieve high throughput, used both Synchronous and Asynchronous execution types.
- All the functionality is implemented using **Spring Boot**, **Micro Services** and **Hibernate ORM**.
- Used Spring Core Annotations for **Dependency Injection**, **Spring DI** and **Spring MVC** for **REST APIs** application with Spring Boot and Microservices.
- Developed **POJO** objects and used **Hibernate** as the **Object-Relational Mapping** (ORM) tool to access the persistent data from **SQL** Server.

- Used **Maven** as build and dependency management tool for creating EAR, WAR and JAR files to be deployed in application servers.
- Developed RESTful Web services for transmission of data in **JSON** format, to interact with various upstream and downstream applications.
- Transformed **Monolithic app to Microservices** using Spring Boot via **12-factor methodology**.
- Worked with the **JSON** for authentication and Security configurations using Node Js.
- Developed and supported **Kafka** integrations, including topics, producers, consumers and streaming applications.
- Worked on Continuous Integration (CI) and Continuous Delivery (CD) implementation process using Jenkins and Docker.
- Performed operations such as Create, Update, Insert and Delete data in **MongoDB** and handled data transmission based on RESTful web service. Used **Mongo repository** Template for persistence.
- Built **serverless Azure Functions in Node.js** to automate workflows and process real-time data for bug tracking.
- Integrated **Azure DevOps (ADO)** APIs to automate bug tracking and CI/CD workflows.
- Worked with **Snyk and Aqua security APIs** for vulnerability scanning and compliance reporting in cloud environments.
- Used **Kubernetes** to deploy scale, load balance and manage **Docker** Containers with multiple namespace versions.
- Involved in configuring various Jenkins's plugins for **SonarQube** as part of the build deployment pipeline.
- Used **GIT** as version control system, to keep track of all the work & all changes, allowing several developers to collaborate and used Maven as build and configuration tool.
- Test automation for web application (SWAP module) using **Cucumber**.
- Developed **BDD** tests using Cucumber by writing features and developed the required Selenium support code in JAVA for Cucumber.
- Log and event forwarding (**System logs, CloudWatch, CloudTrail, AWS Config**), aggregation to **Splunk**.
- Used **IntelliJ IDE** to develop and debug the application.
- Followed **TDD** Development and developed the unit test cases using **Junit** for backend Services.
- Used **REST** Client and **POSTMAN** to test the **REST** based services and used **Junit and Mockito** to test the middleware services

Environment: J2EE, Java 8, Embedded C, Agile, WebSphere, Spring Boot, Hibernate, Multithreading, JDBC, Web services, Apigee, Restful, Spark, Kafka, SQL, Oracle, Design Patterns, Synk, Aqua, Maven, Jenkins, Cucumber, Git, Putty, jQuery, Docker, Junit, Mockito, Express, GULP, NodeJS.

Software Developer

T-Mobile

January 2022 – March 2023

Atlanta, Georgia

Responsibilities:

- Worked in Agile software development, attended daily **Scrum** meetings, **sprint** planning meetings and sprint retrospective and tracked the progress on **Rally**.
- Responsibilities included troubleshooting various software application and connectivity issues using debugging process and coding techniques in Java programs.
- Worked in **Amazon Web Services (AWS)** for utilizing the **AWS stack** (Including **EC2 and S3**), in creating high-availability, fault tolerance, and auto-scaling environments.
- Developed **API gateway** for invoking **AWS Lambda** to manage the servers and alerts in the AWS.
- Used **AWS Cloud watch** in alerting, maintaining and monitoring of production and corporate servers/storage.
- Designed User Interface using **HTML, XHTML, CSS/CSS3, jQuery, JavaScript, AJAX, JSP** and **React.js** and **XML** in a responsive grid layout. Implemented responsive design template to get a new interface in **Bootstrap, HTML5**.
- Used **React JS** to create custom components for data manipulations and to display data in company standard format.
- Developed the user interface by using the **ReactJS components**, Forms, Events, Keys and Router.
- Developed the application using **Spring MVC** intensively and JavaScript for major data entry and extreme data validation at the client side.
- Created Typescript reusable components and services to consume REST APIs using component based architecture using Angular 8.
- Developed **REST** architecture-based web services using **JAX-WS** to facilitate communication between client and servers.
- Designed and implemented Microservices with **Spring Boot** to communicate with other modules of the web application and created dynamic documents of **RESTful** endpoints using Swagger API.
- Involved in developing code for obtaining bean references in spring framework using **Dependency Injection/ IOC/AOP** on **Spring Tool Suite (STS)**.
- Worked with **WebSphere Application Server 7.0, Web Logic Apache Tomcat 7.0** web solution server following the Maven build Cycle.
- Wrote Python code to simplify lists in **Python** with list comprehension and **Python OOP**
- Developed the spring **AOP** programming to configure logging for the application and also to track **CRUD** operations on the database and used Spring Transactions and Spring Web flow for Payment and Money Transfer.
- Used **Hibernate Session Factory** for database connectivity and used **Hibernate APIs** to retrieve and store data to the database with hibernate transaction control using **ORM** tool **Hibernate 3.0** framework like **HQL** queries etc.
- Used **OpenID** and **OAuth 2.0** connect protocols for API security, through scoped access tokens.

- Worked on **RabbitMQ**, to publish or subscribe messages from the other applications.
- **GIT** for the version control and as a repository for code management along with **LOG4j** to logging errors, Debugging and Exception statements.
- Involved in **Cucumber** while working on project.
- Involved in implementing **BDD framework** using Cucumber.
- Installing and Configuring **PostgreSQL** from source or packages on Linux machines.
- Tested webservice using **SOAP UI, SWAGGER, POSTMAN** with required validations.
- Responsible for Continuous Integration (CI) and Continuous Delivery (CD) process implementation using **Jenkins** along with **LINUX** Shell scripts to automate routine jobs.
- Worked on creation of custom **Docker** container images, tagging, pushing images, integration of Spring boot.

Environment: AWS, J2EE, Java 8, Tomcat, HTML5, CSS, JavaScript, Angular JS, Spring, Hibernate, Swagger, Multithreading, JDBC, Couch DB, Web Services, REST, SOAP UI, Teradata SQL Assistant, Maven, JUnit, Mockito, Cucumber, Jenkins, GIT, Sonar, Fortify.

Java/J2EE Developer
KPIT Technologies Ltd.
Pune, India

March 2020 – July 2021

Responsibilities:

- Developed the **J2EE** application based on the Service Oriented Architecture.
- Used **Spring** Framework for dependency injection, integration of Hibernate using Spring ORM support, development of RESTful web services to give JSON output.
- Used **Spring MVC** front controller to handle requests from dispatcher servlets to handle incoming requests.
- Configured **Spring MVC** from scratch using XML configurations, namespace handling, Spring security setup and giving access to resources, wrote code to transform **XML** documents using **JAXB** Marshaling and Unmarshalling using Spring Injections.
- Developed the applications using **SPRING** framework including **Spring Core, Spring WS, Spring MVC**, and Spring Integrations design pattern
- Worked moving from Angular **4** controllers to **Angular 7** Components for more responsiveness of the application.
- Used **Hibernate** in persistence layer, **hibernate mappings** using **Annotations, HQL, Criteria** and **Queries**.
- Involved in Design and Development of **RESTful** API.
- Developed code in Java, J2EE, Webwork and **Hibernate** using **Pair Programming Practices, TDD, Continuous Integration**
- Worked with **SOAP UI, JAX-WS** to create Web Services and consuming the existing services.
- **REST** web services are created - Spring with Jackson Mappers exchange data using **JSON** data structure.
- Used **SVN** for source Version Control, resolving code conflicts and merging code base.
- Deployed the application in **Web Logic** Application Server.
- Developed **Microservices** to provide **Rest APIs** utilizing Spring MVC
- Strong experience in writing **PL/SQL** queries and performance tuning.
- Developed **Unix Shell** scripts to automate repetitive database processes.
- Used **Maven** for dependency management, build applications and deploy to the containers, application servers and create versions in the repository.
- Used **JUnit** for unit testing of the application and **log4j** for logging.

Environment: Core Java, Java 1.6, Spring, Hibernate, SVN, Apache, Eclipse 3.3, JNDI, Log4j, JUnit, XML, XSD, AngularJS, Node.js, Couch DB, J Query, HTML 5, bootstrap, JavaScript, Web Logic Application Server, Oracle, Windows XP, REST API, NetBeans, UNIX.

Junior Java Developer
Kingstone Info Solutions
Bengaluru, India

June 2019 – February 2020

Responsibilities:

- Participated in **SCRUM** Meeting and Delivered the Project in SCRUM methodology.
- Implemented **Spring MVC**, dependency Injection (DI) and aspect-oriented programming (AOP) features along with hibernate.
- Involved in System Analysis and Design methodology as well as Object Oriented Design and development using **OOAD** methodology to capture and model business requirements.
- Developed the functionalities using **Agile** Methodology.
- Developed **Angular-JS** components such as controllers, Services, filters, models.
- Used **Spring Core Annotations** for Dependency Injection and used **Apache Camel** to integrate Spring framework.
- Used **Hibernate** as **Persistence** framework mapping the objects to table using **Hibernate** annotations.
- Responsible for writing the different service classes and utility **API**, which will be used across the framework.
- Used **Camel** to implement **Web Services for integration** of different systems.

- Developed Web services component using **XML**, **WSDL**, and **SOAP** with **DOM** parser to transfer and transform data between applications.
- Used **JMS** for the asynchronous exchange of critical data and events among **J2EE** components.
- Involved in implementation of MVC pattern using **Angular JS**, and **Spring Controller**.
- Created **RESTful web services** interface to Java-based runtime engine.
- **JSP** and **Struts** framework used to Developed presentation tier and while coding JSP pages used custom tag libraries and Struts tag libraries and used **AJAX** for better user interface.
- Created Database Tables, Sequences and wrote hibernate mapping files and POJO classes and used **Spring DAO** on data layer access layer with the Hibernate.
- Used **Spring ORM** to integrate with the **Hibernate** and used the hibernate template to implement the business logic.
- Used MySQL as Database and wrote SQL queries for updating and inserting data into the tables.
- Developed business logic using **Java**, **Struts** Action classes and deployed using **Tomcat**.
- Using **JavaScript** user input validated using regular expressions and also in the server side.
- Used **JIRA** to assign, track, report and audit the issues in the application and developed the pom.xml using Maven for compiling the dependencies.

Environment: Java/J2EE, Hibernate, spring, Windows, Eclipse, HTML, JavaScript, AJAX, HTML, CSS, Angular JS, MySQL, REST, JSP, HTML5, CSS, JavaScript, AngularJS, Spring, Spring Boot, Hibernate, Multithreading, REST, SOAP, Apache Camel, SQL, Maven, Jenkins, GIT.
