SUMMARY

- Full-Stack Developer with 3.5+ years of experience in backend and frontend development, cloud infrastructure, and DevOps automation. Proficient in Java, Python, and C++, with hands-on expertise in Spring Boot, RESTful APIs, React.js, and microservices architecture.
- Skilled in database management (SQL, NoSQL), cloud computing (AWS ECS, SQS, RDS, IAM, CloudWatch), and CI/CD automation (Jenkins, GitLab CI/CD, Docker, Kubernetes). Strong foundation in performance optimization, query tuning, and API security using OAuth 2.0, JWT, and OWASP security best practices.
- A problem-solver and team player, passionate about developing secure, scalable, and high-performance applications while collaborating with cross-functional teams in Agile environments.

SKILLS

Programming Languages: Java, Python, C++, JavaScript, TypeScript

Web & Frontend Development: React.js, Angular, Redux, HTML5, CSS3, Node.js

Backend Development: Spring Boot, Express.js, RESTful APIs, Microservices, Multithreading

Cloud & DevOps: Docker, Kubernetes, CI/CD (Jenkins, GitLab CI/CD), Cloud Alerting System, AWS Cloud (ECS, SQS, RDS, ECR, IAM, CloudWatch, Secrets Manager, and Step Functions)

Databases & Big Data: SQL (PostgreSQL, Oracle, MySQL), NoSQL (MongoDB), Apache Spark, Redis, Memcached

Security & Authentication: OAuth 2.0, JWT, OWASP Security Guidelines, Secure API Development

Testing & Performance Optimization: JUnit, Postman, API Testing, Load Balancing, Algorithm Optimization, Query Optimization

Agile & Project Management: Jira, Scrum, Agile Methodologies, Code Reviews, Version Control (Git, GitHub, Bitbucket)

WORK EXPERIENCE

Full-Stack Developer

PTC | USA | Aug 2023 – Present

- Developed and optimized new features for Codebeamer, enhancing product performance and usability, leading to a 25% increase in user efficiency.
- Designed and implemented scalable backend services using Java, Python, and C++, ensuring high availability and maintainability.
- Enhanced database performance by optimizing queries, indexing, and implementing caching strategies (Redis, Memcached), reducing API response time by 30%.
- Improved frontend performance by optimizing JavaScript code, lazy loading, and reducing bundle sizes, resulting in a 20% faster UI.
- Integrated CI/CD pipelines (Jenkins, GitLab CI/CD) to automate builds, testing, and deployments, reducing release cycles by 50%.
- Strengthened security by implementing OAuth 2.0, JWT authentication, and OWASP security guidelines, ensuring a secure and compliant system.
- Developed and optimized RESTful APIs and microservices, improving system scalability and reducing inter-service communication time by 35%.
- Containerized applications using Docker and Kubernetes, enabling scalable, cloud-native deployments.
- Collaborated with cross-functional teams, including hardware, software, and DevOps, to align development processes efficiently.
- Participated in Agile development, contributing to sprint planning, code reviews, and retrospectives to drive continuous improvement

Backend Development

Tek International | India | May 2022 – Jan 2023

- Developed and led the backend architecture for a security-focused application in Java & SQL, successfully restricting unauthorized database access and enhancing system security.
- Analyzed and managed SWIFT Message Type (MT) reports, ensuring accuracy, compliance, and industry-standard adherence.
- Integrated frontend and backend systems efficiently, optimizing overall performance, scalability, and user experience.
- Managed databases with SQL, ensuring efficient data storage, retrieval, and security, and collaborated on troubleshooting & performance optimization to minimize downtime.
- Worked in Agile teams, actively participating in code reviews, CI/CD integration, and cross-functional collaboration to ensure smooth development and deployment.

Java Developer Intern

Version1 | India | Sep 2021 – May 2022

- Developed a comprehensive claim management system using Java, focusing on streamlining workflows to enhance user experience and operational efficiency.
- Integrated the system with existing databases, ensuring compliance with industry regulations for accurate and secure claim processing.
- Conducted training sessions and provided ongoing support to end-users, facilitating effective navigation and utilization of system features.
- Monitored system performance, identified areas for improvement, and implemented solutions that reduced claim turnaround times by 20%.

EDUCATION

Master of Science in Computer Science

California State University

Dec 2024

San Bernardino

Bachelor of Technology in Computer Science

Jain University

Aug 2022

Bangalore, IN
