Latham, NY | (412) 390-7704 | shayoni.roy012@gmail.com | [LinkedIn](#)

(Open to Relocate)

SUMMARY STATEMENT

Business Analyst with **4+ years** of experience and a Master's degree in **Supply Chain Management**, actively looking for new opportunities.

AWARDS, RECOGNITION, CERTIFICATIONS

- [Microsoft Azure AI-900 Fundamentals \(986/1000\)](#)
- [Lean Six Sigma Green Belt Certification](#)
- [Certified Unilever Supply Chain Analyst](#)
- CII Spot Award – Cognizant (2022): Recognized for driving continuous improvement and innovative solutions in supply chain processes, automation, and optimization projects.
- Excellence Award – Cognizant (2023): Honored for outstanding contributions to process innovation, KPI dashboard development, and business analysis initiatives.
- Selected for the Pennsylvania Robotics & Technology Fellowship at Siemens Energy
- Recognized for mentoring and leading teams in academic and professional settings

PROFESSIONAL EXPERIENCE

COSTCO WHOLESALE

Portland, OR

Business Analyst

Feb 2025 - Present

Project 1: *The project focused on understanding how goods moved through procurement, warehousing, and logistics, and identifying areas where automation could cut inefficiencies.*

- Partnered with stakeholders to gather, analyze, and document business requirements, creating **BRDs** and functional specifications for inventory management and order fulfillment enhancements
- Built **ETL pipelines** and automated workflows using **SQL**, reducing manual reporting effort by **30%+** and improving data accuracy
- Supported demand forecasting and inventory optimization by analyzing sales history, vendor lead times, and seasonality patterns, improving forecast accuracy by **15%**, reducing excess inventory and generating **\$1.2M** in annual cost savings and revenue impact
- Validated data requirements, reconciling transactions, and mapping **inbound/outbound** workflows to ensure system continuity and operational readiness

Project 2: *I was responsible for building interactive dashboards to track key supply chain metrics in real time. I also integrated AI tools to flag issues early, enabling teams to act quickly and proactively*

- Designed and deployed AI agents by applying prompt engineering techniques, enabling contextual decision support, automated exception handling (e.g., delays, shipment disruptions, inventory mismatches), and reducing manual interventions by **30%**
- Designed and implemented **KPI** dashboards (inventory turns, order cycle time, supplier lead time, fill rates, stockouts, forecast accuracy) in **Power BI** and **Excel**, enabling executives to monitor performance and cut inefficiencies

- Conducted gap analysis between current and future state supply chain processes, identifying automation opportunities in warehousing, procurement, and logistics
- Collaborated with leadership to define business-focused **KPIs** for decision-making.

SIEMENS ENERGY

Mt Pleasant, PA

Fellow, Pennsylvania Robotics and Technology

May 2024 - Aug 2024

The project aimed to decide whether to make or buy tooling and to strengthen the overall supply chain strategy. This was achieved by analyzing risks, costs, and efficiency trade-offs to recommend practical solutions supporting long-term business goals.

- Conducted a strategic evaluation of the tooling supply chain, including **ROI** modeling, make-or-buy analysis, and outsourcing feasibility studies, aligning decisions with long-term business goals.
- Performed **SWOT** and impact analysis to assess operational, financial, and strategic trade-offs of outsourcing vs. in-house management
- Designed risk mitigation strategies addressing supply disruptions, vendor reliability, and cost volatility, strengthening supply resilience
- Applied Lean Six Sigma methods to uncover inefficiencies in procurement and vendor management, recommending waste-reduction initiatives that saved **\$750K** annually
- Analyzed inbound/outbound logistics flows, capacity planning, and vendor lead times to optimize performance, reducing costs by more than 15%, and improving service levels by 10%
- Leveraged **SQL** and **Excel** for inventory tracking, purchase order analysis, and vendor performance reporting, improving visibility for decision-making
- Contributed to carbon footprint and sustainability reporting, aligning supply chain metrics with ESG goals
- Integrated AI technologies into supply chain and business analysis workflows, enabling predictive insights, automated reporting, and intelligent recommendations, which shifted responsibilities from manual monitoring and reactive problem-solving to proactive strategy and decision support
- Delivered executive-ready reports and presentations with detailed supply chain models, cost analyses, and improvement recommendations

COGNIZANT

Bangalore, India

Business Analyst

Jul 2020 -Jul 2023

Client: Lululemon- Retail & E-commerce, North America

The goal was to ensure smooth order fulfillment across retail stores, warehouses, and e-commerce systems while supporting new product launches and seasonal promotions. I helped translate business requirements into functional processes, dashboards, and automation tools to improve operational efficiency and decision-making

- Collaborated with product managers, supply chain teams, and IT to analyze end-to-end order-to-cash workflows, ensuring smooth integration between retail stores, warehouses, and e-commerce systems
- Created **BRDs**, functional specifications, and process flow diagrams (Visio) for new product launches, seasonal promotions, and omni-channel order fulfillment
- Conducted **UAT** and requirement validations, documenting results and ensuring traceability from user stories to deployment
- Created wireframes and mockups using **Figma** to translate business requirements into intuitive process flows and UI concepts
- Developed and maintained performance dashboards (inventory accuracy, order fulfillment rate, and stockout frequency) for senior leaders to track operational **KPIs**
- Supported change management initiatives by preparing **SOPs**, training materials, and process documentation, reducing onboarding time for operations staff by 20%
- Facilitated **Agile** ceremonies (backlog grooming, sprint planning, retrospectives), writing user stories and acceptance criteria in Jira to ensure business needs were aligned with delivery

Client: Walmart- Supply Chain & Inventory Management, North America

The team needed to move from SAP ERP to Manhattan WMS to simplify warehouse and distribution operations. I contributed by documenting current and future processes, validating data migration, reconciling inventory transactions, and testing integrations to ensure the new system operated smoothly.

- Led requirements workshops with stakeholders to document AS-IS and TO-BE processes for inbound shipments, warehouse management, and outbound distribution, reducing process gaps by ~25%
- Supported the migration from **SAP ERP** to Manhattan WMS, validating data migration, reconciling inventory transactions, and testing API integrations to ensure seamless adoption
- Coordinated UAT, stakeholder reviews, and user sign-off, ensuring successful go-lives with minimal disruption to warehouse and distribution operations
- Authored functional specifications, user stories, and acceptance criteria for WMS enhancements, enabling **Agile** teams to deliver solutions aligned with business objectives

TATA STEEL

Vocational Trainee

Jamshedpur, India

Jun 2019 - Jul 2019

Studied and analyzed the working of drives in electric blowers used in industrial operations.

- Researched and documented the functioning of electric blower drives to understand their role in maintaining airflow in steel plant processes, driving efficiency.
- Gained exposure to industrial equipment maintenance, safety practices, and energy efficiency considerations.
- Assisted in analyzing system performance and suggested improvements for smoother operations.

TATA STEEL

Summer Intern

Jamshedpur, India

Jun 2018 - Jul 2018

Upgrading and integrating RFID-based security systems for enhanced access control.

- Worked on upgrading existing vehicle security systems with **RFID** technology to ensure reliable access management.
- Conducted testing and troubleshooting of RFID modules to validate functionality during the upgrade.
- Documented project progress and supported team discussions on implementation challenges and improvements.

PROJECTS

Lean Six Sigma Process Improvement - Haemonetics

- Led a Green Belt DMAIC project to identify and eliminate process inefficiencies, applying root cause analysis to reduce defects and streamline QA workflows.
- Used Excel and statistical tools to track process metrics, validate improvements, and implement standardized controls, improving throughput and reducing errors.

Data Mining – Wine Quality Prediction (R)

- Developed CART classification and regression models on a wine quality dataset.
- Compared tree-based models with logistic regression for accuracy, providing actionable insights on key physicochemical features influencing quality.

Fellow – Beam Collaborative

- Evaluated product viability through business requirements, SWOT, and market research
- Delivered scaling recommendations using stakeholder interviews, financial modeling, and cross-functional collaboration.

NASA Challenger Disaster – Organizational Behavior Case Study

- Analyzed groupthink and leadership failures contributing to the disaster, identifying critical gaps in risk assessment and decision-making.
- Developed actionable lessons for improving organizational communication, escalation processes, and accountability under high-pressure situations.

SKILLS

- **Databases & Data Management:** MySQL, Manhattan WMS, SharePoint lists
- **Programming & Scripting:** Python (Pandas, NumPy), Java, VBA/Excel macros
- **Data Visualization & Reporting:** Power BI, Tableau, Excel Dashboards, Power Query, DAX, Figma
- **Business Analysis & Process Improvement:** Agile & Scrum (Sprint Planning, Backlog Grooming, User Story Creation, Retrospectives), UAT, Requirement Gathering, Stakeholder Communication, Lean Six Sigma (Green Belt), Process Optimization, Risk Assessment & Mitigation, BRD, FRD
- **Project & Collaboration Tools:** JIRA, Confluence, MS PowerPoint, MS Teams

EDUCATION

UNIVERSITY OF PITTSBURGH

MS in Supply Chain Management and Business Analytics (GPA: 3.7/4)

Pittsburgh, PA

Aug 2023 - Dec 2024

SIKSHA O ANUSANDHAN UNIVERSITY

Bachelors in Electronics and Communication Engineering(GPA: 9.4/10)

Bhubaneswar, India

Jul 2016 - May 2020
